

MMTA COURSE TWO EXAM

Name:

Please choose the correct answer from the choices given. **There may be more than one correct answer**, please choose all that apply.

1. What is an ingress, as used in Financial Astrology?
 - A: Someone who gets on your nerves because they over trade
 - B: Every tenth degree of a zodiac sign (3 per sign)
 - C: The point at which two planets come together in the exact same degree
 - D: The point when a planet changes signs

2. A planetary pair cycle is:
 - A: The amount of time it takes any two planets to make a conjunction to one another
 - B: A time when two planets are in the same sign
 - C: A point in which two planets make the same aspect twice due to the retrograde motion of one of the planets
 - D: When Venus aspects another planet at a time when two people get married

3. Which of the following statements is not true?
 - A: A conjunction occurs when the spatial distance between two planets is 0 degrees
 - B: A new moon is an example of a conjunction
 - C: A conjunction represents the starting point of a cycle between the two planets involved
 - D: Uranus and Pluto are now in a conjunction to one another

4. An opposition....

- A: Occurs when two planets are on the opposite side of the sky as seen from earth
- B: Is present under a full moon between the Sun and Moon
- C: Represents the halfway point of a planetary pair cycle (its half-cycle phase)
- D: Is now present in the skies between Saturn and Neptune

5. A square aspect

- A: Occurs when two planets are 90 degrees apart
- B: Represents a quarter phase of a planetary pair cycle
- C: Is now in effect between Saturn and Neptune, as of January 2021
- D: Is now in effect between Saturn and Uranus, as of February 2021

6. Which of the following are **not** true?

- A: A trine aspect occurs when two planets are 60 degrees apart
- B: A trine aspect is considered a harmonious, or favorable, relationship between two planets
- C: A trine is now in effect between Jupiter and Neptune, as of March 2021
- D: A trine is now in effect between Mars and Venus, as of April 2021

7. A waxing phase between planets occurs when...

- A: Two planets are in conjunction to one another
- B: Two planets move from a conjunction towards their opposition to one another
- C: Two planets are in opposition to one another
- D: When one planet conjuncts the Sun, and thus it “melts like wax”

8. True or False:

The waning phase between two planets takes place after their opposition and as they move towards their next conjunction.

9. In a 4-phase planetary pattern, which of the following are true:

- A: First phase is conjunction to opposition, second is waxing square to waning square
- B: First phase is conjunction to waxing square, second is from waxing square to opposition
- C: Third phase is from waxing trine to waning trine, fourth phase is waning trine to conjunction
- D: Third phase is opposition to waning square, and fourth phase is waning square to conjunction

10. True or false, Waxing phases represent the period of time when the principles of the two planets are increasing increasing in their influence in human activity. It is a growth stage of the cycle of those two planets.

11. Which of the following are true with regard to “orbs” of planetary aspects?

- A: Orbs refer to the distance away from an exact aspect in which the themes of two planets may still be considered in force
- B: The closer the orb is to an exact aspect, the stronger the themes of those two planets are in their expression
- C: Generally speaking, in Financial Astrology, an aspect is considered strong if it is within three degrees of an exactness.
- D: All of the above

12. An applying aspect...

- A: Is in force when two planets are approaching their exact degree of aspect
- B: Is in force when two planets are leaving their exact degree of aspect
- C: Is considered more powerful than a separating aspect
- D: Is considered less powerful than a separating aspect

13. A retrograde planet has the following characteristics:

- A: It appears to be going backwards through the zodiac as seen from earth
- B: Will be marked in the ephemeris with an ‘R’ at the time it begins
- C: Will be marked in the ephemeris with an ‘D’ at the time it ends
- D: When it begins and ends, the principles of that planet are highlighted for several days either side of the event
- E: All of the above

14. What does the term “passages” or “passes” mean in relationship to a retrograde planet?

- A: The number of times a planet will go retrograde while in a certain sign
- B: The number of times two planets will make the same aspect in a short period of time due to the retrograde of one or both planets involved
- C: The number of times that Kobe Bryant will choose not to shoot the basketball when the ball is in his hands
- D: The number of times you will attempt to flirt with a co-worker under venus retrograde

15. How many “passages” will take place with the current Saturn-Uranus waning square?

- A: 3
- B: 5
- C: 7
- D: 9

16. What does the “central time band” of a planetary aspect refer to?

- A: The clock time based on the time zone the market is located in
- B: The exact time of an aspect
- C: The exact time of an aspect, plus or minus three degrees
- D: The period of time from the first passage to the last passage involving two planets forming a series of the same exact aspect to one another due to the retrograde factor

17. True or False: Generally speaking, an “extended orb of time” can be allowed for a market cycle to culminate for up to ten months before or after the central time band (or single passage) of an aspect involving Saturn to Uranus, Neptune, or Pluto.

18. Which of the following statements are true?

- A: Neptune’s orbit around the Sun is about 164 years
- B: Neptune orbits around the Sun in an elliptical pattern
- C: Neptune can spend as little as 12 years or as many as 28 years in a sign
- D: Neptune spends about 14-15 years in each sign

19. How many degrees and minutes difference are there between the sidereal and tropical zodiacs today?

- A: The Sidereal zodiac is about 23.5 degrees ahead in the signs from the Tropical zodiac
- B: The Tropical zodiac is about 23.5 degrees ahead in the signs from the Sidereal zodiac
- C: The Sidereal zodiac is about 23.5 degrees behind in the signs from the Tropical zodiac
- D: The Tropical zodiac is about 23.5 degrees behind in the signs from the Sidereal zodiac

20. Which system(s) do we use in our research studies (so far) at MMTA?

- A: Signs versus constellations
- B: Tropical versus Sidereal
- C: Western versus Vedic astrology
- D: All of the above

21. Due to the precession of the equinoxes, how much does the tilt of the earth change over time? This accounts for today's difference between Tropical and Sidereal positions.

- A: It moves at the rate of 1 degree every year
- B: It moves at the rate of 1 degree every 36 years
- C: It moves at the rate of 1 degree every 72 years
- D: It moves at the rate of 30 degrees every 1000 years

22. When did Pluto first ingress into Capricorn on this current transit?

- A: January 1, 2000
- B: January 1, 2001
- C: January 25, 2008
- D: September 1, 2024

23. Which planet is known for “secrets hidden, and then revealed”?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

24. Which planet is known for debts, taxes, deficits, defaults, and downgrades?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

25. Which planet is known for depression, contraction, loss and fear?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

26. Which planet is known for sudden and abrupt events?

- A: Saturn
- B: Uranus
- C: Neptune

D: Pluto

27. Which planet is known for scandals, misinformation, and deceptions?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

28. Which planet is known for breaking beyond support or resistance (break outs)?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

29. Which planet is known for “irrational exuberance” and beliefs that are not verified?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

30. Which planet is known for honesty, integrity, and accountability?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

31. Which planet has an elliptical orbit and can spend as little as 12 years in some signs and as much as 32 years in others?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

32. Which planet has correlated with long-term stock market cycle troughs when in cardinal signs?

- A: Saturn
- B: Uranus
- C: Neptune
- D: Pluto

33. What is the length of the Moon's Nodal Cycle?
- A: 9.5 years
 - B: 12 years
 - C: 18.6 years
 - D: 29 years
34. What has been the historical difference, in degrees, in Pluto's position between the secondary trough of a long-term cycle and the crest of that long-term cycle?
- A: 61-73°
 - B: 14-26°
 - C: 00-21°
 - D: 75-95°
35. The distance between Pluto's position on three of the last four long-term cycle crests has been...
- A: 75° - 95° apart.
 - B: 61° - 73° apart
 - C: 14° - 26° apart
 - D: 02° - 07° apart
36. Which of these factors stand out with regard to Neptune's position at initial long-term cycle lows in U.S. stocks?
- A: Neptune is near 0° Virgo (in late Leo or early Virgo)
 - B: Neptune is near 0° Aries
 - C: Neptune is in late Sagittarius or early Capricorn
 - D: Neptune is near 0° Pisces (in late Aquarius or early Pisces)
37. True or False: Neptune is either near the 0° Virgo-Pisces axis, or near the 0° Aries-Libra axis at long-term cycle lows and their secondary troughs.
38. True or False: Neptune was in Capricorn during the Great Recession of 2007-2009?
39. When did Neptune begins its transit through Pisces and when will it end?
- A: 2011-2023
 - B: 2011-2025
 - C: 2012-2027

- D: 2012-2031
40. What type of sign is Pisces?
- A: Cardinal
 - B: Fixed
 - C: Mutable
 - D: "Do Not Distrub"
41. In the filtered graph of Jupiter's transits through the signs of the zodiac and its correlation with U.S. stock prices, which signs have the highest correlation to troughs?
- A: Aries-Libra
 - B: Aries-Sagittarius
 - C: Taurus-Scorpio
 - D: Leo-(Capricorn/Aquarius)
42. In the filtered graph of Jupiter's transits through the signs of the zodiac and its correlation with U.S. stock prices, which signs have the highest correlation to crests?
- A: Aries-Libra
 - B: Aries-Sagittarius
 - C: Taurus-Scorpio
 - D: Leo-Aquarius
43. What sign rules weapons and atheletic equipment?
- A: Aries
 - B: Cancer
 - C: Sagittarius
 - D: Capricorn
44. What sign rules farm equipment?
- A: Aries
 - B: Cancer
 - C: Sagittarius
 - D: Capricorn
45. What sign rules Crude Oil?
- A: Leo
 - B: Scorpio
 - C: Capricorn
 - D: Pisces

46. What sign rules Technology?

- A: Gemini
- B: Virgo
- C: Aquarius
- D: Pisces

47. What sign rules cattle?

- A: Aries
- B: Taurus
- C: Virgo
- D: Sagittarius

48. What sign rules stocks and the stock market?

- A: Aries
- B: Taurus
- C: Virgo
- D: Sagittarius

49. What signs will Jupiter be in during the year 2021?

- A: Aquarius-Pisces
- B: Cancer-Leo
- C: Pisces-Aries
- D: All of the above

50. At long-term cycle lows in Silver, what type of sign is Saturn most frequently in?

- A: Fire
- B: Air
- C: Earth
- D: Water

51. At long-term cycle lows in Silver, what type of sign is the Moon's North Node most frequently in?

- A: Fire
- B: Air
- C: Earth
- D: Water

52. At long-term cycle lows in Silver, what single sign is the Moon's North Node most frequently in?
- A: Aries
 - B: Leo
 - C: Capricorn
 - D: Aquarius
53. What sign, of the Moon's North Node, is significant due to its lack of any long-term cycle lows in Silver?
- A: Aries
 - B: Leo
 - C: Capricorn
 - D: Aquarius
54. What segment of the zodiac signs for Jupiter's transit is highlighted when long-term lows tend to occur in Silver?
- A: Aries – Leo
 - B: Cancer – Libra
 - C: Virgo - Scorpio
 - D: Scorpio – Aquarius
55. More long-term cycle highs in Silver occur when Saturn is in which sign of the zodiac?
- A: Cancer
 - B: Leo
 - C: Virgo
 - D: Capricorn
56. Historically, which signs have the highest correspondence to cycle highs in Silver?
- A: Pisces
 - B: Sagittarius
 - C: Virgo
 - D: Aquarius
57. Which element of Jupiter has the highest correspondence to long-term cycle highs in Silver?
- A: Fire
 - B: Earth
 - C: Air
 - D: Water

58. Which element of Jupiter has the lowest correspondence to long-term cycle highs in Silver?
- A: Fire
 - B: Earth
 - C: Air
 - D: Water
59. Which element of the Moon's North Node has the highest correspondence to long-term cycle highs in Silver?
- A: Fire
 - B: Earth
 - C: Air
 - D: Water
60. The first step to forecasting a time band for a long-term cycle trough is...
- A: Outline the time band for the 18-year or greater trough
 - B: Outline the time band for Pluto's current sign position
 - C: Outline the time band when the next aspect is due between Saturn, Uranus, Neptune, and/or Pluto
 - D: Outline the time band when the next Saturn-Uranus signature takes place
61. The second step to forecasting a time band for a long-term cycle trough is...
- A: Outline the time band when the next 2 and 3-phase sub cycles are due
 - B: Outline the time band when the 4-year cycle is due
 - C: Outline the time band when the next aspect is due between Saturn, Uranus, Neptune, and/or Pluto
 - D: Outline the time band when the next Jupiter aspect takes place to Saturn, Uranus, Neptune, and/or Pluto
62. The third step to forecasting a time band for a long-term cycle trough is...
- A: Outline the time band when the 4-year cycle is due, followed by its intermediate-term phases that are next due
 - B: Outline the time band when the next aspect is due between Saturn, Uranus, Neptune, and/or Pluto
 - C: Outline the time band when the next Jupiter aspect takes place to Saturn, Uranus, Neptune, and/or Pluto
 - D: Outline the time band when a planet is turning retrograde or direct

63. The next (fourth) step to forecasting a time band for a long-term cycle trough is...
- A: Outline the time band when the next 50-week cycle is due
 - B: Outline the time band when the primary cycle is due
 - C: Outline the time band when the next aspect is due between Saturn, Uranus, Neptune, and/or Pluto
 - D: Outline the time band when the next Jupiter aspect takes place to Saturn, Uranus, Neptune, and/or Pluto
64. True or False: When calculating a time band for long-term cycle reversals in financial markets involving aspects between Saturn, Uranus, Neptune, and Pluto, it is best to include both major and minor aspects between these planets.
65. True or False: When calculating a time band for long-term cycle reversals in financial markets involving aspects of Jupiter to Saturn, Uranus, Neptune, and/or Pluto, it is best to include both major and minor aspects between these planets.
66. Name the major aspect(s) in effect in 2021 that could correspond to the culmination of long-term stock market cycles.
- A: Saturn-Uranus waning square
 - B: Saturn-Neptune waning trine
 - C: Neptune-Pluto waxing sextile
 - D: Uranus-Pluto waxing square
67. What are the three ways to determine a long-term planetary ingress?
- A: An ephemeris
 - B: An astrological software program
 - C: Tables of Planetary Phenomenon
 - D: All of the above
68. When was the prior first ingress of Pluto into Capricorn?
- A: January 7, 1762
 - B: September 10, 1912
 - C: January 25, 2008
 - D: November 26, 2008
69. What are the four D's associated with the dynamics of Pluto in regards to finances?
- A: Debt, deficits, downgrades, and default,
 - B: Death, debt, democrats, Detroit
 - C: Default, demons, devil, Johnny Depp
 - D: Debt, details, demands, decisions

70. Which planet has a wish for a better or perfect world?
- A: Saturn
 - B: Uranus
 - C: Neptune
 - D: Pluto
71. Which planet is apt to be highlighted when a government overthrow or revolution takes place?
- A: Saturn
 - B: Uranus
 - C: Neptune
 - D: Pluto
72. Where is the Moon's North Node in the summer of 2021 and when will it ingress into the next sign?
- A: It is in Scorpio and will enter Sagittarius in February 2022
 - B: It is in Sagittarius and will enter Scorpio in November 2021
 - C: It is in Gemini and will enter Taurus in December 2021
 - D: It is in Cancer and will enter Gemini in October 2021
73. True or false: The Moon's North Node spends about 9 months in each sign of the zodiac
74. In which sectors of the zodiac does the position of Uranus tend to correspond to long-term cycle lows in U.S. stocks?
- A: Pisces
 - B: Aries
 - C: 22° Pisces through 23° Aries
 - D: 23° Aries through 12° Cancer
75. In which sectors of the zodiac does the position of Uranus tend to correspond to secondary long-term cycle lows in U.S. stocks?
- A: Taurus
 - B: Gemini
 - C: 23° Aries through 28° Taurus
 - D: 28° Taurus through 12° Cancer

76. Uranus correlates with a strong upward trend in stock prices between which signs of the zodiac?

- A: Gemini through Aquarius
- B: Aries-Cancer
- C: Gemini-Libra
- D: Sagittarius-Capricorn

77. Long-term cycle crests tend to form when Uranus is between which degrees of the zodiac?

- A: 0° Aquarius - 10° Pisces
- B: 0° Pisces - 10° Aries
- C: 0° Sagittarius - 5° Capricorn
- D: 0° Sagittarius - 15° Aquarius

78. The majority of long-term lows or their secondary lows happen when Saturn is in what type of signs?

- A: Cardinal
- B: Fixed
- C: Earth
- D: Water

79. True or false: In Financial Astrology, Jupiter is considered the planet of fear and Saturn the planet of greed

80. True or false: generally speaking, longer-term planetary aspects of Saturn and beyond are present when long-term cycles in financial markets unfold, whereas Jupiter aspects to Saturn and beyond correlate with intermediate-term cycles

81. Which of the following statements has had historical frequency of occurrence so far?

- A: Uranus was between 22 Pisces and 23 Aries has coincided with long-term cycle lows in U.S. stocks
- B: The conjunction of Saturn and Pluto has often corresponded with a low in the economic and financial cycle nearby.
- C: Neptune within 15° of 0 Virgo or Pisces has coincided with long-term cycle lows in U.S. stocks
- D: Saturn in Capricorn is most often a low in the U.S. stock market

82. Long-term cycle crests in U.S. stocks often occur when the North Node of the Moon is between...

- A: 1° Aries - 10° Sagittarius
- B: 9° Sagittarius - 22° Leo
- C: 15° Scorpio - 10° Taurus
- D: 21° Leo - 4° Aries

83. Long-term cycle troughs in U.S. stocks often occur when the North Node of the Moon is between...

- A: 1° Aries - 10° Sagittarius
- B: 9° Sagittarius - 22° Leo
- C: 15° Scorpio - 10° Taurus
- D: 21° Leo - 4° Aries

84. Which sector of the zodiac is especially critical for long-term cycle reversals in financial markets – especially stocks - based on the Moon's North Node position, +/- 12°?

- A: The Aries-Libra equinox points
- B: The Cancer-Capricorn solstice points
- C: The Taurus-Scorpio axis
- D: All of the above

85. What is the historical sequence of the longest-term cycles to date in the Corn market?

- A: 90-, 45-, 22.5-year cycles
- B: 72-, 36-, and 18-year cycles
- C: 18-, 9-, and 3-year cycles
- D: 25-, 8.5-, and 4.25-year cycles

86. What type of sign is Neptune in when Wheat tends to for long-term cycle troughs?

- A: Cardinal
- B: Fixed
- C: Mutable
- D: Water

87. Which of the following planetary pair combinations are in their waxing phase?

- A: Uranus-Neptune
- B: Uranus-Pluto
- C: Neptune-Pluto
- D: Saturn-Pluto

88. What are the dates of the most recent first phase period of the Uranus-Pluto cycle?
- A: 1932-1965
 - B: 1965-2015
 - C: 1973-2020
 - D: 2001-2020
89. What does C/S stand for in the MMTA research studies?
- A: Conjunction and Square
 - B: Cardinal and Square
 - C: Corn and Soybeans
 - D: Consistency and Relative Strength weighted values
90. What planetary pair aspects has the highest correlation to cycles greater than 4-year types in U.S. stock indices?
- A: Saturn-Uranus conjunction
 - B: Saturn-Uranus opposition
 - C: Saturn-Pluto opposition
 - D: Saturn-Neptune trine
91. True or false: The Saturn-Neptune waning trine is one of the five most consistent geocosmic correlates to 4-year or greater cycles in U.S. stocks.
92. True or false: The Moon's North Node in Pisces has a high correlation to long-term cycle lows in Wheat
93. In which sign axis does Saturn have a high correlation to long-term cycle lows in Wheat?
- A: Aries-Taurus
 - B: Libra –Scorpio
 - C: Aries-Libra
 - D: Taurus-Scorpio
