

00:23:49 Vito Mijal-Pasa: Hi All

00:33:24 Matthieu Kaiser: will gold be covered?

00:34:50 Merriman Market Analyst: Next week we will cover Gold in two of the classes I believe

00:35:04 Matthieu Kaiser: thanks

01:09:42 Vito Mijal-Pasa: Doesn't T notes have 9 year cycle in two phase ?

01:10:30 Merriman Market Analyst: So far, no. But it can of course have be according to cycles' theory taught here.

01:11:53 Vito Mijal-Pasa: Strange but thanks Ray

01:15:17 Bryan Stuppy: What does "distribution phase" mean?

01:15:38 Matthieu Kaiser: this saucer top happened during Saturn-Pluto conjunction - pure magic

01:15:57 Bryan Stuppy: Does that means interest rates are going up?

01:16:44 Matthieu Kaiser: we have probably entered a long-term period of rise in bond yields

01:17:35 Merriman Market Analyst: It means a lot of time is spent selling that market, but the sentiment isn't bearish enough to cause it to fall below support. So, it is a rage known as congestion, and the range is near the top. hen it breaks the lower part of the range, the "distribution"r becomes outright selling and bearish. It happens a lot in financial markets making long-term crersts.

01:17:57 Merriman Market Analyst: range not rage

01:34:58 Vito Mijal-Pasa: in commodities there might be Crest cycles Ray ?

01:36:29 Merriman Market Analyst: Not necessariy for commodities only. Maybe currencies and interest rates you will see crest cycles.

01:41:44 Vito Mijal-Pasa: Yes I see, I also was thinking Techs only as well Ray it kinda has those characteristics sharp Crests and round up bottoms ,interesting .

01:42:04 Wyatt Fellows: looks more like a combination pattern

01:46:14 Merriman Market Analyst: Haven't done a study on crest cycles for tech stocks. Might be a research project :-))

01:46:48 Vito Mijal-Pasa: 18 years in Euro ?

01:47:06 Matthieu Kaiser: 16

01:47:19 Vito Mijal-Pasa: yes I think I ll do that for research thanks Ray :)

02:07:43 Matthieu Kaiser: could there be a 12y cycle +- 3y in oil?

02:07:50 Matthieu Kaiser: +-4 sorry

02:12:38 Jeffrey Gibby: Hi everyone.

02:14:00 Martha Geiger: Mercury retrograde has slammed this Aries :)

02:14:32 Merriman Market Analyst: :-))

02:17:43 Wyatt Fellows: yes its the same

02:26:16 Michael Edmonds: Have you done any studies on any difference in subsequent price action following false break low vs a slightly higher secondary low?

02:27:28 Merriman Market Analyst: That too would be a good research study. Haven't done it

02:32:09 Matthieu Kaiser: do you consider Nasdaq for divergences in US stock indices?

02:36:59 Merriman Market Analyst: Yes, but prefer DJIA to S&P - that's more meaningful and reliable.

02:38:19 Victoria Geddes: Why were we looking at PTs for intermarket bullish divergence?

02:40:08 Wyatt Fellows: speaking of divergence...got to like whats happening with gold and silver at the moment then...

02:40:55 Maya Bothe: yes

02:42:29 Matthieu Kaiser: Crystal clear ;-)

02:43:20 Bryan Stuppy: I would like to hear Ray talk about Mercury going direct now and how it might relate to current markets.

02:44:18 Hui Fang Boo: Can we get Ray's view on bitcoin?

02:45:03 Michael Edmonds: Also a comment on Gold... do you think the low in Gold on Friday was the significant 31 mth cycle low that you're looking for?

02:45:10 Maya Bothe: It's interesting that the Dow topped out before S&P / Nasdaq in 2020. The S&P top was Feb 19th. And now, Feb 19th, the Dow Cash made a new ATH, but S&P and Nasdaq did not. Which is the opposite :)

02:45:18 Bryan Stuppy: Thank you

02:45:24 jeff hanus: Ray, do you see 3rd wave of virus in march?

02:45:57 jeff hanus: thank you

02:46:48 Matthieu Kaiser: as for gold, 1764 has held incredibly well given the rise in yields

02:46:53 Hui Fang Boo: Thank you

02:47:30 Ali Alvarado Atias: Ray, we also culminate a 144 month cycle from the 2009 Lows in March 2021, this MP brought a decent correction in 2015, do you have thoughts on this culmination of 144mo? (Linked to the Jupiter Cycle)

02:47:38 Danica Cordell-Reeh: for Bitcoin also what location used, London, Sydney, Van Nuys CA or Tokyo

02:47:40 Michael Edmonds: Thanks

02:49:27 jeff hanus: thank you

02:50:04 Vincent Wang: did you say the us equity is either a 50 week or 6.5 month high and not more than that ?

02:52:20 Barbara Gibbs: Would gold trade beyond \$2200. if the bankers weren't able to hold it down? Is inflation going to take over in the next 6-12 mos.?

02:52:36 Vincent Wang: thanks

02:54:04 Matthieu Kaiser: Fed has committed to letting inflation overshoot ;-)

02:58:56 Irina Erastova: Jeffrey, can you, please, speak a little bit slower,

02:59:33 Danica Cordell-Reeh: agree Irina

03:00:44 Irina Erastova: We have a several ESL students here :)

03:05:46 Eleonore Charrez: it may work with ctrl & mouse roll

03:07:40 Beverly Wells: He may yet answer this question but does MetaStock track crypto currencies at all and which ones if they do?

03:08:37 Eleonore Charrez: I worked for Thomson Reuters, and am tempted to say YES, because MEtastock gets \$the data from refinitiv and refinitiv has probably the longest data existing and on all fiainccial instrumets

03:12:39 Rita Perea: Does Metastock integrate with Galactic Trader?

03:13:55 Ibrahim Koné: Is that a Window and Mac software?or window only?

03:14:21 Merriman Market Analyst: We draw data from Metastock for Galactic trader.

03:14:51 Rita Perea: Thanks Ray! :)

03:14:59 Merriman Market Analyst: I think so but let me ask

03:21:20 Matthieu Kaiser: is it possible to set up alerts in MetaStock?

03:22:07 Daniel Ineichen:Is there an application on a tablet. Can alerts by sent to email?

03:22:48 Lian Handaja: can alert be sent to phone as a text?

03:23:14 Daniel Ineichen:How does the commercial side look like?

03:23:17 Matthieu Kaiser: thank you very much

03:23:18 Rita Perea: Thank you Jeff!

03:23:29 Eleonore Charrez: how much does it cost ?

03:24:26 Martha Geiger: Can I take advantage of the free trial sometime in the future? I don't have the time to learn all the icons, functionality, etc

03:26:14 Victoria Geddes: Prices are all in US\$?

03:26:32 Merriman Market Analyst: US \$

03:26:41 Victoria Geddes: Do you have sales outside the US?

03:26:55 Martha Geiger: Do they have tutorials?

03:27:39 Daniel Ineichen: Is xenith included or and recommended?

03:30:16 Kathleen Hallissey: TY!!

03:30:20 Hui Fang Boo: Thanks

03:30:25 Eleonore Charrez: Many many thanks
