

## QUIZ LESSON 16

1. What planet tends to coincide with rallies to new all-time highs, followed by stunning crashes in commodities or stock sectors ruled by the sign it is transiting through? Give an example.

**Uranus: transit through Aquarius (1995-2003), which rules technology (dotcom boom/bust), then Pisces (2003-2010), which rules crude oil (oil boom/bust), then Aries (2010-2018), which rules defense stocks (firearm stocks boom/bust).**

2. What tends to happen in the stock sectors or commodities according to the sign Saturn is transiting?

**The sign Saturn is in tends to depress prices in that sector or commodity. Saturn lasts 2-3 years in each sign. The idea is to look for a low in price in those financial markets before Saturn leaves that sign.**

3. What is the corresponding association between Jupiter and Saturn to price, demand, and supply of a commodity, according to the sign they are in and the commodity ruled by that sign?

**Jupiter could lead to oversupply (lower prices) or tremendous demand (higher prices). Saturn could lead to low demand (lower prices) or shortages (higher prices).**

4. Go through each sign of the zodiac and identify stock sectors or commodities that are associated with that sign.

**Aries: Defense, weapons, sporting goods, athletic products.**

**Taurus: Banks, financial institutions, investment management, holding companies, packaging, and containers, currencies, stock markets in general, cattle (meats).**

**Gemini: Automobiles, diversified operations, communications, telecommunications, telephones, newspapers, magazines, media and books, and transports categories.**

**Cancer:** Agricultural operations, residential building, foods, motels, hotels, restaurants, supermarkets, household appliances, furniture, real estate development, home furnishings, utility water supplies, dairy and Silver.

**Leo:** Children's toys, gaming companies, games and hobbies, recreation, gambling, entertainment industry, and gold mining.

**Virgo:** Health care services, health maintenance organizations, office supplies, soap and cleaning products, maintenance and service, engineering, graphics, design, cereals, flours and grains, employment agencies, wheat.

**Libra:** Accounting, cosmetics, fashion, jewelry, apparel, sugar and refining, and law.

**Scorpio:** Financial lending institution, like banks, savings and loans, brokerage houses, oil and gas drilling, waste management, pollution control services, fertilizers, funeral services, coal mining, medical and surgical supplies, and insurance companies.

**Sagittarius:** Travel (airlines), export-import, publishing, sports, religious and educational materials, and school supplies. It also deals with holding companies that are heavily invested throughout the world.

**Capricorn:** Paper and wood products, heavy equipment, farm machinery, cement, concrete, mining, building construction, rubber and tires, and manufacturing.

**Aquarius:** Computers, technology, electronics, electric products, laser systems and components, aerospace, and the media and cable, radio and television, and airlines.

**Pisces:** Alcoholic and party beverages, chemicals, drugs, pharmaceuticals, hospitals, nursing care facilities, oil and gas, shipping, shoes, photography and cameras, movies, and the film industry.

5. What signs of Jupiter's transit tend to correlate with lows in U.S. stock prices?

#### **Leo and Capricorn/Aquarius**

6. What signs of Jupiter's transit tend to correlate with highs in U.S. stock prices?

#### **Aries/Taurus and Sagittarius**

7. When have the highs associated with Jupiter's transiting sign not worked in the past 100 years? What else was going on that may have distorted it from making a high as expected?

**In early 2013, when it was supposed to fall with Jupiter in Gemini, it instead soared to a new all-time high. The reason for this may be due to the fact that Uranus was square Pluto. The two previous times in the past 100 years that Uranus was in a hard aspect to Pluto were April 12, 1932-January 17, 1934 (waning square), and October 9, 1965-May 30, 1966. In summary, when Uranus and Pluto were in hard aspect-- the stock market continued higher into the time when Jupiter moved into the middle and later degrees of Gemini.**

8. What is the strongest Jupiter aspect correlating with longer-term stock market cycles? What is its C/S value? When does it next happen?

**Jupiter conjunct Saturn; 9.36. It just happened in December 2020. Next time will be November 2040.**

9. What Jupiter transits to outer planets take place this year? What is their C/S values?

**Jupiter waning square Uranus—8.65**

**NO QUIZ LESSON 17 or 18**
