

00:19:56 Danica Cordell-Reeh: anyone else having sound go in and out

00:20:32 Rita Perea: My sound is good.

00:22:11 Merriman Market Analyst: new # - old # / old #

00:23:26 Matthieu Kaiser: what should we do to get the free trial? I have sent an email to Jeff, no reply so far

00:23:43 Beverly Wells: He replied to me promptly~

00:23:48 Daniel Ineichen:whats the difference between galactic trader and far for galactic trader?

00:24:06 Qinghua Li: are we going to learn how to use FAR Galactic in course two

00:24:30 MJ Wetherhead: also metastock.com/merriman3for1 if want the 90 day

00:24:36 Matthieu Kaiser: I'm not sure Jeff's presentation has been uploaded on the site

00:24:42 Matthieu Kaiser: thank you MJ

00:25:15 Matthieu Kaiser: and for one month only?

00:25:26 Merriman Market Analyst: Yes, one month only

00:25:53 Matthieu Kaiser: is not this link for the 3-month trial at the cost of 1 ?

00:26:07 Matthieu Kaiser: I guess there is another link for one month only?

00:27:03 Merriman Market Analyst: That's possible. .I think he did say that. I will have to ask him to clarify. But I am sure it is at least one free 30-day trial, and maybe a 3-month trial for 1 month cost

00:27:20 Matthieu Kaiser: yes I think he spoke of both

00:29:41 MJ Wetherhead:
<https://www.metastock.com/offer/trial/?whc=merriman&pc=eq-Merriman>

00:29:42 Beverly Wells: How often or what percentage of the time do intermarket divergences pan out?

00:31:19 Matthieu Kaiser: thank you MJ, you are of critical help here! ;-)

00:32:25 Merriman Market Analyst: :-))

00:34:44 Eleonore Charrez: Any reason why you don't use the MACD ??

00:35:05 Eleonore Charrez: it's a pretty strong indicator, often confirming the RSI

00:35:31 Merriman Market Analyst: No reason. Just trying to keep it simple as possible. But yes, MACD is a good one to use too

00:36:05 Eleonore Charrez: :) - thanks

00:36:43 Merriman Market Analyst: Agreed. MACD would be my next choice to advise if adding another technical indicator to use

00:39:52 Ibrahim Kone: Why not Exponential MA?

00:40:34 Merriman Market Analyst: I just find the simple moving averages work with cycles best via this method Gianni just outlined

00:42:27 Eleonore Charrez: could you give stop loss examples later on in charts ?

00:44:42 Eleonore Charrez: where would you put stops on the current Dow monthly chart ?

00:44:46 Bryan Stuppy: What will It mean when they cross again?

00:45:10 Eleonore Charrez: crossing means possible change of trend

00:45:20 Eleonore Charrez: if the longer is below the shorter its bullish

00:45:33 Merriman Market Analyst: The use of stop-loss points is more of an art than a science during the last fe yews - since the Cardinal Climax and Great recession of 2007-2009 and advent of HFT (high frequency trading by large traders). Not a simple subject. It depends very much on one's risk allowance, but as analyst, we have to use closing prices and intraday stops.

00:45:44 Eleonore Charrez: if the shorter crosses below the longer its bullish

00:45:53 Eleonore Charrez: sorry bearish

00:46:30 Merriman Market Analyst: Yes, if prices are also below bth moving averages

00:46:32 Eleonore Charrez: thanks Ray !

00:52:02 MJ Wetherhead: so MAs are always in units of days?

00:52:08 Bryan Stuppy: What does it mean that the price was below the MA from Sep up to now?

00:53:55 Merriman Market Analyst: Depends what type of chart and what type of cycle you are using. Daily chart for primary cycles, yet. weekly charts for 50-week and 15.5-month cycles use # of weeks instead fo days to determine moving avg in weeks

00:54:20 MJ Wetherhead: thanks

00:54:53 Merriman Market Analyst: I think prices are above moving averages, no?

00:55:19 Merriman Market Analyst: I will have to go back and see that chart again

00:56:02 Bryan Stuppy: I think it showed prices below the MA. But I would need to see it again.

00:56:54 Beverly Wells: How do you short or do you use Puts?

00:58:27 Bryan Stuppy: Could you describe the bearish oscillator divergence in this Nasdaq chart again?

00:59:14 Merriman Market Analyst: you just put in the order to "sell" when you don't own the stock. But that requires margin. To void that, you buy an ETF the moves inverse to the index or commodity price the ETC is designed for Inverse ETF is like going short that market. The price of an inverse ETC (or "short) etf is like being short that underlying market.

01:00:14 Beverly Wells: Thank you. What do you think of options to short a stock, market etc.

01:02:00 Merriman Market Analyst: Puts do the same, but then yo pay a time premium on top of the stated price.

01:06:39 Daniel Ineichen:well, if you shorted the frist 200 Level you would have been creamed, wouldn't you

01:07:36 Merriman Market Analyst: Sometimes it happens right on that day of the low, but more often, u to seven days later. Best to use at end of a cycle, not the start of s cycle

01:08:23 Bryan Stuppy: How does this relate to interest rates?

01:09:10 Merriman Market Analyst: Which study? RSI, CCI, or stochastic? I use stochastics with T-Notes and it works extremely well with these rules

01:11:09 Eleonore Charrez: most is 70/30 or 80/20

01:12:04 Din Uppal: How well does MA's work for Bitcoin chart

01:12:26 Merriman Market Analyst: pretty good!

01:13:11 Din Uppal: Great, Do you use the same 70/30 for Bitcoin

01:13:52 Matthieu Kaiser: could you repeat your parameters for stochastics?

01:14:26 Merriman Market Analyst: Oh, I tgt you mant moving average

01:15:28 Merriman Market Analyst: 20/80

01:16:24 Din Uppal: Sorry, First question was for MA. Would RSI work for Bitcoin well as the Bitcoin is often on the upper range of RSI

01:17:07 Din Uppal: Thank you!

01:17:45 Matthieu Kaiser: could you just repeat/clarify your parameters for stochastics?

01:18:32 Merriman Market Analyst: 20% and 80%

01:19:47 Matthieu Kaiser: on my charting tool, I have "length", "smoothK" and "smoothD"

01:19:59 Merriman Market Analyst: Below 20% is oversold territory; over 80% is zone for overbought. Really like it better when below 210% and above 90%, and then oscillator divergence right afterwards

01:20:00 Matthieu Kaiser: I suppose "length" is 15 days

01:20:19 Merriman Market Analyst: 3 day and 15-day

01:20:28 Matthieu Kaiser: all right

01:20:30 Matthieu Kaiser: thanks

01:23:16 Beverly Wells: full moon in Virgo

01:23:37 Merriman Market Analyst: Yes. Sun Pisces, Moon Virgo

01:31:22 MJ Wetherhead: Shout out to Ray page 154 of Forecast 2021 ...could indicate an electrical grid failure! We had that here in Texas

01:44:49 Merriman Market Analyst: This is where the real fun begins!

01:49:42 Din Uppal: are we recording

01:49:55 Din Uppal: Just seen it

01:51:34 Din Uppal: yes we are

01:51:35 Beverly Wells: How close to confirmed are we?

01:52:13 Beverly Wells: As the 3rd phase can be truncated?

01:59:45 Beverly Wells: Thank you!

02:03:47 Matthieu Kaiser: why do you use a 37w MA here?

02:04:50 Merriman Market Analyst: I think that's for the 16-17 month cycle, Matthieu

02:05:42 Matthieu Kaiser: ok, thanks

02:07:08 BETH WOODY: Also regarding the cycle possibly coming due soon, Mercury Helio Sagittarius is coming up on March 9th (I think that is the date) .

02:07:35 Merriman Market Analyst: heliocentric mercury in sag is indeed an important transit for metal markets!

02:08:26 Bryan Stuppy: It looks like the MA lines just crossed?

02:08:43 Vincent Wang: great to hear u r still bullish, got stopped out last Friday

02:08:46 Bryan Stuppy: For the first time since Dec 2019?

02:09:59 Merriman Market Analyst: Yes Bryan the MAs did just cross. First time the shorter crossed below the longer since mid-2018

02:10:16 Bryan Stuppy: What does it mean?

02:10:22 Merriman Market Analyst: Notice how that happened months after gold peaked-- MAs crossing are lagging indicator

02:10:33 Merriman Market Analyst: It's a confirmation of the bearish trend in gold

02:10:50 Merriman Market Analyst: It's been making lower-lows and lower-highs since August 2020 peak

02:11:19 Bryan Stuppy: Ok thanks

02:18:57 Rita Perea: Wow- Gianni. \$1550 That's fascinating! Thank you.

02:19:16 Eleonore Charrez: however the CCI is bullish on a short term, daily chart basis

02:20:34 Michael Edmonds: Charlie: when you say a 1x1 angle... do you mean \$1 per 1 day?

02:20:47 Eleonore Charrez: and there are bullish divergences on the RSI , on slow stochastis and on MACD

02:21:09 Merriman Market Analyst: I like 1550-1650 as range for a low

02:22:05 Vincent Wang: great still buy on dip

02:22:49 Kevin Blank: I know it's not the next course, but is there a geocosmic connected to GOLD right now?

02:25:01 MJ Wetherhead: 35

02:26:59 Eleonore Charrez: 25Y

02:27:02 Vito Mijal-Pasa: 23.5 years

02:27:25 Vito Mijal-Pasa: 7.83

02:30:38 Vincent Wang: 1976

02:30:39 Eleonore Charrez: 1999-2001

02:31:11 Din Uppal: Oct 2023

02:31:14 Michael Edmonds: 2015

02:31:18 Vito Mijal-Pasa: 2015

02:31:19 Eleonore Charrez: 2015-2016

02:31:43 Vito Mijal-Pasa: 2023-4

02:33:25 Bryan Stuppy: Aug 2018

02:33:26 Ali Alvarado Atias: APRIL 2021

02:34:47 Ibrahim Koné: So this will be the next PC (for the 31.33 months cycle)

02:34:52 Ibrahim Koné: \$'

02:34:56 Ibrahim Koné: ?

02:37:10 Matthieu Kaiser: have I well understood that we are in the 2d 7.83y phase of the 31.33m cycle?

02:38:06 Merriman Market Analyst: Matthieu do you mean we are in the 2nd 31.33 month phase within the 7.83 year cycle? Then yes

02:38:28 Matthieu Kaiser: yes, that's it - thanks

02:38:39 Danica Cordell-Reeh: can a summary be written of these cycles and sub cycles. getting lost with all the dates and numbers

02:40:48 Eleonore Charrez: also with Ray's presentation, I suppose, given that we have the "old" presentation with the slightly longer cycle ?

02:41:11 Martha Geiger: I missed the Monday study hour info. Can you repeat?

02:41:13 MJ Wetherhead: are the cycles the same Lesson 19, not revised like longer term ones?

02:41:37 Matthieu Kaiser: I won't be able to attend the Q&A session on Monday

02:41:52 Kathleen Hallissey: Monday study period?

02:42:26 Kathleen Hallissey: Thank you

02:43:00 Eleonore Charrez: is the exam a multiple choice ? and/or writing ?

02:43:03 Michael Edmonds: Are the exam questions going to be similar to the quiz questions, or will they be more complex?

02:43:12 Merriman Market Analyst: exam is all multiple choice

02:43:32 Michael Edmonds: 1

02:43:32 Wyatt Fellows: 1

02:43:33 Kathleen Hallissey: yes

02:43:39 Eleonore Charrez: thks

02:43:42 Rita Perea: Gianni, will the Monday study session be recorded for those who can't attend?

02:43:50 Merriman Market Analyst: Yes we will record the study session

02:43:58 Rita Perea: Thank you.

02:45:15 Merriman Market Analyst: Exam is 100 questions all multiple choice.

02:45:16 Vincent Wang: yes

02:45:34 Eleonore Charrez: Many many thanks !!!!

02:45:55 Vincent Wang: passing mark for exam - 50?

02:45:55 Rita Perea: Thank you Ray and Gianni! Great session today. Fascinating information.

02:46:16 Eleonore Charrez: are we allowed to use the docs ?

02:46:18 Barbara Gibbs: Thank you both.

02:46:29 Ali Alvarado Atias: Thank You Ray and Gianni, excellent Material

02:46:31 Hui Fang Boo: Thank you

02:46:59 Sandy Enos: Thank you so much everyone!

02:47:09 Abhishek Singh: Thank You Ray & Gianni & Everyone

02:47:20 Eleonore Charrez: Many thanks for this fascinating 1st module !!!

02:47:31 Vincent Wang: time is fixed 2 hours? after that exam shut down ?

02:47:41 Eleonore Charrez: looking forward to module 2 !!!

02:47:54 Martha Geiger: Did you send the research paper instructions out to individuals?

02:48:13 Vincent Wang: thanks

02:48:33 Matthieu Kaiser: can you give a bit more details on what you expect for the research project?

02:48:45 Matthieu Kaiser: in what details do you want us to go,

02:49:12 MJ Wetherhead: it's also on the MMTA page (research paper info)

02:49:18 Matthieu Kaiser: ok

02:49:46 MJ Wetherhead: no I'm wrong, that

02:49:53 MJ Wetherhead: is just the teams list

02:50:17 Danica Cordell-Reeh: weekly basis

02:51:16 Martha Geiger: OK- I get the overview of the project here- where can I find the details

02:51:35 Matthieu Kaiser: do you expect any frequency of standard range?

02:52:16 Ali Alvarado Atias: So the 4 yr Cycle Sample could be used as a model for the Research Project?

02:52:58 MJ Wetherhead: <https://files.constantcontact.com/6c600f5f201/cb54f1b7-23e8-440f-9c8b-d4bba82547fc.pdf>

02:53:14 MJ Wetherhead: that might link to research paper inf ???

02:53:21 Merriman Market Analyst: That is correct MJ, thank you!

02:53:28 Matthieu Kaiser: thanks

02:54:41 Martha Geiger: Thank you MJ

02:54:54 Ali Alvarado Atias: Ok!

02:55:02 Ali Alvarado Atias: Tnx

02:57:09 Vito Mijal-Pasa: thanks

02:57:18 Lian Handaja: Thank you

02:57:20 MJ Wetherhead: thank you

02:57:24 Bryan Stuppy: Thanks! Great experience!

02:57:27 shanna forlano: thank you

02:57:29 Michelle Picard: Thank you. Great course!

02:57:30 Jonathan Ryall: Thanks Gianni and Ray

02:57:30 Yating Hu: Thank you!

02:57:33 Kathleen Hallissey: Thank you!!

02:57:33 Ali Alvarado Atias: Thanks All

02:57:37 Matthieu Kaiser: thank you very much

02:57:38 Martha Geiger: See ya

02:57:38 Din Uppal: Thank you so much

02:57:43 BETH WOODY: Thanks

02:57:43 Ibrahim Koné: Super Thank you for the first course

02:57:50 Daniel Ineichen: thanks, today was great
