

00:26:16 Eleonore Charrez: Gianni : it's a pleasure to hear you talk, so thta's not a problem :)

00:26:37 Merriman Market Analyst: True :-))

00:27:32 Merriman Market Analyst: I want to see if some students have speaking abiality as well for the future of MMTA and our Investment retreats

00:33:16 Irina Erastova: Jianni can you name ones again this channel, please

00:33:54 Eleonore Charrez: Me with pleasure ! When I am not listening to you and Giani, I deliver classes (on all kind of stuff, such as behavioural finance), so most happy to speak, if I may have anything interesting to say.

00:40:05 Martha Geiger: Is there a list of the signs and the things they govern anywhere in our material?

00:41:26 Merriman Market Analyst: Was it not in Lesson 1? If not, it is covered in the appendices of the Book "Basic Principles of Geocosmic Studies to Financial Market Timing"

00:46:30 Martha Geiger: Ray- Do you mean course one, or lesson one of course two?

00:48:21 Kevin Blank: 10 months later than last date it's within 1 degree of orb

00:48:42 Kevin Blank: Oct 2022 Sat Sq Uranus with 1 degree

00:48:48 Kevin Blank: within

00:49:20 Merriman Market Analyst: Lesson 1 of Crouse 2. Was it not there? If not, I have to look, but it should be in this course or next course I think. Or, I can create a link for everyone to have this book in PDF format.

00:49:32 Martha Geiger: I'll check.

00:52:16 Martha Geiger: Don't see it in module on of the workbook

00:53:15 Merriman Market Analyst: Let me check Course 3

00:55:22 BETH WOODY: I believe on the mmcycle website is the MMTA Introductory Course on the basic principles of Geocosmic Studies

01:07:48 Merriman Market Analyst: I will check with Alie and Jacque and see if they have it on their computers, next week

01:08:30 Hui Fang Boo: Thanks

01:15:20 Martha Geiger: Page 96 is a very good list.

01:15:34 Martha Geiger: Thanks MJ

01:25:00 Merriman Market Analyst: Pg 96 of what, Martha? Thanks

01:25:35 Matthieu Kaiser: Course 2 workbook

01:25:57 Martha Geiger: The workbook for course two. Module 16- thanks to MJ for finding it.

01:26:05 Merriman Market Analyst: YRES!V That is it! Thank you!

01:26:08 Matthieu Kaiser: indeed

01:26:32 MJ Wetherhead: your welcome

01:26:37 MJ Wetherhead: you're

01:27:10 Ibrahim Kone: Page 24 of the side deck of Lesson 10 is not readable table are overlapping

01:28:03 Matthieu Kaiser: you're right Gianni, all the more so since Saturn will be in its fall

01:28:37 Merriman Market Analyst: Ibrahim, do you mean the power pojnt slides?

01:29:10 Martha Geiger: That's correct, Ray

01:29:56 Merriman Market Analyst: OK. Thank you. We will try to correct this. Don't know if Gianni can do it today

01:29:59 Martha Geiger: Although I don't see page numbers. The slide regarding oddity is duplicated

01:30:02 Ibrahim Kone: Yes on the power point

01:32:26 Matthieu Kaiser: slide 24

01:32:33 Matthieu Kaiser: (page number in pdf)

01:34:31 Hui Fang Boo: Thanks, MJ

01:35:10 Martha Geiger: SLIDE

01:35:12 Matthieu Kaiser: it's in the ppt presentation

01:35:51 Martha Geiger: Typing on top of other type

01:42:37 Pouyan Zolfagharnia: or even monthly

01:43:13 Merriman Market Analyst: Do you use metastock by chance?

01:43:40 Danica Cordell-Reeh: No

01:43:55 Pouyan Zolfagharnia: No I stopped it after the free period. I didn't find it very user-friendly

01:44:33 Merriman Market Analyst: Ok-- it takes time to get used to LOL fair enough. They have a downloader feature, but I can try to get some dow data from stockcharts. Let me check real quick

01:44:34 Lian Handaja: Agree. I found it hard to use, too and not enough time to learn in 30 days.

01:45:51 Merriman Market Analyst: Pouyan-- stockcharts data when I put it in excel format only lets me download to 1990...

01:46:08 Pouyan Zolfagharnia: yeah that's the issue I had too

01:46:30 Pouyan Zolfagharnia: I thought I just couldn't use it properly :o)

01:46:34 Merriman Market Analyst: I'd imagine you don't want to go through each bar or candlestick to get the data... I wouldn't want to either!

01:47:01 Pouyan Zolfagharnia: Ebe

01:47:19 Hui Fang Boo: Same feelings here abt Metastock

01:47:54 Merriman Market Analyst: I mentioned metastock because they have a "downloader" which makes that very easy to do

02:00:09 Eleonore Charrez: can you help us to find out teams ???

02:01:18 Irina Erastova: I am intresting in Silver

02:04:41 Martha Geiger: How far back do Stockchart stocks go? (not excel)

02:04:52 Merriman Market Analyst: Yes, drop a note to Gianni to help you form teams.

02:05:03 Merriman Market Analyst: Great iraniam. Anyone else interested in Silver?

02:05:26 MJ Wetherhead: I am

02:05:33 Hui Fang Boo: I'm keen on silver too

02:06:52 Pouyan Zolfagharnia: I'm keen on the European markets (DAX, FTSE etc)

02:07:14 Ibrahim Kone: I am also keen in Silver as well as of the Dax

02:09:03 QINGHUA LI: I am interested in Shanghai stock markets

02:09:03 Hui Fang Boo: Silver and asian markets for me

02:10:11 Matthieu Kaiser: Do we have to apply now to the research project topics?

02:10:35 Merriman Market Analyst: Surprised to hear about Metastock being non-user friendly. That is the one feature I like about Metastock compared to other market software programs I have used in the past. For me, it is very user friendly. Yes, there is a learning curve, but that's the case with all software programs. But the hardest part of Metastock, I think, is finding the symbol to markets you want to use. But you can just make a list and call or email them if you get stuck. Eventually it all becomes familiar and easy to use.

02:11:32 Kevin Blank: Almost entering this range??? Since it move backwards?

02:11:46 MJ Wetherhead: In the ephemeris, do we use the true NN or the mean NN?

02:11:48 Merriman Market Analyst: Yes, Nodes move backwards

02:12:04 Kevin Blank: So we haven't entered that range we are ABOUT too

02:12:07 Pouyan Zolfagharnia: I found TradeView was a lot more intuitive and provided the same data and features for free!

02:12:15 Merriman Market Analyst: These studies are based on mean nodes

02:13:04 MJ Wetherhead: thank you

02:13:05 Martha Geiger: How far back does Tradeview charts extend?

02:13:39 Pouyan Zolfagharnia: The TradeView charts went as far back as the MetaStock data

02:14:00 Merriman Market Analyst: Maybe they have improved a lot since I looked into them, which was a few years ago. But if free, then that is great! Use it for sure! I had problems using their charts for the newsletters I write. Metastock was superior to all other charting software for my needs as an analyst providing charts for clients.

02:15:02 Martha Geiger: Is that Oanda Trading Vlew?

02:15:46 Danica Cordell-Reeh: Used yahoo for data on the VIX. Easy download

02:17:03 Pouyan Zolfagharnia: Danica the only issue I have faced with yao is that their data doesn't go back that far :o(

02:17:51 Martha Geiger: Danica, I have a yahoo app on my phone. Very limited. Is there a more complete version?

02:17:58 Eleonore Charrez: Well there are in addition loads of studies comparing currently with 1929 . huge number of IPOs (E&Y IPO studies) added with SPACs, huge speculation with many newcomers to the market, one retail person killed, 2 more in.. etdc.

02:18:39 Danica Cordell-Reeh: Martha I used web based on my laptop

02:19:11 Sandy Enos: Interesting that the March 2020 market crash found the N Node @ 4 Cancer and 911 also found the N Node @ 3 Cancer.

02:19:13 Pouyan Zolfagharnia: Martha, this is the site: <https://www.tradingview.com/> once you login in, it will save all the charts you work on.

02:19:38 Danica Cordell-Reeh: Anyone use something other than solar fire? It does not work if iCloud or one drive being used. Needs updating

02:20:02 MJ Wetherhead: Sector 3 and 1 overlap 1-4 Aries?

02:20:07 Hui Fang Boo: I'm using astro gold on mac

02:20:09 Danica Cordell-Reeh: Sandy Enos thanks

02:20:24 Eleonore Charrez: I bought Janus Light (Ray had suggested it last week). the light is not expensif, easy to use

02:20:31 kathleen Hallissey: You can try Astro Gold

02:20:38 Sandy Enos: You're welcome Danica.

02:21:57 kathleen Hallissey: AstroGold can be used on Mac, iPad, probably phone too. And possibly windows.

02:23:05 Danica Cordell-Reeh: Astro Gold is great on iPad and Mac.

02:23:18 kathleen Hallissey: Yes Iphone

02:23:34 Ibrahim Kone: Astro Gold is Mac version of Solar Fire. There is also another Mac tool called iphemeris available on Mac OS, iPad and iphone

02:23:57 Martha Geiger: So Astro Gold doesn't work in Windows?

02:24:09 Eleonore Charrez: north node is in gemini... isn't it ?

02:25:14 Ibrahim Kone: No astro gold does not exist on windows but you have solar fire (which is astro gold is a version of specifically for Mac's)

02:25:47 Danica Cordell-Reeh: On pc used StarTrax Millennium. Or ZET.

02:25:49 kathleen Hallissey: Astro golds 39.99

02:26:15 Martha Geiger: Thanks. I think I'll look at the Janas. and thank you Danica-haven't heard of those.

02:26:15 Hui Fang Boo: The iOS version of astro gold does not offer transit to transit dynamic listing

02:26:28 Hui Fang Boo: Only the desktop version has that feature

02:26:54 Eleonore Charrez: When does the north node move from gemini to cancer ?

02:27:03 Sandy Enos: Yes, that's right Hui, good to point out.

02:28:21 Sandy Enos: We've already passed the transit of N Node through Cancer for now, Eleonore.

02:28:49 Lian Handaja: can 2 teams study the same market on the 2nd research project?

02:29:16 QINGHUA LI: are we gonna talk about FAR today

02:29:24 Merriman Market Analyst: Yes, the difference in these astro programs is largely their ability to enhance/conduct research studies

02:29:36 Eleonore Charrez: Ahhh... right that's way you said, I got the direction wrong

02:29:40 Eleonore Charrez: thanks

02:29:41 Sandy Enos: You're welcome, Gianni.

02:29:51 Danica Cordell-Reeh: Silver seems to be popular

02:31:34 Eleonore Charrez: What's the FAR Website ?

02:31:39 Sandy Enos: I would love to see more students join the MMTA2 Facebook group, it's a great source to solve some of our 'software' issues that some of us are still on the fence about.

02:32:00 Martha Geiger: I could never get to the FB group-tried both the name and the email.

02:32:09 Lian Handaja: I couldn't find the FB group in search

02:32:11 Daniel Ineichen:Ray, what is Galactic trader exactly? Something like Metastock? Would FAR work on Metastock?

02:32:19 Eleonore Charrez: Ah, so it's galctic trader ? with FAR ?

02:32:42 Hui Fang Boo: Ray, can we import data manually into FAR using cab format?

02:32:50 Hui Fang Boo: *CSV

02:32:51 MJ Wetherhead: Martha, search on the name MMTA2 student group. My name on FB is MJ Conway (sorry I didn't straighten that out earlier).

02:32:57 Merriman Market Analyst: MJ-- what is the exact name of the facebook group? Martha, you can reach out to her as she is admin of the class

02:32:59 Merriman Market Analyst: thank you MJ

02:33:08 Merriman Market Analyst: admin of the group*

02:33:16 Lian Handaja: I did, MJ.

02:34:19 MJ Wetherhead: Please email me team.azuri@gmail.com

02:34:24 Lian Handaja: I'll search your name and maybe I can join that way.

02:34:29 Lian Handaja: okay. will do.

02:34:40 Merriman Market Analyst: Dan, FAR/Galactic Trader are basically the same thing. It can use metastock to obtain price data

02:34:48 MJ Wetherhead: MMTA2 Student Group

02:34:53 Merriman Market Analyst: FAR for the Galactic Trader is on screen now

02:35:20 Merriman Market Analyst: correct Eleonore

02:35:54 Eleonore Charrez: thanns !

02:36:08 Vito Mijal-Pasa: Please Show the planetary lines Ray it will be quite fascinating for some who is not familiar with the program thanks

02:36:18 Eleonore Charrez: For the FB Group, I just checked but didn't find a MMTA2 student group..

02:36:43 Martha Geiger: There are so many options-what functions does FAR provide that others don't, or what other software would compare to this-

02:37:42 Matthieu Kaiser: is there an export function allowing to get the data in excel to work on them?

02:38:49 Danica Cordell-Reeh: Could not find FB group

02:39:18 Martha Geiger: Is the north node found in an ephemeris? If not, where would I look?

02:39:29 MJ Wetherhead: Eleanor, please email me team.azuri@gmail.com We'll sort it out

02:39:36 Merriman Market Analyst: North Node should visible in ephemeris

02:40:51 Martha Geiger: is it the quarter moon sign? both 12 noon and midnight?

02:42:07 Hui Fang Boo: Does the FAR sw include crypto market?

02:43:49 Danica Cordell-Reeh: Have we studied the basis of what the level 1,2 and 3 aspects are

02:44:17 BETH WOODY: not yet.

02:46:49 Merriman Market Analyst: Beth is correct, we will learn that soon :-)

02:47:15 Sandy Enos: Interesting to note that the recent Venus/Uranus conjunction and Mars ingress into Cancer, the psychedelic stocks took off again, after it seems, they had a 3 month drought, and cryptos came off their run up.

02:48:15 Pouyan Zolfagharnia: wow Saturn was 22% in Virgo!!

02:48:46 Martha Geiger: Sandy- what do you mean by psychedelic stocks?

02:49:46 Pouyan Zolfagharnia: And Jupiter in Aqu 128% which is where we are now!!

02:51:00 Sandy Enos: Interesting that Venus and Uranus in Taurus speaks very much of a 'change in direction' of 'innovative and trending' stocks like Cryptos and Psychedelics/Cannabis.

02:51:55 Sandy Enos: Martha, psychedelics stocks became 'a thing' with Uranus in Taurus, I like to watch them.

02:52:32 Irina Erastova: It will be good to have step by step guide for FAR

02:53:14 Martha Geiger: I see the connection of psychedelic to cannabis. Thanks. Irina-my thoughts exactly. You need a tutorial.

03:02:58 Martha Geiger: Ray- Do you think this would be valuable for long term or buy and hold investing

03:04:03 Martha Geiger: it relates to the ephemeris

03:04:42 Martha Geiger: Gianni- my question about the moon-asking how I find the north node in the ephemeris.

03:05:06 Merriman Market Analyst: north node glyph looks like Greek omega symbol

03:05:21 Hui Fang Boo: When Ray updates the research data for FAR, will we be notified of the updates as well?

03:07:10 Hui Fang Boo: Thanks

03:07:16 Sandy Enos: Bitcoin will have a Jupiter/Venus conjunction in mid May, I believe, and Uranus trine its Sun in June...

03:07:35 Merriman Market Analyst: Sandy, are you referring to BTC natal chart?

03:08:21 Sandy Enos: Sorry! Yes, that is correct.

03:08:45 Merriman Market Analyst: Jupiter conjunct Venus would seem to be bullish!

03:09:24 Sandy Enos: Yes! That's what me thinks too, lol!

03:09:40 Sandy Enos: Well, we hope..

03:09:59 Merriman Market Analyst: I like it so long as it doesn't close below 51k short-term

03:10:11 Merriman Market Analyst: If that breaks we could see a drop to mid 40s but 51k holding well so far

03:10:30 Merriman Market Analyst: BTC close below 45k would be bearish but doubt that'll happen

03:10:36 Sandy Enos: Yes, which wouldn't that be a great buy in?!

03:10:55 Matthieu Kaiser: thanks a lot

03:10:57 kathleen Hallissey: Thank You!!

03:10:59 Eleonore Charrez: Thanks !
