Two key patterns of the zodiac are heavily charged astrologically.

1.)

- 23-27° fixed signs
- Mercury and the Sun are posited at 23 and 27° of Taurus (a fixed sign) respectively, and Pluto at 23° of Aquarius, is also a fixed sign
- => 23-27° of fixed signs is an exceptionally charged zone of the zodiac for U.S. stock indices, especially the DJIA
- When planets transit here, the DJIA often reverses. When Mars is there, there is usually a low that is the end of a sharp, but possibly brief, decline

2.)

- 22-27° degrees of cardinal or air signs
- Jupiter and Neptune are in 22-27° of Libra
- Opposition to Saturn at 26° Aries.
- Moon calculated for 10:30 AM but we don't know exactly from where it would start with the Moon. Probably somewhere between 18-23° Aries

2.)

- When planets transit 22-27° of cardinal signs ....

3.)

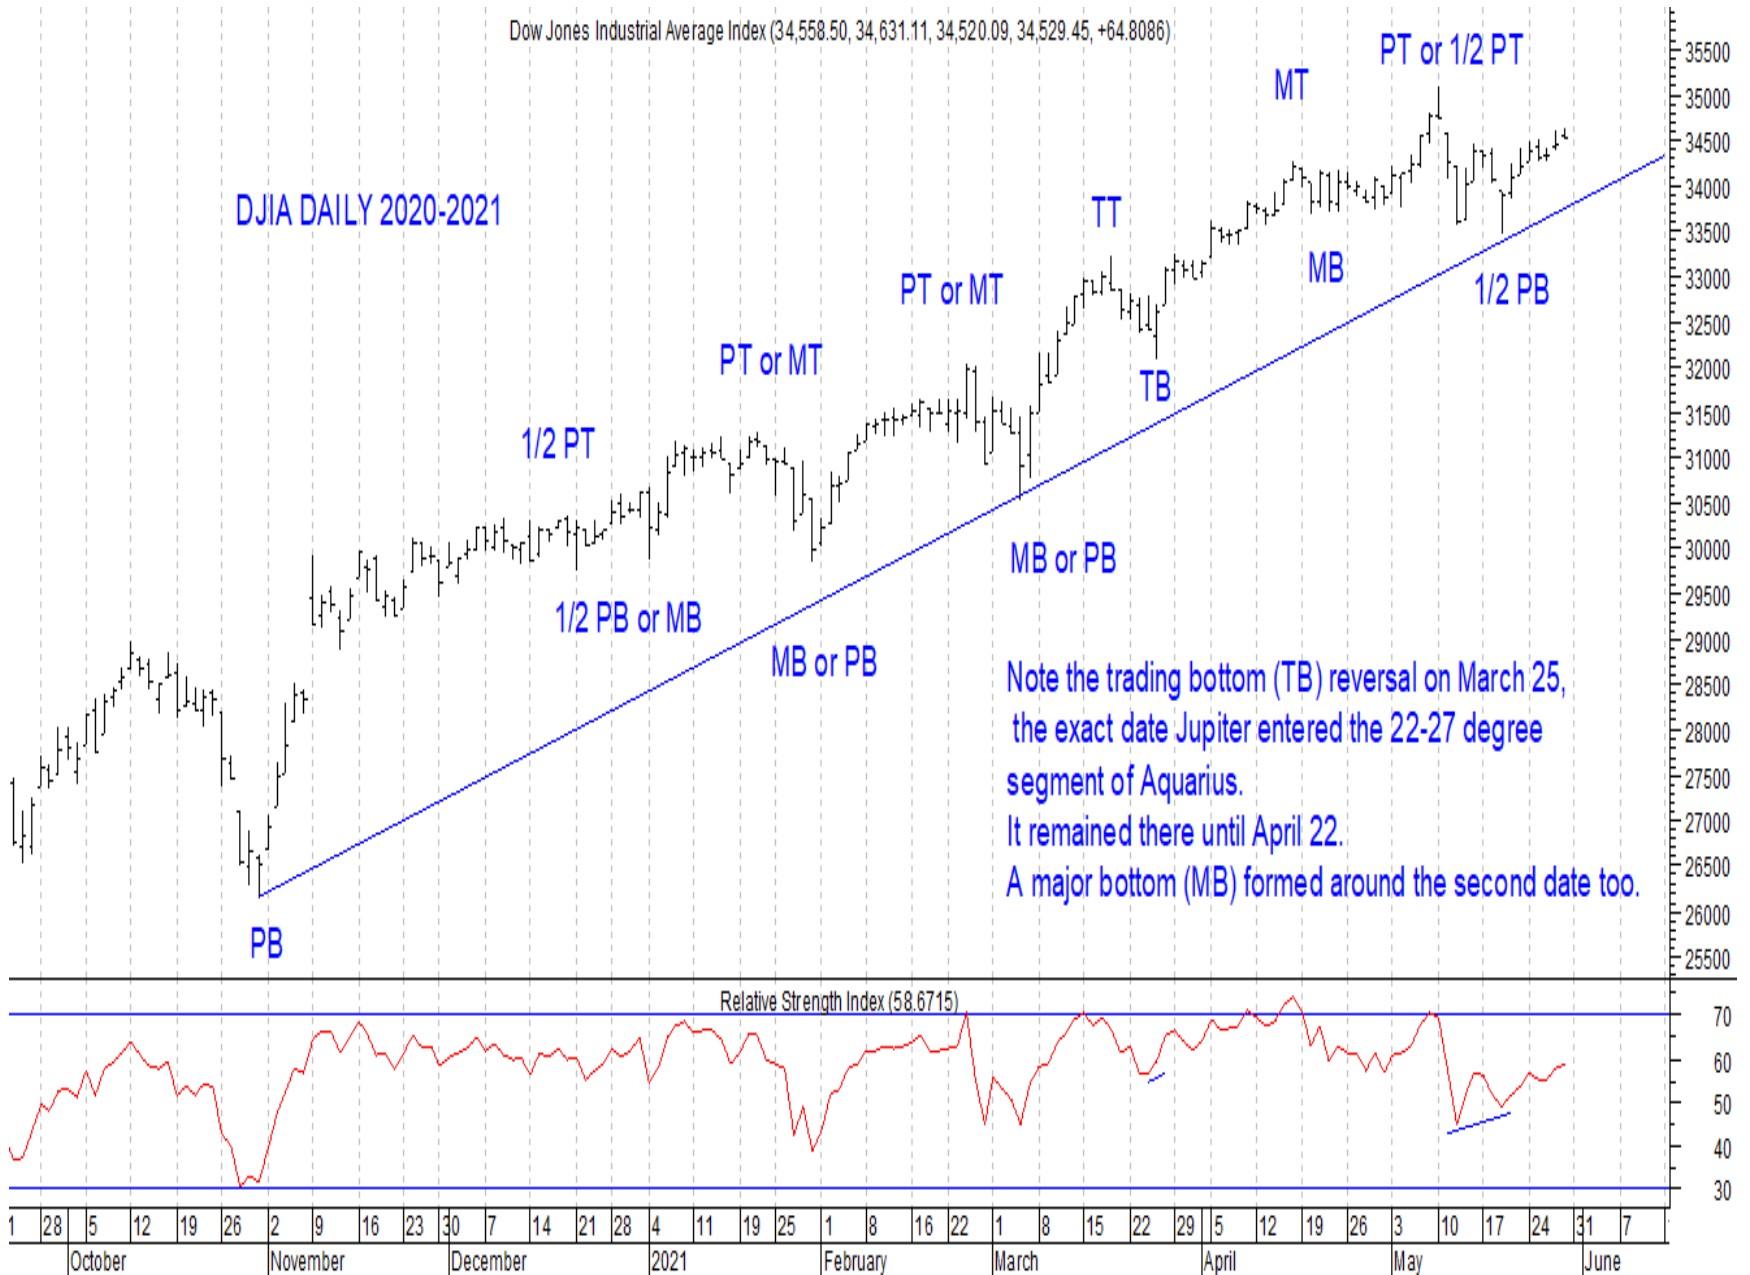

- Pluto is located at  $23^{\circ}$  of Aquarius, also an air sign.
- Trines Jupiter and Neptune at  $22-27^{\circ}$  degrees of air signs.
- When planets transit  $22-27^{\circ}$  degrees of Gemini, a grand trine is formed
- The U.S. stock market = high then.

An example = Jupiter transited 22-27° Gemini during March 25-April 22, 2021.

A trading bottom low formed on March 25.  
High and low near the end of that transit, April 16 and 20, respectively.

# THE KEY ZODIACAL DEGREES OF STRONG PLANETARY PATTERNS IN THE FRB CHART

The most important aspect = Sun-Pluto opposition at 0-1° of Cancer-Capricorn.

Transits in 0-1° of cardinal signs = hard aspect to the FRB Sun-Pluto opposition. .

Transits in 0-1° of earth or water signs = sextile-trine to the FRB Sun-Pluto opposition.
