The purpose of this lesson is to study the results of geocosmic signatures to trading cycles in the U.S. stock market, as taken from Appendix 1 in the back of “The Ultimate Book on Stock Market Timing, Volume 3: Geocosmic Correlations to Trading Cycles

In this lesson, you will learn the following:

1.) Correlation of shorter-term geocosmic signatures to 50-week or greater cycles in the U.S. stock market

2.) Correlation of shorter-term geocosmic signatures to primary or greater cycles in the U.S. stock market, within 10 trading days or more

3.) The correlation of shorter-term geocosmic signatures to 4% or greater reversals within 4 trading days

4.) C/S values of shorter-term geocosmic signatures within 10 or more trading days

QUIZ #5

GEOCOSMIC CORRELATIONS TO PRIMARY OR GREATER CYCLES

1.) Which stationary planets have the highest correlation to 50-week or greater cycles? List them in their order of frequency, and include only those with a 50% or greater correlation.

2.) Which stationary planets have the highest correlation to primary or greater cycles within 12 trading days? List them in their order of frequency, and include only those with a 66.7% or greater correlation.

3.) Which stationary planets have the highest correlation to at least 4% or greater reversals within 4 trading days? List them in their order of frequency, and include only those with a 75% or greater correlation.

4.) Which stationary planets have the highest correlation to C/S values? List them in their order of frequency, and include only those with a value of at least 9.40.

5.) Looking at the other geocosmic signatures, which have the highest correlation to 50-week or greater cycles? List them in their order of frequency, and include only those with a 50% or greater correlation.

6.) Which planetary aspects have the highest correlation to primary or greater cycles within 12 trading days? List them in their order of frequency, and include only those with a 66.7% or greater correlation.

7.) Which planetary aspects have the highest correlation to at least 4% or greater reversals within 4 trading days? List them in their order of frequency, and include only those with a 75% or greater correlation.

8.) Which planetary aspects have the highest correlation to C/S values? List them in their order of frequency, and include only those with a value of at least 9.40.

9.) Which planetary pair cycles have at least 5 of their major aspects with a 64% or greater correlation to primary or greater cycles?

10.) Which planetary pair cycles have at least 4 of their major aspects with a 64% or greater correlation to primary or greater cycles?

11.) Which planets in opposition to the Sun are the strongest of their planetary pair set?

12.) In your opinion, which planetary pair aspect set is the strongest correlation to primary or greater cycles? When does the next aspect from this set occur?
