00:41:47 MJ: thank you--just wanted clarification up front

00:42:17 Danica Cordell-Reeh: Just as water drains in the opposite direction south of the equator does the impact of astrology vary

00:50:14 adam childs: I guess they are closest then to the earth

00:52:07 Merriman Market Analyst: The outer planets go retrograde when planets are mostly between trines and oppositions to Sun

00:52:36 adam childs: I see

00:53:22 Merriman Market Analyst: So I think the opposite is the case Adam. Planets are furthest from earth

00:55:22 Merriman Market Analyst: Sorry Adam. I think you are right. Planets are closest to earth and furthest from Sun

00:58:11 Ibrahim Kone: Why do we used 66.7 and 60?

01:00:01 Merriman Market Analyst: It was a judgement based on groupings of correlations in the study going back to 1928. The strongest group with a C/S value of over 9.40 also had mostly a 66.7% correlation to primary cycles as well.

01:01:19 adam childs: time to make a coffee

01:13:46 Barbara Bernales: In your book Ultimate Book on Stock Market Timing, what do PT, MT, MB and PB mean?

01:22:26 Vito Mijal-Pasa: PT for Primary Top , MT Major Top, MB Major bottom , PB Primary Bottom , hope this helps Barbara !

01:36:47 Eleonore Charrez: How many occurrences would there need to be to be able to do the % calculation ? a minimum of 10x ? of 15x ? or even more ?

01:39:26 Eleonore Charrez: Thanks !

01:48:13 Danica Cordell-Reeh: Could that list be added to the slides

01:53:25 Danica Cordell-Reeh: yes

01:53:42 MJ: does Sun opp Pluto /july 17th count?

01:55:17 adam childs: Jupiter is on bitcoins natal venus I think at the same time

01:56:48 darri murphy: these labels and columns are page 13 in work book

01:57:34 Merriman Market Analyst: Yes, that is correct Adam.

01:57:45 Merriman Market Analyst: Thanks Darri

01:58:14 adam childs: Interesting stuff :-)

02:01:14 huifang boo: Is the either or a total of the crest and trough?

02:01:19 darri murphy: Mars Saturn study on page 17 in work book

02:01:29 Merriman Market Analyst: Yes.

02:02:01 Merriman Market Analyst: It just means either a cycle low or high occurred

02:02:42 huifang boo: But the crest and trough for the 50 week > and primary cycle does not add up to the either or

02:04:01 Ibrahim Kone: I missed what you meant by the correlation between US stock and bitcoin break of correlation ? Could you pls elaborate?

02:05:17 Danica Cordell-Reeh: TKU

02:05:25 adam childs: Are these all geocentric

02:14:20 Lian Handaja: Can you elaborate more on your opinion that "inflation trade is dead"?

02:16:09 Barbara Bernales: Ok, thanks

02:16:24 MJ: <https://www.facebook.com/groups/165350825461339>

02:18:35 Ali Alvarado Atias: Ray, I can add a bit on Elliott, the Man Himself pointed out that his Principle was not in itself a Trading Forecasting System, but instead an idealized way Markets Behaved, later he pointed out that the Fibonacci Sequence was the Basis of the waves he was counting

02:20:12 Vito Mijal-Pasa: Just for Barbara , congestion in Silver Chart looks to be A, B , C , D , E triangle formation which when it ends , prices will trust up as Ray would agree but that would be the last leg of 5th wave then Prices peak and retrace or collapse perhaps

02:21:02 MJ: Vincent was talking about lumbar in the FB group! ;-)

02:21:21 adam childs: Could the high be when Neptune goes retro

02:24:22 Barbara Bernales: Thank you Vito

02:27:03 Barbara Bernales: I've looked at GME's natal IPO chart. The Venus/Jupiter conjuncted GME natal IPO sun/uranus conjunction in Aquarius. The chart is Aries rising. Mercury cycles will impact their price movement all year.

02:28:29 Barbara Bernales: I predict that the final high of GME's (based on their chart) will occur in late October/early November around the next Mercury retrograde cycle.

02:29:01 adam childs: with oil
