This lesson examines the movement of Uranus through the signs of the zodiac and its correlation with long-term cycles in stock markets, with special emphasis upon the U.S. and British stock markets

In this lesson, we will cover the following topics:

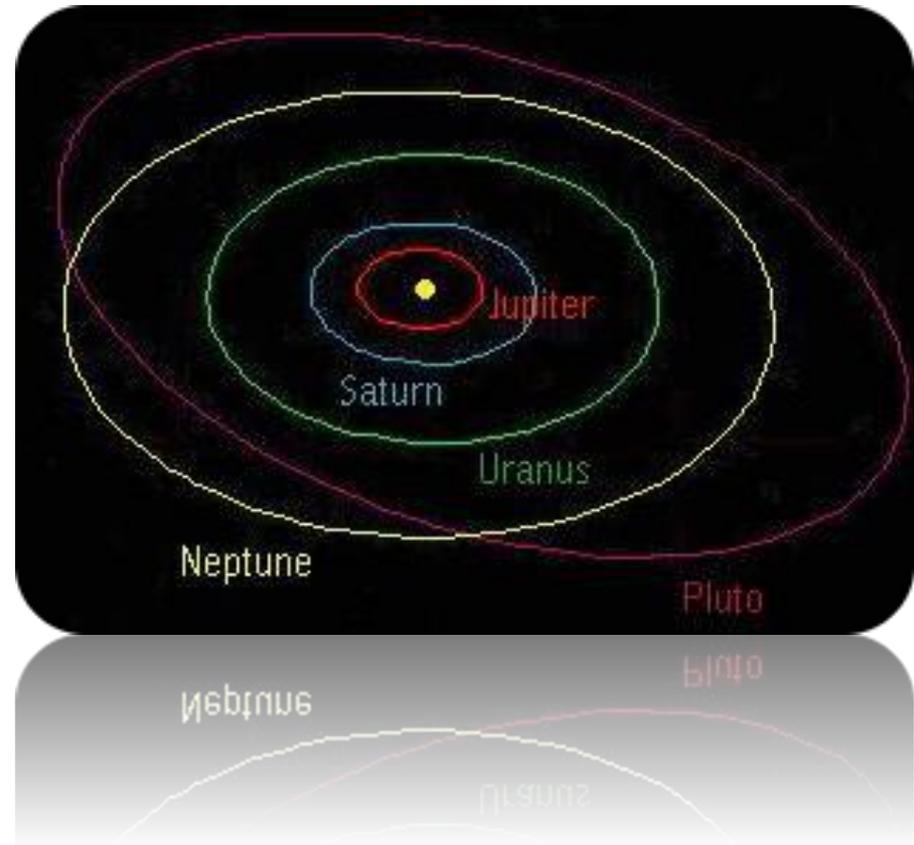

Applying the steps from Lesson 5 and 6 to find a correlation between Uranus's sign position and long-term stock market cycles

The long-term stock market chart divided by Uranus in signs

Correlations of Uranus by sign and degrees to long-term stock market cycles

THE URANUS EFFECT

- Uranus's orbital cycle around the Sun lasts 84 years
- Three orbits of Uranus equals one Pluto cycle (248 years) and two orbits of Uranus is close to a Neptune cycle (164 years)
- The movement of Uranus through the zodiac is fairly constant. It spends approximately seven years in each sign of the zodiac

➡ Please refer to Lesson 4, or the book titled “Tables of Planetary Phenomena,” by Neil Michelsen, for the time bands of Uranus in each sign

The following tables show the sign and position (by nearest degree) of Uranus at the long-term 72- or 90-year cycle troughs and crests, as well as their secondary lows

INITIAL LONG-TERM LOWS AND THEIR CRESTS

START (LOW)

1.) *July 1, 1762*

73 years

END (CREST)

May 15, 1835

Uranus 13° Aries

Uranus 0° Pisces

2.) *February 15, 1842*

87 years

September 3, 1929

Uranus 23° Pisces

Uranus 10° Aries

INITIAL LONG-TERM LOWS AND THEIR CRESTS

START (LOW)

3.) *July 8, 1932*

Uranus 23° Aries

75 years

END (CREST)

October 11, 2007

Uranus 15° Pisces

4.) *March 9, 2009*

73-87 years after low

Crest due 2082-2096

Uranus 22° Pisces

Uranus Capricorn- Aries

SECONDARY LOWS TO FIRST LONG-TERM CYCLE CRESTS

START (LOW)

1 A.) July 1, 1784

Uranus 12° Cancer

END (CREST)

May 15, 1835

Uranus 0° Pisces

51 years

2 A.) October 15, 1857

Uranus 27° Taurus

September 3, 1929

Uranus 10° Aries

72 years

SECONDARY LOWS TO FIRST LONG-TERM CYCLE CRESTS

START (LOW)

4 A.) March 23, 2020

END (CREST)

*Crest due 51-72 years
after secondary trough*

Uranus

4°

Taurus

From these tables, one can observe several possible correlations between Uranus's zodiacal position and long-term cycle troughs and crests in U.S. stocks, as well as their secondary bottoms

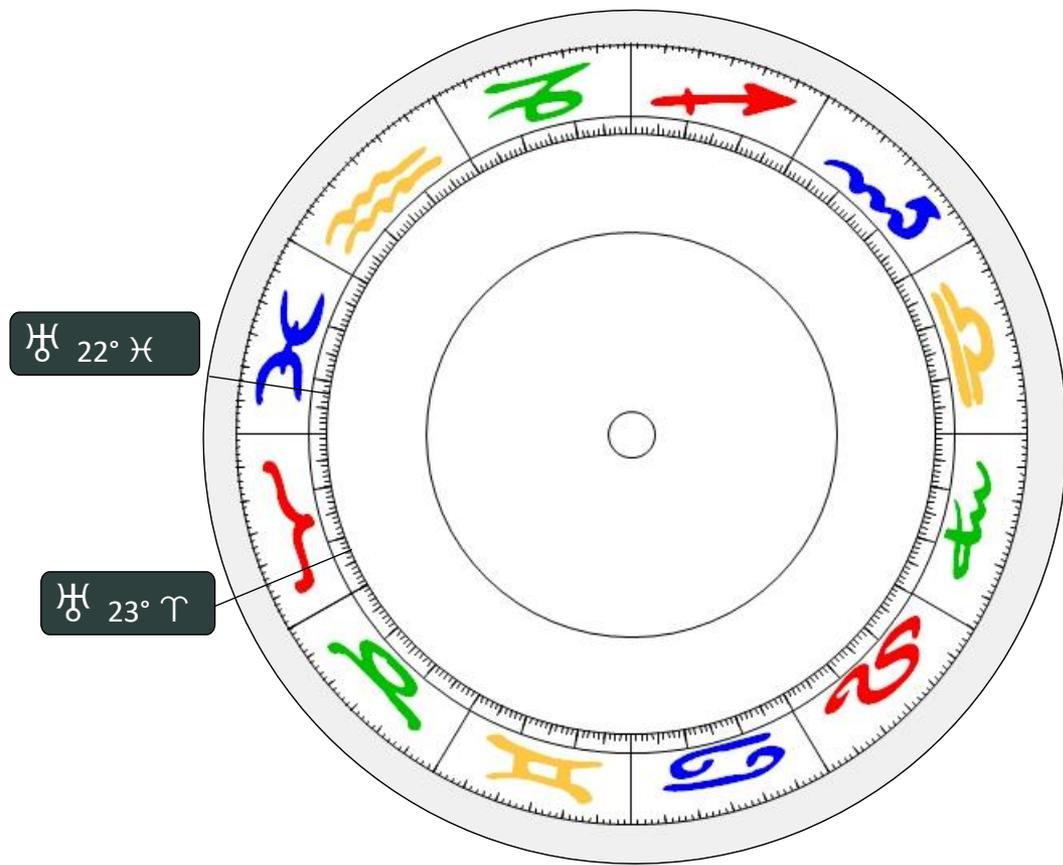

Long-Term Cycle Low Geocosmic Correlations - Uranus

The long-term stock market cycle troughs *all unfolded while Uranus transited in — or just before — the sign of Aries*

Stock Market Low When Uranus at 22° Pisces to 23° Aries

These initial lows took place when Uranus was positioned between 22° Pisces and 23° Aries

Uranus finds itself positioned between these sectors of the zodiac again March 2009 - April 2017

Long-Term Cycle Low Geocosmic Correlations - Uranus

If this phenomenon correlates as it has in the past, a long-term cycle trough could form during that period

The low of March 2009 qualifies for a hit according to this study, as Uranus was in 22° of Pisces at the time

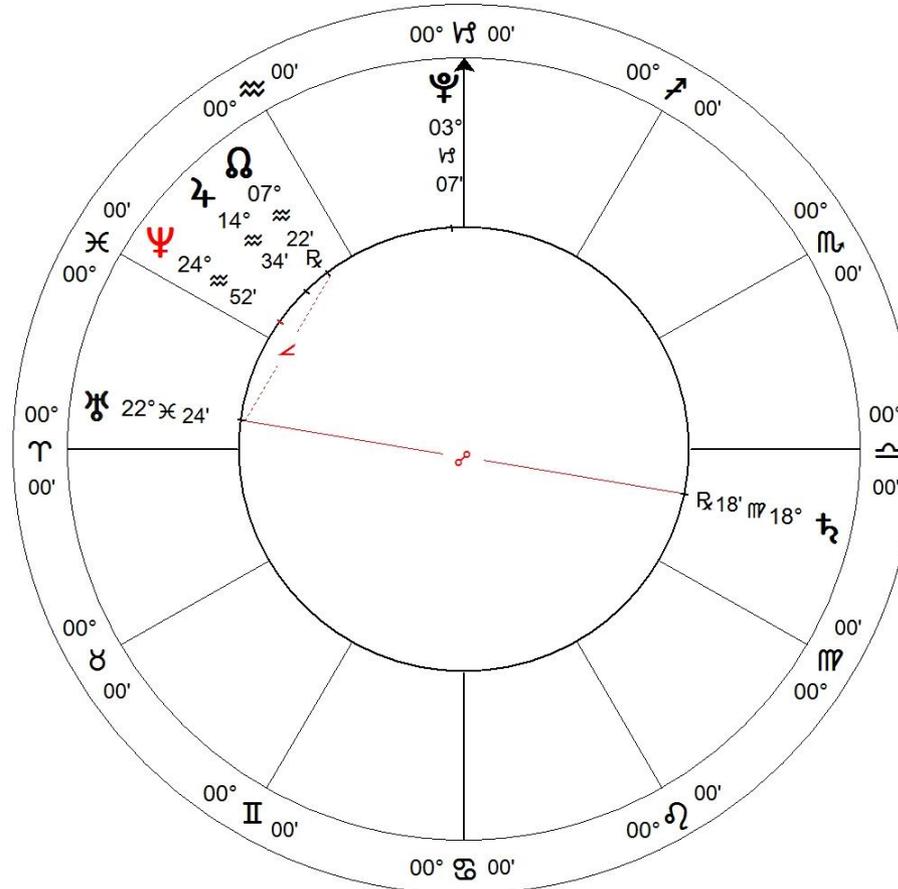

That was the very earliest month possible within the time band of Uranus transiting through this sector of the tropical zodiac

This time band remains in effect for the market to make a final long-term cycle low by 2017, if March 2009 was not the long-term cycle trough

POSITION OF URANUS ON MARCH 9, 2009

Long-Term Stock Market Low

Natal Chart
 Mar 9 2009, Mon
 12:00 pm EDT +4:00

Price chart of DJIA showing long-term low in March 2009

Secondary Cycle Low Geocosmic Correlations - Uranus

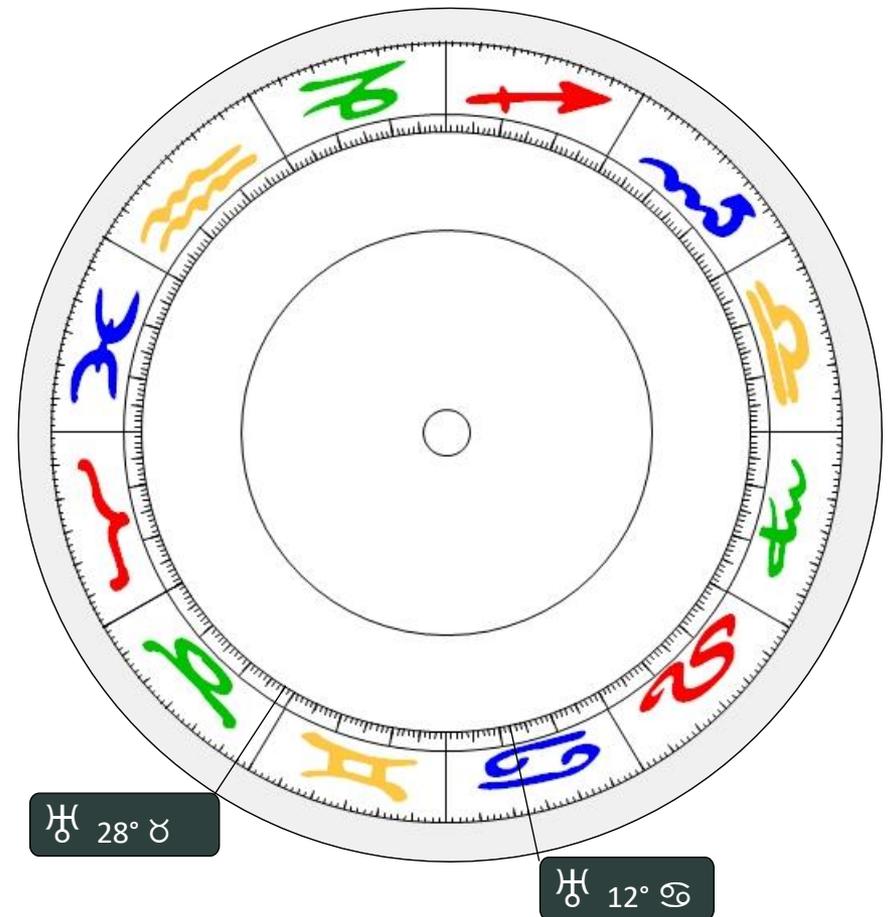

All secondary lows (three confirmed cases) formed when Uranus was in a rather narrow time band extending from 28° Taurus through approximately 12° Cancer

This sector of the tropical zodiac is highlighted again
May 2025-May 2036

Secondary Cycle Low Geocosmic Correlations - Uranus

All secondary lows (three cases) formed when Uranus was in a rather narrow time band extending from 28° Taurus through approximately 12° Cancer

This sector of the tropical zodiac is highlighted again May 2025-May 2036

Secondary Cycle Low Geocosmic Correlations - Uranus

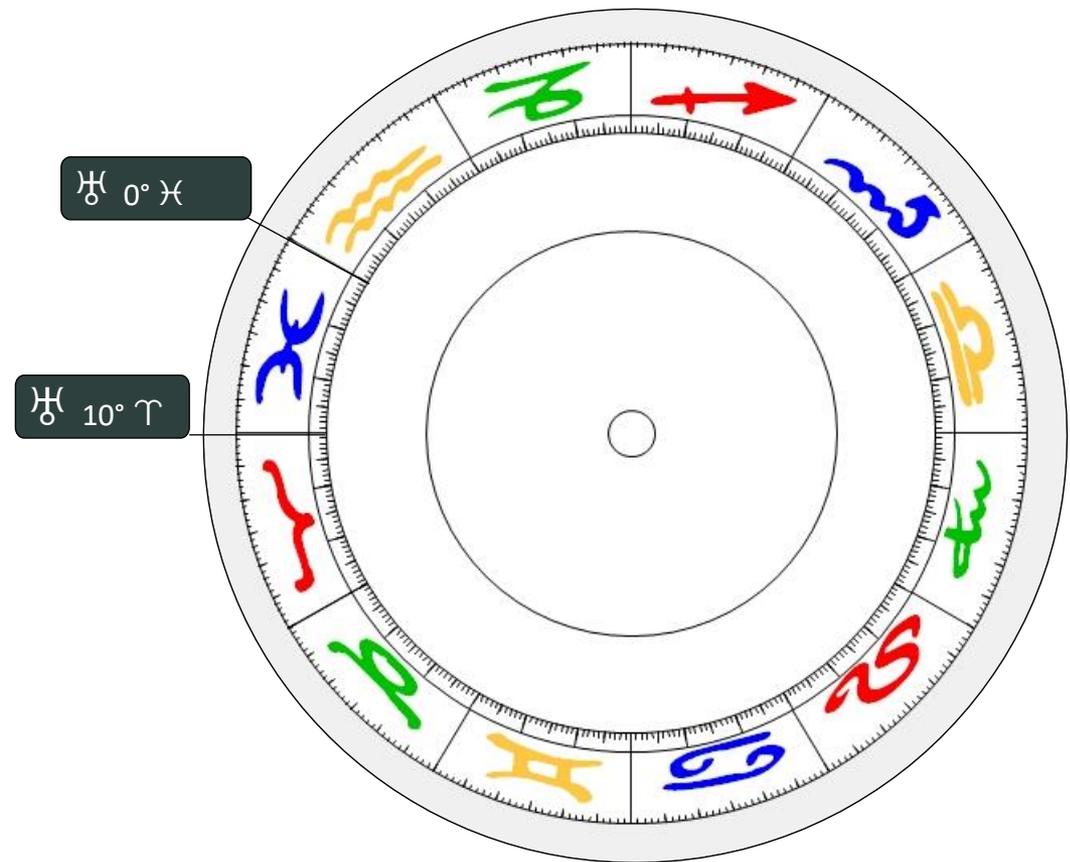

If we use the 6-22 year period in which secondary lows follow initial lows, and apply March 2009 as the initial low, we will see that this overlap period is in effect only 2025-2031, which compliments the previously suggested secondary low related to the Pluto and Neptune studies

Each of these studies implies a secondary low before 2030.

Stock Market Crests - Uranus

Perhaps most interesting about this Uranus study is the observation that Uranus has so far coincided with strong upward trends in U.S. stocks when it transited through the Gemini-Aquarius sector of the zodiac

That upward trend peaked as Uranus transited between 0° Pisces and 10° Aries

Long-Term Cycle Crest Geocosmic Correlations - Uranus

Once the top was in, it declined sharply to form its initial long-term cycle low while Uranus was between 22° Pisces and 23° Aries

Throughout the transit of Uranus in Taurus (which rules money and stocks), the stock market traded up and down in a wide congestion zone

After leaving Taurus, the market returned to its strong upward trend for several years

Geocosmic Correlations of Initial Cycle Troughs to Secondary Lows

There were none

Geocosmic Correlations of Initial Cycle Troughs to Cycle Crests

The movement of Uranus from a long-term cycle trough to the long-term cycle crest shows signs of promise

In each case so far (only three), Uranus moved nearly one full zodiac cycle

In actual degrees, the movement of Uranus ranged from 317° - 377° (a full cycle would be 360°)

Geocosmic Correlations of Initial Cycle Troughs to Cycle Crests

In the first case (1762-1835), Uranus advanced from 13° Aries to 0° Pisces, about 10-1/2 signs

Uranus 13° Aries

Neptune 0° Pisces

Geocosmic Correlations of Initial Cycle Troughs to Cycle Crests

In the third case (1932-2007), Uranus transited from 23° Aries to 15° Pisces, almost 11 signs

Uranus 23° Aries

Neptune 15° Pisces

Geocosmic Correlations of Initial Cycle Troughs to Cycle Crests

In the second case (1842-1929), Uranus moved from 23° Pisces to 10° Aries, about 12-1/2 signs

Uranus 23° Pisces

Uranus 10° Aries

Geocosmic Correlations of Initial Cycle Troughs to Cycle Crests

Based on these initial findings of Uranus, when
would the next cycle crest occur?

Geocosmic Correlations of Cycle Crests to Initial Cycle Lows

Due to the fact that all three long-term cycles confirmed so far had very steep but rather short declines, this particular study may not be too useful

In all cases, the decline from the long-term cycle crest to its troughs lasted only 2-7 years

Uranus only advanced 7-23° in the three cases of long-term cycle crests to troughs

QUIZ #9

Uranus Sign Correlations to Long-term Cycles in Stock Markets

QUIZ #9

1. What is Neptune's degree range of particular signs in which the long-term cycle troughs in the U.S. stock market have unfolded?
2. What geocosmic correlation is present with Neptune when the stock market makes its secondary low?
3. What geocosmic correlation exists between Neptune's signs and long-term cycle crests in the U.S. stock market?
4. What is the distance Neptune has moved through the zodiac between a long-term stock market low and its crest?

QUIZ #9

5. What is Uranus's degree range of particular signs in which the long-term cycle troughs in the U.S. stock market have unfolded?
6. What is the degree range of Uranus in particular signs in which the long-term cycle crests in the U.S. stock market have unfolded?
7. Based on these studies of Uranus and Neptune, when is the next long-term cycle low, or secondary low in U.S. stocks due?
8. Based on these studies of Uranus and Neptune, when is the next long-term cycle crest in U.S. stocks due?
