

00:25:32 Lian Handaja: I don't think I get the email about the disclaimer.

00:26:25 Merriman Market Analyst: It was in the email with info about the research project, Lian. Did yo get the letter with that info request?

00:26:41 Lian Handaja: No

00:26:50 Din Uppal: Can you please share email with your answers to the quiz

00:27:00 Daniel Ineichen:I didn't get teh email either

00:27:50 Merriman Market Analyst: OK. Alie, kindly send that email again to Daniel and Lian

00:28:07 Daniel Ineichen:dan73@gmx.ch

00:28:13 Daniel Ineichen:Thank you!

00:28:27 Lian Handaja: Thank you.

00:28:38 Merriman Market Analyst: I think quizzes and their answers are on the student portal on MMA' website. Let me check with Alie and Gianni

00:28:56 Beverly Wells: why is the high not April 06?

00:29:14 Hui Fang Boo: Isn't the may 2006 crest a higher crest?

00:30:14 Alie Schneider: Hello, the email about the research project was sent out on Monday titled "MMA2 Course One: Class Four Recording Information". The information was again sent on Thursday in the email titled "MMA2 Course One: Class Five Information"

00:30:22 Eleonore Charrez: me neither

00:31:27 Lian Handaja: Okay. Thanks, Alie

00:31:36 Eleonore Charrez: no need . it's in your email. just didn't read it correctly

00:31:46 Matthieu Kaiser: he's done it already

00:32:01 Matthieu Kaiser: Q&A are on the site

00:32:28 Matthieu Kaiser: on the account pages

00:33:19 Ibrahim Kone: Regarding the research project what are the market we cannot cover? Are they just the markets we discussed during the classes or all markets that MMA covers and if that the case what are they?

00:34:41 Danica Cordell-Reeh: are the chats on the website separately or on the video

00:36:34 Merriman Market Analyst: You can cover any market not covered in MMA's weekly ir monthly reports. You can cover an ICR report or Nikkei report if you wish.

00:37:06 Merriman Market Analyst: Charts are in workbook and on video.

00:37:49 Qinghua Li: what about shanghai stock index, can we do that, I know you cover it in ICR Report, thanks

00:38:55 Pouyan Zolfagharnia: Have the slides changed?

00:39:03 Pouyan Zolfagharnia: I have totally different charts

00:39:10 Hui Fang Boo: Same here

00:39:14 Merriman Market Analyst: Some have and we will sent out shortly.

00:40:01 Merriman Market Analyst: Yes, slides for this course have been changed - updated - and will be sent out after Ulric's presentation

00:42:00 Alie Schneider: Updated slides are available through the MMTA portal, those have been updated for classes 8-12. We will have updated slides for Class 13 later today after Ulric's presentation

00:42:42 Matthieu Kaiser: thank you Alie

00:44:18 Vito Mijal-Pasa: feb 2014

00:45:41 Vito Mijal-Pasa: correcto

00:48:22 Merriman Market Analyst: Yes, you will get this revised slide set later today or tomorrow after Ulric's slides are inserted, plus the revisions you see today.

00:56:00 Eleonore Charrez: could it be that this cycle becomes more important because of QE?

00:57:00 Daniel Ineichen:Johnny, so would you trade the 7.5 cylce and the 50 week cycle repectively or is this just to confirm the counting of the other cycles? what are the cylces you trade the most?

00:57:18 Daniel Ineichen:Giann and not Johnny - don't know why the Name changed...

00:57:58 Ibrahim Kone: 3F was Feb 2014

01:04:32 Ibrahim Kone: Me too

01:06:07 Merriman Market Analyst: WE trade the 15.5-month cycle when we see a case of a half-cycle, as present right now.

01:07:42 Merriman Market Analyst: We trade 50-week cycle if the steepest decline of the whole 50-weeks happens in that time band, but you don't often get a clue as you do when there is an important low at the 32.5-week time band as we have now.

01:08:02 Merriman Market Analyst: Best is when the two overlap (50- week + 15.5-month

01:08:37 BETH WOODY: That is great info!

01:10:35 Merriman Market Analyst: Thank you!

01:16:46 Rita Perea: Thank you for the reminder of cycles, technicals and geocosmics. Very helpful!

01:19:07 Maya Bothe: Which question?

01:19:11 Maya Bothe: the number?

01:19:18 Maya Bothe: Thank you

01:33:49 MJ Wetherhead: is half primary cycle same as major cycle?

01:38:06 Victoria Geddes: Can you also provide the answer to the chart in the workbook?

01:50:04 Merriman Market Analyst: drop your questions here lin chat if you have any!

01:52:21 Irina Erastova: do we have this presentation in our workbooks?

01:53:09 Merriman Market Analyst: You will be receiving updated slides this week

01:53:13 Merriman Market Analyst: Updated workbook too

01:53:32 Irina Erastova: ok, Thank you

01:59:21 Daniel Ineichen:for what cycle intervals you use daily / Weekly / Monthly charts? Is there a rule or you just test all of them?

02:00:27 Vito Mijal-Pasa: Seeing Inverted Head and Shoulders in long term chart and one more low looks like completes that pattern , would you say that Ray ?

02:02:30 Merriman Market Analyst: it depends, Dan. Generally speaking, it's better to use longer-term charts when analyzing longer-term cycles. for example, if you're analyzing a 4-year cycle, monthly cycle is probably your best bet

02:03:15 Merriman Market Analyst: What chart are you referencing specifically, Vito?

02:04:05 Merriman Market Analyst: Is it Yen monthly?

02:04:08 Ibrahim Kone: There is a long term support in the USDJPY at around 101 to 100 so deep below 100 will definitely be perceived by the market a bearish signal

02:05:01 Merriman Market Analyst: A good technical tip for inverted head and shoulders is you want to see the right shoulder be above the left shoulder. It makes it more likely to be a reversal that way. Sometimes, the head/shoulders and inverted ones can unfold as continuation patterns believe it or not

02:05:03 Merriman Market Analyst: Yen mo th charts are usedfor 5.5- and 16.5-yr cycles. weekly can be used for cyclesless than 3 years

02:07:12 Matthieu Kaiser: could Ulric tell us where he got his data from? (I mean the primary source, as this series is obviously a synthetic one given its length)

02:08:23 Merriman Market Analyst: He uses Metastock charts as Ido

02:09:06 Merriman Market Analyst: But let me ask him during his break, because these charts do look a little different

02:09:51 Matthieu Kaiser: ok, thanks - my point was about the primary source (ECB, Reuters, IMF...)

02:10:24 Merriman Market Analyst: Metastock is Reuters-based source

02:10:35 Matthieu Kaiser: all right, thanks

02:11:26 Vito Mijal-Pasa: yes was referring to monthly ray

02:14:09 Merriman Market Analyst: Could be, Vito. Would still need to close above the neckline to confirm the pattern

02:20:55 Rita Perea: What is Ulrich using as a table to put his data into? Just a table in MS Word or a spreadsheet? Or is there a software program that does the calculations?

02:21:27 Eleonore Charrez: most likely excel

02:21:43 Ibrahim Kone: @Rita this is MS Excel I guess

02:21:46 Merriman Market Analyst: We will ask him. I think he uses excel spreadsheets

02:22:19 Rita Perea: Thank you!

02:39:31 Vito Mijal-Pasa: Looks like a Daily Reversal Bullish Bar from the trough You think ?

02:39:55 Vincent Wang: why do you Choose these moving averages

02:40:15 Merriman Market Analyst: moving average length comes from 1/2 the cycle length

02:40:23 Merriman Market Analyst: we will cover that later in the course :-)

02:40:43 Merriman Market Analyst: 1/2 or 1/3 = either can be used

02:41:06 Vito Mijal-Pasa: Thanks Ulrich , Awesome Presentation

02:41:08 Lian Handaja: Thank you, Ulric. Great presentation.

02:41:29 Matthieu Kaiser: very interesting Ulric, many thanks!

02:41:32 Eleonore Charrez: Which moving averages do you use, Ulric ?

02:41:50 Rita Perea: Wonderful presentation. Thank you, Ulric.

02:41:55 Robert Carrigan: Good to see you again Ulric, terrific presentation. Always value your monthly analysis in the monthly report. Thanks for sharing your cycle methods, very insightful. Catch up at a future reunion. Happy trading.

02:42:15 Sandy Enos: Thank you Ulric, very interesting! :)

02:42:39 Maya Bothe: Great work, Ulric

02:43:01 Pouyan Zolfagharnia: Thank tou Ulric, fantastic to see the theory in action. I really enjoyed your application of the methodology - very powerful!

02:43:47 Ibrahim Kone: Thank You Ulric! It is really helping to see the full thought process when it comes to cycle interpretation

02:45:19 Din Uppal: Hi Ulric, Thank you for the session. You mentioned the FTSE100 - how well does the FTSE 100 work using cycles - any patterns emerging ?

02:46:32 Kathleen Hallissey: Very helpful presentation

02:46:52 Wyatt Fellows: 8 year

02:47:05 Wyatt Fellows: 8 year broken into 4 year

02:47:40 Beverly Wells: Sorry I will need to leave soon. How will we begin next week?

02:48:18 Merriman Market Analyst: we will review quizzes 11 & 13

02:48:24 darri murphy: Is Ulrich willing to share/sell the background calculations he created for Excel? The slides were excellent and help make his presentation very expressive and understandable. Thanks so much!

02:48:28 Merriman Market Analyst: in the beginning of next week

02:50:44 Daniel Ineichen:if the 16 year cycle was making the low in Jan 17, isn't the subsequent cycle Looking rather bearish / weak.. I know, it hasn't made a new low but wouldn't we expect a stronger bullish reaction for the first primary cycle of a new long-term cycle?

02:51:56 Abhishek Singh: Awesome Ulric, Many Thanks to Gianni & Ray,

02:52:08 Eleonore Charrez: Many thanks for this excellent course !!!

02:52:25 Abhishek Singh: Thanks & Bye All of You

02:52:43 Kathleen Hallissey: Thank YOU!!

02:52:52 Matthieu Kaiser: could you please ask for the source of the series?

02:55:42 Abhishek Singh: Goldmarketdata.com

02:56:11 Ibrahim Kone: Is that <http://www.chartsrus.com>

02:56:39 Victoria Geddes: Page 87 of the workbook

02:57:00 Matthieu Kaiser: thank you

02:58:46 Robert Carrigan: Great session again, thanks Gianni and Ray. Have a beaut week. Catch you tomorrow on the yearly review webinar.

02:59:51 Rita Perea: Thank you everyone.

02:59:52 Matthieu Kaiser: thank you all

02:59:58 Vito Mijal-Pasa: thany

02:59:59 Vito Mijal-Pasa: ks
