

00:18:15 Ali Alvarado Atias: DM if you want more Info Ray

00:18:27 Rita Perea: Hi Adam :)

00:20:37 lian handaja: Baseline includes non-trading days, right?

00:24:34 lian handaja: Great. Thanks.

00:26:40 Ibrahim Koné: Yes frankfurt

00:26:50 MJ W: Chicago for grains?

00:26:59 Merriman Market Analyst: Yes

00:27:18 Hui Fang Boo: If we are based in Asia but trade the nyse, do we use the nyse noon chart ?

00:27:28 Merriman Market Analyst: Yes

00:27:42 Merriman Market Analyst: Use the city where the exchange is located

00:28:22 Eleonore Charrez: Why is Mercury the ruling planet ?

00:28:26 Eleonore Charrez: of that day ?

00:28:29 Danica Cordell-Reeh: For crypto currencies would the values vary based on where you are located since the day begins and ends at a different value. Are the exchanges in effect virtual or do they have a physical location?

00:28:50 adam childs: because the moon is in viirgo

00:29:06 Eleonore Charrez: AH ! THANKS !

00:33:37 Rita Perea: I love that..."Cash is a position!" Great reminder. Thank you.

00:38:51 Wyatt Fellows: problem is you always wish you position was bigger when your in all cash...;)

00:40:23 Rita Perea: @Wyatt LOL!

00:43:45 Danica Cordell-Reeh: What is causing the breaks in the chart

00:44:17 Maya Bothe: Do you mean the gaps?

00:44:26 Danica Cordell-Reeh: yes

00:44:34 Danica Cordell-Reeh: Yes

00:45:03 MJ W: overnight session not there

00:46:24 Danica Cordell-Reeh: What does filled look like?

00:47:18 adam childs: It is interesting that the volume is very high at the end of the day

00:49:55 adam childs: So you can fomo in in the morning if you are not careful

00:54:04 Vito Mijal-Pasa: How do we treat the futures relevant to Cash market then Ray ?

00:54:35 MJ W: would you use Chicago or NY for ES?

00:55:59 Vito Mijal-Pasa: the activity starts In Tokyo the next day etc

01:14:49 Hui Fang Boo: Thank you

01:21:02 Abhishek Singh: Why have you chosen Nov 26, 1979 only & not another date

01:21:36 Abhishek Singh: Thanks

01:23:10 Danica Cordell-Reeh: For example the data for BTC is same value for open, close, high, low up until around April 27, 2013. Does that skew the analysis given the relative short time frame of the data

01:26:02 Wyatt Fellows: doesn't

01:26:58 lian handaja: okay.thanks.

01:31:31 adam childs: So these time would change between markets

01:32:07 Ibrahim Koné: What is the average for BTC or for other currencies for 12% filtered wave?

01:32:33 adam childs: 33 week primary

01:33:06 adam childs: Intersting

01:33:41 adam childs: so you have to get to know your market

01:33:47 Ibrahim Koné: I see thanks

01:33:51 lian handaja: Sorry, can you repeat that logic again for BTC? The division to 39 days.

01:35:52 Ibrahim Koné: I believe it was 12% based on last week lessons

01:35:56 lian handaja: Thank you.

01:38:09 Eleonore Charrez: Why did you take 4%? rather than 5 or 6%?

01:39:11 adam childs: It depends how volatile the market is

01:39:14 Eleonore Charrez: ok , thks

01:51:56 Martha Geiger: Gianni, what twitter accounts do you follow for the financial market?

01:52:42 Eleonore Charrez: I have a question regarding the assessment: I very much appreciated having had a couple of weeks, which allowed to do /redo/rethink/correct errors. Could you give the assignment earlier rather than towards the end of the course ?

01:55:42 Hui Fang Boo: What do you think of the recent developments happening to the chinese property developer, Evergrande ? Property market seems to be topping ?

01:56:12 adam child: I think we are a month away from your possible gold trade mercury heliocentric sag

01:56:47 Maya Bothe: Hui Fang, yeah, this is worrying

01:56:57 Eleonore Charrez: yes, indeed

01:58:31 Eleonore Charrez: ok, thks!

01:58:56 Ali Alvarado Atias: 👍

01:59:00 BETH WOODY: Adam, the Helio Merc in Sag came 8/30 and already gone

01:59:13 adam child: So can the c/s values can be calculated separately for each market

01:59:33 adam child: Or at least best if they are

02:00:01 Danica Cordell-Reeh: IN Nyc rentals are going over ask from as little as \$3,500 to \$45,000. There are bidding "wars" in rentals in Manhattan

02:00:08 Hui Fang Boo: I was looking at silver price today and found that silver price seems start rising when Jupiter is in Aquarius and topping around pisces and Aries. But I only have data for 20yrs

02:01:07 adam child: Oh thank you Beth

02:02:33 BETH WOODY: it did cause gold to pop up for about a week - I think it was a 2.2% rise...but don't quote me. :)

02:03:10 adam child: OK

02:03:28 adam child: Thank you Beth I will have a look

02:04:25 Wyatt Fellows: silver in danger of taking out the start of its primary cycle if it doesn't hold monday...that would make it a bearish primary

02:05:24 Wyatt Fellows: but gold might not so it would be intermarket bullish divergence...how would you play/read that scenario ray?

02:08:13 Vito Mijal-Pasa: Don't worry we just had that in Australia and that marks the Peak zone in my opinion where Extremes always mark the turning points in General

02:09:35 Rita Perea: Gianni, what are some of the FinTech twitter feeds that you follow?

02:09:48 Vito Mijal-Pasa: rental

02:09:55 Ali Alvarado Atias: is there a monthly/yearly fee to maintain the FAR software?

02:10:21 adam child: So could we buy silver on the basis of your gold trade if silver follows gold 80 percent of the time

02:10:27 MJ W: A big shout out to Huifang for her FAR GT tutorial this week!

02:10:37 Rita Perea: Great! Thank you!

02:10:37 Merriman Market Analyst: Yes, I think so

02:10:38 Din Uppal: What do you think of Cathie Wood and Ark.

02:10:38 MJ W: Thank you!!!

02:10:39 Martha Geiger: THAT would be awesome, Gianni

02:11:03 Hui Fang Boo: Welcome, MJ.

02:11:57 Martha Geiger: Ray- which silver fund do you trade?

02:13:59 adam childs: Ark is something for the long term

02:14:11 Din Uppal: Very good points on Ark, thank you.

02:15:00 Ibrahim Koné: You can buy ark etf yourself

02:15:40 Martha Geiger: What do you see uranium doing in the future?

02:15:40 adam childs: It would make a good study

02:15:54 adam childs: ARk

02:17:21 Maya Bothe: Me too, Ray

02:18:32 lian handaja: how about equity/stocks paying dividends to keep up with inflation?

02:20:03 Daniel Ineichen:also, Floating rate assets

02:20:22 Daniel Ineichen:some structured credit asset for instance

02:21:13 Rita Perea: @Daniel I sent an email to you today

02:21:15 Eleonore Charrez: but with current interest rates bonds are not really attractive...
the high yielding bonds are rather subject to bankruptcy...

02:21:20 MJ W: thanks everyone!

02:21:23 adam childs: Thank you

02:21:27 Eleonore Charrez: Thanks !

02:21:30 Joseph H: Thank You

02:21:32 lian handaja: Thank you

02:21:32 Hui Fang Boo: Thanks!

02:21:33 Ali Alvarado Atias: Thank You

02:21:34 Rita Perea: Really great class today! Thank you!
