

00:17:31 Rita Perea: Hi Everyone! Hope you are well today!

00:18:38 Matthieu Kaiser: Hi all from rainy Paris ;)

00:18:54 Danica Cordell-Reeh: Telegram or clubhouse for Chat.

00:25:25 Beverly Wells: you left off a page of the quiz

00:25:50 Ray Merriman: Which page Beverly?

00:26:00 Ray Merriman: First or second quiz?

00:26:26 Hui Fang Boo: Second quiz

00:26:30 Beverly Wells: questions 5 through 8 of quiz? 7

00:26:40 Hui Fang Boo: Q5 - 8

00:26:44 Ray Merriman: Let me look

00:27:08 Aiga von Kesselstatt: can't we sign the disclaimer for you and then skip the reading of it to us every time?

00:27:56 Matthieu Kaiser: good idea

00:28:16 Ray Merriman: It is a good idea. If everyone will do so.

00:28:34 Beverly Wells: Ray to clarify, I did not hear Gianni go over questions 5-8 of quiz #7

00:28:56 Ray Merriman: Otherwise we have to state it for every time we meet according to our counsel

00:29:07 Ray Merriman: I am checking it out now

00:29:20 Matthieu Kaiser: I think Beverly's right;

00:29:28 Hui Fang Boo: We are ok to sign the disclaimer

00:29:53 Matthieu Kaiser: also, I'd like to go back on quiz 7 / question 9

00:29:58 Aiga von Kesselstatt: we can ask everyone, we print the disclaimer and mail it to you - maybe you can ask your counsel, if that's possible?

00:31:43 Ray Merriman: Hmmm... I only show 8 questions in lesson 7. Can you copy paste question 9 to me?

00:33:25 Ray Merriman: I will ask Gianni to go over these again. My quiz pages seem different.

00:33:26 Matthieu Kaiser: Sorry I meant quiz 6

00:33:35 Ray Merriman: OK let me look that up.

00:34:40 Ray Merriman: OK. is it when did largest declines occur in 18-year cycles?

00:35:07 Ray Merriman: If so, it was 1842 and 1932

00:35:10 Matthieu Kaiser: yes

00:35:29 Ray Merriman: 1835-1842 lost 80% and 1929-1932 lost 89.5%

00:35:35 Matthieu Kaiser: right

00:35:50 Ray Merriman: Was there a question about it?

00:36:03 Matthieu Kaiser: I think the first one was confused in terms of dates

00:36:30 Matthieu Kaiser: thank you Ray

00:37:07 Ray Merriman: OK. It was 1835-1842. Gianni sometimes talks fast, as he said (Gemini that he is :-))

00:39:52 Matthieu Kaiser: 1814-1829 was mentioned (and written) if I'm right, so the clarification is welcom

00:39:58 Matthieu Kaiser: e

00:40:35 Ray Merriman: Yes, it looks like last 4 questions were not covered in Quiz 7. I will remind Gianni

00:43:36 Lian Handaja: 4 year cycle is 48 months. 1/6 of 48 is 8 mo. Why the range is 36-56?

00:44:56 Ray Merriman: 4-year actually tuned out to be 36-56 months. 80% of cases occurred in that range, so it is actually a 46-month cycle with a 10-month orb.

00:46:08 Ray Merriman: You onky use 1/6 orb when you d not conduct actual studies. When you do an actual study, it may be more or less than 1/6, and so we use the actual over the theoretical

00:47:01 Lian Handaja: Okay. Thanks, Ray

00:48:45 Michael Edmonds: Seems to be a predominance of cycles ending in the second half of the year, particularly Oct, Nov & Dec.... any thoughts on why this might be the case?

00:49:36 Matthieu Kaiser: maybe related to geocosmics?

00:49:47 Ray Merriman: f course :-))

00:51:01 Ray Merriman: Especially if Saturn/Uranus aspect is nearby

01:04:36 Vito Mijal-Pasa: Nasdaq did double more than % 100

01:05:34 Ray Merriman: Correct. Rally has been 109% so far

01:25:30 Victoria Geddes: Isn't it 31-68 months

01:25:34 Wyatt Fellows: isn't the historical range of ALL 4 year cycles 31-68 months?

01:25:54 Ray Merriman: 31-68 onths uses ALL cases. 80% however occurred in thr 36-56 months

01:26:05 Vito Mijal-Pasa: same 36 to 56 months

01:26:43 Vito Mijal-Pasa: 48

01:27:53 Ray Merriman: 46 months +/- 10 months is where 80% of cases occurred

01:28:10 MJ Wetherhead: skipped #9

01:32:42 Konébrahim: What about the last 4year cycle - The last 4year cycle Aug. 2015 to Mar. 2020 was it not a 6 phases as well ?

01:33:17 Vito Mijal-Pasa: so next important long term low we expect to be, more likely in 2023 ?

01:35:14 Wyatt Fellows: 2-27 months

01:35:53 MJ Wetherhead: 2-27

01:36:54 Ray Merriman: we are talking about how many 4-year cycles in an 18-year cycle. So how many 4 year cycles between 1987-2009? 1990, 1994, 2008 and 2009 (although we could say 2006 and 2009). So it could be 4 or 5 depending on whether you consider 2002-2009 to be 1 or 2 4 years cycles - probably two. So that would make five 4-year cycles between 1987-2009

01:38:34 Ray Merriman: Next ideal 4-year low would be in 36-56 months after March 23, 2020

01:40:51 Michael Edmonds: Can you just clarify that?

01:41:18 Michael Edmonds: Decline to 2017 was 42.6?

01:41:28 Michael Edmonds: Decline to 1917 I mean

01:42:47 Michael Edmonds: Sorry, ignore that, I misinterpreted the question

01:43:21 MJ Wetherhead: case 29

01:45:10 Maya Bothe: Nasdaq 18 year cycle started in 2002, right?

01:45:13 Matthieu Kaiser: I'm a bit confused on the last question of this quiz 8

01:45:34 Matthieu Kaiser: maybe you could send the answer after the session to make it clearer?

01:45:40 Ray Merriman: NASDAQ bottom was 2002. Correct

01:45:59 Maya Bothe: thx

01:46:58 Wyatt Fellows: matthew...2009 is more likely 18 year bottom because if it happened in 2002 the first 4 year cycle that formed in 2006 only lasted 8.5%...didn't fall far enough

01:48:37 Matthieu Kaiser: right, thank you Wyatt

01:49:46 Ray Merriman: Actually Maya, looking at the monthly chart of NASDAQ, the low was lower in November 2008, so that would be the actual 18-year cycle low in NASDAQ. Oct 2002 was the Uranus in Aquarius bust part of the cycle. and it was a double bottom to the actual low in Nov 2008

01:50:26 Bryan Stuppy: Isn't 1 to 2 13 months?

01:50:57 Bryan Stuppy: 2- 3 16 months

01:51:00 MJ Wetherhead: wkbk says 13mo 1st phase

01:51:26 Maya Bothe: Okay, interesting. Thank you

01:52:23 Hui Fang Boo: 3-4 18mths

01:53:13 Martha Geiger: Does the double bottom at in 2016 make any difference in the length of the cycle?

01:55:07 Ray Merriman: You have a judgement call: to use the first or second leg of the double bottom.

01:55:49 Ray Merriman: The key is to use the one that best fits the normal range of the greater cycle

02:08:41 Robert Carrigan: We're in trouble across the coming years if the 90 yr cycle is still ahead. Maybe when inflation finally starts to move could be the trigger.

02:11:25 Ray Merriman: Yes, big deal coming up 2026-209 via Nodal cycle which we will cover in Course 2

02:17:25 Maya Bothe: would be interesting to see if an even longer cycle shows up in the future

02:17:36 Robert Carrigan: Thanks for the reminder Ray, about nodal cycle.

02:18:21 Bryan Stuppy: If there are 4 50 week cycles in 4 year cycle, 50 weeks from the low of March 2020 would be first week of March 2021.

02:19:56 Vito Mijal-Pasa: yes Bryan if it turns out perfect , could contract 17 Feb maybe ?

02:20:10 Vito Mijal-Pasa: or Stretch out a little ?

02:21:11 Robert Carrigan: Cheers Ray. Great insight

02:21:29 Abhishek Singh: Thanks Ray

02:22:17 Ray Merriman: Ideal will be 50-week cycle overlapping with 15.5-month cycle in May-June +/- 1 month

02:23:21 Bryan Stuppy: So no big correction until at least April?

02:23:38 Ray Merriman: Can start at any time. Ends in April-June

02:23:45 Bryan Stuppy: ok

02:25:21 Aiga von Kesselstatt: what's your current positioning

02:27:04 Bryan Stuppy: How does the Saturn Uranus Square on 17Feb play into this?

02:27:05 MJ Wetherhead: how are you calculating the orbs when they deviate from the 1/6?

02:27:17 Martha Geiger: Could you line that up on a calendar. Ray?

02:27:26 Rita Perea: YAY! Virgo Rising here too!

02:27:31 Kathleen Hallissey: Lows will go lower

02:28:38 MJ Wetherhead: me too Rita!

02:29:08 Robert Carrigan: Gianni, Ray, are we likely to keep rising into the Saturn/Uranus Sq?

02:30:40 Aiga von Kesselstatt: what about mercury retrograde midterm

02:31:16 Robert Carrigan: Ray, the Saturn/Uranus Sq can override the effects of Mercury Rx?

02:31:23 Bryan Stuppy: What about the first Saturn Uranus exact square? 17 Feb

02:32:08 Rita Perea: @MJ :)

02:33:50 Matthieu Kaiser: technicals look almost overbought on the S&P, with reversing MACD

02:34:35 Robert Carrigan: Matt under mercury rx we don't play important to technicals

02:34:50 Matthieu Kaiser: ok

02:35:35 Matthieu Kaiser: it could be that there is a spike and a sudden drop in these conditions (technicals + Mercury Rx)

02:36:17 Ray Merriman: Yes

02:36:19 MJ Wetherhead: Ray will you be going over all that on your webinar next wkend?

02:36:28 Matthieu Kaiser: what's your take on silver & gold?

02:38:28 Ray Merriman: Yes, next weekend webinar will cover that for sure

02:39:12 Ray Merriman: Would love to see Gold break 1767 for the 31-month cycle low without Silver breaking 24.00

02:39:48 MJ Wetherhead: 2022-2024 does that include Pres cycle?

02:40:15 Robert Carrigan: Nice one Gianni, thanks for sharing your insights on the 1/2 cycle.

02:40:16 Matthieu Kaiser: thanks for that, Ray - hence bullish divergence in this case, going for a rebound afterwards?

02:40:28 Ray Merriman: Yes

02:40:56 Ray Merriman: Pre cycle low is due 2022

02:41:16 Ray Merriman: Probably coincide with 22.5-month cycle low

02:43:15 Bryan Stuppy: Civil war, WWII

02:43:25 Bryan Stuppy: Uranus in Gemini

02:45:02 Bryan Stuppy: Not really—

02:45:39 Robert Carrigan: Banking system too Ray?

02:45:44 Danica Cordell-Reeh: Does that possibly get impacted by the US having its pluto return so could that change from winning to loosing

02:45:48 Bryan Stuppy: Outer planets don't have enough data to have "fall's" and "detriment" or rulers, I think

02:45:55 Ray Merriman: Banking too is possivble

02:46:16 Vito Mijal-Pasa: Would love to see Gold break 1767 for the 31-month cycle low without Silver breaking 24.00

02:46:16 Matthieu Kaiser: Uranus ingress into Gemini in July 2025 will happen right at the end of the Saturn-Neptun cycle

02:46:17 Ray Merriman: I think so too, Bryan

02:47:11 Ray Merriman: and Uranus trine Pluto :-)) soon after

02:47:41 Vito Mijal-Pasa: Looks 1680 mark Ray , Its possible 1724 area but I think you are spot on we ll see the 33.5 month low soon enough . Thanks for the insights !

02:47:50 Matthieu Kaiser: Saturn-Neptune seems to be related to Russia

02:47:57 Vito Mijal-Pasa: Gold I was on about :)

02:48:36 Matthieu Kaiser: end of cycle in Russia in the mid-20s?

02:51:07 Bryan Stuppy: How does the waxing and waning of the Saturn Uranus square figure into inflation? I wonder?

02:51:53 MJ Wetherhead: how does it link to Venus?

02:51:54 Bryan Stuppy: Is this not the first Saturn Uranus waning square since the 1930's depression?

02:51:58 Hui Fang Boo: Which planet rule platinum and what is your view?

02:52:38 Gianni Di Poce: sun - gold

moon -silver

mercury - mercury

venus - copper

mars - iron

Jupiter - tin

Saturn - lead

02:53:07 Gianni Di Poce: not sure on platinum

02:55:31 Hui Fang Boo: Given that platinum is more rare than gold, yet the price of platinum is lower than gold.

02:56:08 Bryan Stuppy: Is MJ long now?

02:56:16 Matthieu Kaiser: Could we find a more Uranus in Taurus name than "Beyond Meat"?... :)

02:56:38 Ray Merriman: :-)) good point

02:57:25 Pouyan Zolfagharnia: Pluto - Platinum?

02:57:44 Gianni Di Poce: pluto plutonium

02:57:48 Gianni Di Poce: Uranus uranium

02:58:26 Matthieu Kaiser: :)

02:58:31 Pouyan Zolfagharnia: I just thought as a tough metal - it might be linked to Pluto?

02:58:50 Bryan Stuppy: Bitcoin hit 40,000 again last night I think

03:00:27 Robert Carrigan: Great discussions Gianni/Ray. Have a beaut week. Bye for now everyone.

03:00:44 Beverly Wells: Thank you Ray and Gianni!

03:00:50 Bryan Stuppy: Thanks everybody!!! Have a great week!!!

03:00:53 Kathleen Hallissey: Have a great week - Thanks!!

03:00:53 Martha Geiger: Awesome discussion, much to take away! Thank you

03:00:53 Matthieu Kaiser: thanks for all

03:00:55 Vito Mijal-Pasa: Have a good week all , thnaks

03:00:58 Rita Perea: Thank you Ray and Gianni!
