MMA DAILY RECOMMENDATIONS FOR MONDAY, MARCH 4, 2019 © MMA, INC, 2019

Geocosmic Critical Reversal Dates: These dates affect all markets. They are the midpoint of geocosmic clusters and have a range of three days either side. Sometimes they expand to as much as 5 days. The idea is to see a new two-week or greater high or low and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates. The more stars next to the date, the greater the historical correlation with a cycle end and reversal. For more information, please read Volume 3 of the Stock Market Timing series. Below is the date of the midpoint, and in parentheses, the length of time containing the geocosmic signatures (known as a “cluster”). If the cluster is long (more than 15 days), there may be other possible reversals, based on tighter geocosmic clusters, within the greater cluster.

Mar 1-4**

Mar 17**

April 11-12***

These periods are usually more important than the solar-lunar reversal zones, but not necessarily any more accurate. It is just that when they do hit, they usually correspond with primary cycles, whereas lunar reversals need only correspond to 2.5% reversals.

NOTE: Mercury turns retrograde now (March 5-28), a time when support and resistance zones, as well as technical studies and “normal” cyclical and geocosmic correspondences, tend to be unreliable as buy and sell signals. We have to be crafty when trading, outfoxing the “Trickster” during this period. Also, we note that any market that does not make a reversal within three days of Mercury turning retrograde (March 5), is a candidate for a reversal within two trading days of the midpoint of Mercury retrograde, which will be March 16-17 (a weekend) in this instance.

Market Recap/Overview: The story on Friday was the deep sell off in Gold and Silver. Gold dropped below 1300, and Silver briefly traded below 1520. They were much higher the prior week. Stocks were up nicely, but not above their 2019 highs registered last Monday, February 25. One or more of them could take out last week’s high this week, for a case of intermarket bearish divergence in a two-star CRD zone. Currencies, treasuries and crude oil were down too, whereas Bitcoin was higher.

DJIA CASH: Friday’s close was bullish and follows the prior day’s bullish trigger, which is a bullish sequence. And the close was above the daily trend indicator point (TIP) for the 1st time in 3 days, which means it remains neutral.

Today's TIP (Trend Indicator Point) is 25,980. It will remain neutral unless it closes above 26,241 today.

Daily support is 25,911-25,912. A close below this range would be bearish, whereas a trade below and a close back above is a bullish trigger.

Daily resistance is 26,141-26,142. A close above this range is bullish, whereas a trade above followed by a close back below is a bearish trigger.

Bullish crossover zones remain in effect at 25,563-25,723, 25,147-25,272, 24,665-24,855, 22,955-23,121, 22,066-22,295, 21,748-21,813, 21,660-21,682, 21,554-21,570, 21,474-21,476, 21,279-21,290, 21,059-21,069, 20,967-20,968, 20,595-20,730, 20,310-20,353, 20,076-20,100, 19,928-20,013, 19,677-19,689, 19,277-19,385, 18,982-18,984, 18,899-18,918, 17,940-18,125, 17,780-17,821, 17,483-17,570, and 17,286-17,300.

A bearish crossover zone remains in effect at 26,022-26,324 (that held the high again, and the close). Prices closed above other bearish crossover zones previously at 25,700-25,861, 25,409-25,672, 25,322-25,327, 24,642-24,656, 24,299-24,466, 23,908-23,946, 22,955-23,103, 21,394-21,428, 21,056-21,059, 20,729-20,930, 20,043-20,073, 18,326-18,341, 18,245-18,450, 17,695-17,927, 17,075-17,080 and 16,726-16,764, so these are all support zones now.

Monday's cycle high of 26,241 continues to hold, and stochastics continue to be pointed down (but not below 71% yet), so there is still a possibility of a half-primary cycle low from that high over the next 10 days. However, it closed with a bullish sequence on Friday, which says we could see another new high first, maybe into early next week, since this is the middle of a 2-star critical reversal date (CRD), to be followed by a decline. We are also concerned about the geocosmics in effect this week, which often coincide with very large price swings, in this case I would think down. As stated Friday, *"It's basically on pause, sliding more and more bearish, but not enough yet to rule out a big rally and/or a big decline next week."*

Position traders are long with a stop-loss on a close below 25,400 after taking nice profits on 2/3 so far.

Aggressive traders are still short with a stop-loss based on a close above 26,320 or all three indices making new cycle highs and closing up. Cover 1/3 if prices fall back to 25,700 +/- 60.

Solar-lunar periods coming up (the more *, the more likely a reversal, the more #, the less likely a reversal):

Mar 4	114.1*
Mar 5-7	98.9
Mar 8	127.2*
Mar 11	121.2*
Mar 12-14	114.1*
Mar 15	56.1##

ESH (Mar S&P E-MINI): Friday's close was bullish. The close was back above the daily trend indicator point (TIP) for the 12th time in 13 days, which means it is upgraded back to a trend run up.

Today's TIP (Trend Indicator Point) is 2791.75. It will be downgraded back to neutral if it closes below there today. We expect that to happen within the next 4 sessions.

Daily support is 2789.75-2792.50. A close below this range would be bearish, whereas a trade below and a close back above is a bullish trigger.

Daily resistance is 2814.50-2817.75.

A new bullish crossover zone just formed at 2792.25-2792.50. Others remain in effect at 2718.75-2723.50, 2650.50-2655.75, 2473-2481, 2388.75-2390.50, 2318-2318.50, 2214.50-2219.50, 2087.75-

2115.25, 2044.25-2044.50, 2005-2005.50, 1944.25-1949.25, 1899.25-1900, 1871.75-1875, 1752.50-1753.50, 1657.75-1665.25, 1499.25-1501.25, 1459.25-1460.75, 1436-1447.25, and 1366.75-1370.25.

A bearish crossover zone remains in effect at 2836.75-2876.25. Prices closed above another on Friday at 2746.50-2772.50, and others recently at 2473-2476.50, 2421-2421.50, 2378.50-2392.50, and 1964.25-1966.50, so now these are all support zones.

ESH has started another rally into this March 1-4 CRD zone, +/- 3 trading days, so we are looking for a half-primary cycle crest now, and a sharp decline into a half-primary cycle low, due by March 21.

Position traders are flat and may stand aside.

Aggressive traders are short with a stop-loss to a close above 2814 or 2825, depending on your risk allowance. You may cover 1/3 at 2765 +/- 10 if offered.

NQH (Mar NASDAQ E-MINI): Friday's close was bullish and follows the prior day's bullish trigger, which is also a bullish sequence. The close was back above the daily trend indicator point (TIP) after being below it the prior day, which means it remains neutral.

Today's TIP (Trend Indicator Point) is 7114. It will remain neutral unless it closes above 7168.

Daily support is 7114-7123. A close below this range would be bearish.

Daily resistance is 7181-7189.

Bullish crossover zones remain in effect at 6950.75-6955.75, 6691-6747, 6585.50-6602.50, 6239-6272, 6009-6041, 5823-5835, 5455.50-5483.25, 5130-5131, 4679.75-4741.25, 4466-4476, 4227-4229, 4124-4129, 4031.25-4051.25, 3901-3907, 3686.25-3698.50 and 3563-3576.25.

Bearish crossover zones remain in effect at 7611-7637. Prices closed above others that had previously formed at 6239.25-6243.50, 5863-5900.50, 4625-4628, 4392-4426.50, and 4108-4110.50, so these are all support now.

NQH almost made a new cycle high on Friday, and it closed well, so this is the index most likely to make a new cycle high this week. If so, and one of the others do not, we will have our case of intermarket bearish divergence within a two-star CRD zone, which would be a sell signal.

Position traders are flat and may stand aside.

Aggressive traders are now short with a stop-loss on a close above 7225, and if all three indices make new cycle highs. Cover 1/3 at 7050 +/- 20.

UROH (Mar Euro – The ETF long for this is FXE): Friday's close was neutral with a weak bullish bias. And the close was below the TIP for the 1st time in 5 days, which means it is downgraded back to neutral.

The daily TIP is now at 1.1395. It will be upgraded back to a trend run up if it closes above there today.

Daily support is 1.1344-1.1352.

Daily resistance is 1.1400-1.1408.

Bullish crossover zones remain in effect at 1.1022-1.1053, 1.0752-1.0847, 1.0707-1.0712, and 1.0582-1.0590, so these are all now support. It closed below others recently at 1.1539-1.1549, 1.1615-1.1616, 1.1782-1.180 and 1.2472-1.2480, so these are now resistance.

Bearish crossover zones remain in effect at 1.1427-1.1432, 1.1599-1.1611, 1.1782-1.1801, 1.1935-1.1942, 1.2088-1.2092, 1.2832-1.2841, 1.3080-1.3127, 1.3209-1.3211, 1.3299-1.3302 and 1.3738-1.3743. It closed above another sometime ago at 1.1099-1.1106, so this is also support.

Friday's report stated, *"It has been rallying since February 15 and may have ended that rally today at 1.1437. If so, the test comes now as to whether Feb 15 was a double bottom to the primary cycle low, or*

just a pause that could now be broken to the downside.” It appears to be turning down now, so we will wait and see if it can hold the 1.1261 low of February 15.

Position traders are long with a stop-loss on a close below 1.1261 if the cash index also falls below 1.1213.

Aggressive traders are long with a stop-loss on a close below 1.1261 if the cash index also falls below 1.1213, after covering for a decent profit on the first 1/3 of this trade last week.

JYH (Mar Japanese Yen – CME): Friday’s close was bearish again. And the close was below the TIP for the 3rd consecutive day, which means it is downgraded a full trend run down.

Today’s Trend Indicator Point (TIP) is 89.92. It will be upgraded to neutral if today closes above there.

Daily support is 89.12-89.18.

Daily resistance is 89.72-89.79.

Bullish crossover zones remain in effect at 83.58-83.97, 81.48-81.87 and 80.50-80.52. Prices closed below others recently at 90.69-90.93, 95.14-95.19, and 99.56-99.58, so these are also resistance zones.

Bearish crossover zones remain in effect at 91.11-91.24, 91.86-91.98, 94.82-95.02, 96.11-96.86 and 98.21-98.55. Prices closed above others previously at 83.96-84.06, and 84.74-84.87, so they are now support.

It looks bad, but this is a CRD zone and stochastics are oversold, so a reversal could take place.

Position traders are flat and may stand aside today.

Aggressive traders are flat and may stand aside today.

TYM (June T-Notes): Friday’s close was bearish. And the close was below the TIP for the 3rd consecutive day, which means it is downgraded to a trend run down.

The daily TIP is now at 122/07.5. It will be if it closes down today.

Daily support is 121/13-121/14.5.

Daily resistance is 121/28-121/29.

TYH closed below bullish crossover zones recently (in March contract) at 122/13-122/21, 127-127/02 and 129/12-129/14, so these are all resistance zones now.

Bearish crossover zones remain in effect at 125/24-125/28, 127/06-127/18.5, 129/30-130/01 and 130/25-130/27. It closed above others recently at 119/17-119/19, 118/13-118/14, 118/19-118/20, so these are now support.

We have now fallen the required one full point from the high of Wednesday, February 27, which was a “Sagittarius Factor” Day. And now we are entering the middle of the two-star CRD of March 1-4, so a primary cycle low could be forming here. As stated in the last three reports, *“It is in the midst of its last rally in this older primary cycle, so we anticipate a top in this CRD zone, March 1-4, +/- 3 trading days. These are the Sagittarius Factor days (Tues-Wed), so we look for this to be an isolated high from which prices fall at least one full point....”* The high was 122/22.5, in June, and Friday’s low was 121/17.5.

Position traders are flat and may stand aside.

Aggressive traders are short with a stop-loss on a close above 122/22. Traders were advised, *“Cover 1/3 at 121/12-121/18 if offered.”* Got it. Cover another 1/3 anywhere below 121/20. Cover all and go long at 121/00-121/05 with a stop-loss on a close below 120/27.

BTCH (Mar Bitcoin): Friday’s close was neutral. And the close was above the TIP for the 2nd consecutive day, which means it remains neutral.

The daily TIP is now 3776. It will be upgraded to a trend run up if today's close is up.

Daily support is 3790-3795.

Daily resistance is 3840-3845.

Bullish crossover zones remain in effect at 3602-3735, 3357-3413 and 3215-3327. Prices closed below bullish crossover zones recently at **5952-6415**, 6776-6890, 9245-9363, and 11,263-11,435, so each of these now act as resistance.

Bearish crossover zones remain in effect at 3852-3950, 5187-5373, **5895-6235**, 7177-7240, 8937-8962, and 11,192-11,435.

It continues to trade between the nearest bullish and bearish crossover zones. We are waiting for a break above 4400 to confirm a new bull market is underway. Until then, there is still a danger of breaking 3000.

Position traders are long with a stop-loss on a close below 1300 and may add on with a break above 4400.

Aggressive traders are long with a stop-loss on a close below 2900. If it breaks down below 3120, then it's bearish until the primary cycle ends.

GCJ (Apr Gold): Friday's close was bearish again. And the close was below the daily trend indicator point for the 6th time in 7 days, which means it remains in a trend run down.

The daily trend indicator point is now at 1314.40. It will be upgraded back to neutral if it closes above there.

Daily support is 1281.90-1285.

Daily resistance is 1307.10-1310.20.

Bullish crossover zones remain in effect at 1284.20-1290.20, 1263.60-1265.50, 1169.60-1169.80, 1146-1150 and 1063.30-1065.30. These are support zones.

A new bearish crossover zone just formed at 1307.10-1308.10. Others remain in effect at 1336.50-1337.40, 1356.70-1359, 1522-1553, 1573.20-1574.90, 1590.20-1596.40, 1662-1664, 1677.80-1680, 1692.50-1693 and 1712-1714.40. It closed above another recently at 1287.30-1288.30, so this is also a support zone.

Gold fell hard on Friday, down to 1291.30, and closed at 1294.50. But this is a CRD two-star reversal zone and we are hitting our price targets for a primary cycle low. As stated Friday, "*Stochastics are pointed straight down. I think it is falling to its primary cycle low, due by March 18, around either 1300 or 1280.*"

Position traders are long with a stop-loss up to a close below 1250 after taking nice profits on 2/3 and then buying back at last week's low and then taking another 2/3 profit on these new positions last week. We will buy back at 1275 +/- 10 if offered.

Aggressive traders are now short with a stop-loss on a close above 1345. Traders were advised, "*Cover 1/3 at 1305 +/- 6, Cover all and go long at 1280 +/- 10 if offered.*" We go the first part off. Let's cover all at 1275 +/- 10 and go long with a stop-loss on a close below 1250 to start.

The following solar/lunar days are from our studies published in The Gold Book: Solar-Lunar Reversal Keys for Trading Gold. (These are the lunar cycles for the next two weeks, per these initial studies). These numbers represent potential for reversal, where anything above 114 has a high probability of an isolated top or bottom to trade opposite of, for a 3% or 4% reversal. Use if either are highlighted. * represents a strong reversal possibility. The more * the stronger it is. # represents a low likelihood for a reversal. The more #, the less likely a reversal or big range day.

The solar-lunar cycles for Gold for the next few days are as follows:

	Reversal 4%	Reversal 3%	Big Range Day
Feb 28-Mar 1	140.3**	181.1***	85.4
Mar 4	69.1#	122.7*	72.2# more often a low
Mar 5-7	49.8###	42.8###	126.8*
Mar 8	84.0	86.7	70.1# more often a high, if anything
Mar 11	114.5*	116.1*	113.8
Mar 12-14	66.2#	74.8#	69.2# if anything, tends to a low)
Mar 15	103.7	89.2	96.2

GLD: Position traders are long with a stop-loss on a close below 118.50 after taking the first 2/3 profit recently.

Aggressive traders are short with a stop-loss on a close above 127.30. Cover 1/3 at 121.50 +/- .30. Cover all at 119.75 +/- .30 and go long with a stop-loss on a close below 116 or 118.50, depending on your risk allowance.

SIK (May Silver): Friday's close was bearish. The close was also below the daily trend indicator point for the 6th time in 7 days, which means it remains in a trend run down.

The daily trend indicator point is now at 1563. It will be upgraded back to neutral if it closes above there today.

Daily support is 1497-1504

Daily resistance is 1547-1554.

Bullish crossover zones remain in effect at 1362-1364, 1295-1296, 1121-1154, 1061-1085 and 961-980. It closed below another Friday at 1540-1552, so that becomes resistance now.

A new bearish crossover zone just formed at 1547-1555. Others remain in effect at 1698-1700, 1842.50-1861, 2010-2015, 2073-2090, 2127-2142, 2238-2239, 2251-2281, 2438-2515, 2677-2738, 3196-3206, 3347-3348.50, 3792-3918, and 4700-4725. It closed above others recently at 1479-1499 and 1517-1525, so these are now support. The latter held Friday's low at 1516.50.

Our bias remains that Silver could fall to 1475 +/- 20 (basis March; May is 9 cents higher) by March 21, and we would buy there.

Position traders are long with a stop-loss on a close below 1380 after covering 2/3 for a nice profit so far. Rebuy at 1475 +/- 20 if offered.

Aggressive traders are short with a stop-loss on a close above 1620 after covering 2/3 for a nice profit so far. Cover and reverse to the long side on a decline 1475- +/- 20, with a stop-loss on a close below 1400 to start with.

The solar-lunar cycles for the next few days are as follows (first column is reversal probability and second column is probability of a 2% or greater trading range for the day). The more *, the more likely a reversal or big range day. The more #, the less likely a reversal or big range day.

Mar 4	61.5##	83.6	
Mar 5-7	120.5*	130.9*	more often a low
Mar 8	128.5*	87.3	
Mar 11	131.4*	124.9*	
Mar 12-14	90.3	49.1	more often a low
Mar 15	52.9##	95.8	

SLV: Position traders are long with a stop-loss on a close below 12.50 or 14.25, depending on your risk allowance, after covering 2/3 for profit so far.

Aggressive traders are short with a stop-loss based on March Silver closing above 1525. Cover at 13.85 +/- .20 and go long with a stop-loss on a close below 13.00.

ANNOUNCEMENTS

NOTE 1: Mark Your Calendars and Save the Date! On April 4, 6:30 PM, EDT, we are going to offer a webinar to subscribers on “How to Read the Daily and Weekly MMA Reports for Optimal Trading Strategies.” It will be free to subscribers (\$45 to non-subscribers). Presented by Raymond Merriman.

NOTE 2: MMA’S FORECAST 2019 Webinar took place on Saturday, February 9, 2019. It went very well! The MP4 recording of this event will be available on Monday, February 11. This webinar addressed subjects from this year’s Forecast 2019 Book, with updates on financial markets since the book was written in November 2018. Outlooks for the U.S. stock market, Gold and Silver, crude oil, and currencies (including Bitcoin) were discussed, as well as an outlook on cannabis stocks, the new stock sector darling. If you were unable to attend live, you can still receive the MP4 recording now! Cost is \$45.00, and includes the slides of the presentation. You may register via our website at <https://mmacycles.com> > Products > Webinars.

NOTE 3: In December I gave a 2-hour webinar class on **Gold and Silver Long-Term Cycles**, which went extremely well. If you are interested in this class, the cost is \$95 for the MP4 recording, and is now available. Yes, it contains Chinese translation, but that won’t affect the understanding of the material, which comes with a 14-page workbook with illustrations (charts), tables, and slides of the presentation. It is well-worth the cost given where we are right now in the long-term cycles of each. For information, contact MMA at customerservice@mmacycles.com, or call us at 1-800-662-3349 or 1-248-626-3034.

EVENTS

March 9, 2019: 10:30 AM – 4 PM. Nova Southwestern University, 3301 College Ave, Carl DeSantis Bldg, Rm 1124 Knight Auditorium, Ft. Lauderdale, FL. This a 3-4 hour workshop on **“Forecast 2019: An afternoon with Ray Merriman.”** With Jupiter and Neptune in their ruling signs and square to one another, the principle of exaggeration in hopes and fears is present in all walks of life, including the economy, stock market and other financial markets, and politics. This combination only happens every 166-167 years, and this time is quite important because it is followed by the Capricorn Stellium in 2020. In this presentation, Ray will discuss the cosmic set up in 2019 and the "edge of the cliff" ahead in 2020, and what you can do to protect yourself and help others through what could be a turbulent period, but one with excellent investment possibilities as well. To sign up, contact 954-296-1211. \$50, or email directly to ncgrfloridaatlantic@gmail.com.

April 26, 2019, 7 PM: **“Forecasts for Financial Markets and USA Economy and Political Climate: An Evening with Ray Merriman.”** The location of this talk will be Room 9235 at the Naropa Nalanda Campus in Boulder, Colorado, 6287 Arapahoe Road, at the intersection of 63rd and Arapahoe. The cost is \$45 if registered before April 1, and \$55 afterwards. Sponsored by ROMA, the Rocky Mountain Astrological Association. For registration, contact Patti Simmers at 720-989-8822, or via email at patti.simmers@comcast.net. Attendance will be limited to 80 persons. Sign up early.

June 8-16, 2019: **“Geocosmic Correlations to Trading Cycles,” Beijing, China.** A two-weekend intensive Market Trading workshop/retreat with Raymond Merriman. This 32-hour intensive workshop will focus on the primary cycle and its phases – the half-primary, major, and trading cycles - and how to

determine when they are due. Then, we will identify geocosmic signatures – Levels 1, 2, and 3 – as the basis for calculating CRDs (Critical Reversal Dates), to narrow the time band down for an important cycle reversal. Within that time, we will identify and discuss specific technical and charting tools that will further enhance the timing of a major market reversal, and the price target range to look for. In this analysis, we will also explore the use of 60- 30-, and 5-minutes charts for even more accurate entry and exit points. With these tools, we will then construct a daily and/or weekly trading plan, as used in MMA Daily and Weekly Reports, using current market situations. Examples of several markets – including the USA and China stock markets, Gold, and crude oil will be used to illustrate these market timing techniques, with forecasts for the future. The workshop will take place on the weekends of June 8-9 and June 15-16 in Beijing. During the week, participants will have the option of taking tours with other MMA students to exciting areas of China. The cost for this unique and valuable trading retreat is \$4000 (discounts will be available to subscribers of MMA Reports). For further information, please contact MMA at customerservice@mmacycles.com or call 1-248-626-3034 or 1-800-MMA-3349.

Disclaimer and using this information properly: These comments are given to serve as a guideline for traders for each day and/or week. Comments and/or recommendations are based upon prices at end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in directions of comments given, so long as those support/resistance (entrance) areas) look favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy. Futures trading involves risk of large loss as well as large gains, and reader is solely responsible for any actions taken in markets, and neither the author nor publisher assume any responsibility whatsoever for reader's decisions. Futures or options trading are considered high risk.

Information is provided herein with sincere intent, and according to our own studies and methodologies. These reports are provided mainly for “speculators.” By its very nature, “speculation” means “willing to take risk of loss.” Speculators” must be willing to accept the fact that they are going to have losing trades, many more than say “investors.” That is why they are “speculators.” The way “speculators” become profitable is not so much by high percentage of winning trades, but by controlling amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades. MMA’s comments can be of value to both speculators and investors. MMA’s trade recommendations will be of potential value only to speculators.

Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above, it is considered a bullish “trigger”, and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below, it is considered a bearish “trigger, and oftentimes a good sell signal.
