00:20:48   Merriman Market Analyst: Hi Rita and all!

00:26:53   MJ W: In FAR GT how do you give it a date range for your baseline?

00:28:22   MJ W: thx

00:32:00   Matthieu Kaiser: volatility seems to be greater around the équinoxes?

00:32:49   Matthieu Kaiser: Pisces/Aries and Virgo/Libra

00:34:35   Pouyan Zolfagharnia: Gianni the rows don't add up to 1235

00:34:56   Pouyan Zolfagharnia: they are about 600

00:35:33   Matthieu Kaiser: maybe that is for highs or lows only?

00:38:31   Merriman Market Analyst: one high and one low on avg every 15 days is the "sweet spot" I think for using this data for trading purposes

00:39:03   Danica Cordell-Reeh: Would this pattern be considered a reversal 123456. 3.   45678. So the reversal was only one day? That assumes 3 was the law fir the day not open or closed.

00:44:34   Daniel Ineichen:just to clarify - those values are still conditional upon sun being in libra. means we might have an interesting Sepember in 22

00:44:41   Pouyan Zolfagharnia: Would you pay much attention to Jupiter and Saturn?

00:52:21   Daniel Ineichen:Ray, Gianni, what is your experience about narrowing These timeframes further down. Does the moon Ingress Plays a role? does it differ from sign to sign? is it the moon in the middle of a certain sign?

00:53:42   Matthieu Kaiser: generally speaking, have you noticed larger values for new/full moons (regardless of the signs)?

00:54:11   Merriman Market Analyst: Yes, I use it com bination with the natural lunar cycle we presented in class 1 of this clurse.

00:54:32   Merriman Market Analyst: Course. first 20 degrees can be be one way last 10 degrees can be another.

00:55:46   Matthieu Kaiser: thanks

00:56:00   Daniel Ineichen:great, thanks a lot!

01:00:44   lian handaja: add that with the middle date of Mercury Rx in Oct.

01:25:53   Ali Alvarado Atias: The dilemma if an instrument will fall, make a trough, or continue to decline into a bearish date, it should also be considered what type of price action is the instrument in question in coming into this date. if in a strong multi year Uptrend, this bearish date might just bring a correction and reverse quickly, vs another scenario where previously it was a persistent downtrend might be more dramatic decline... my 2 cents 👍

01:27:25   Ali Alvarado Atias: Excellent ! TY

01:30:17   Ibrahim Koné: Also the IPO is not the birth of the company

01:32:16   Din Uppal: Did Ray enter the Silver trade last week ?

01:32:19   Matthieu Kaiser: but at the end of the day, you trade the stock, not the company

01:32:21   lian handaja: Ray & Gianni, what is your take on silver? It made an isolated low on Mon, and seems to loose gas after Fed's announcement and tested that low on Fri.

01:33:41   Matthieu Kaiser: and the stock price can decorrelate from the company Fundamentals for long (exactly the same as capital markets Don't fully correlate with macro Fundamentals)

01:34:02   Daniel Ineichen:and on bitcoin / eth. will they be at Risk of a downward reversal during the Oct period despite having made new lows just recently?

01:41:24   MJ W: Can you please show how to give a date range for your baseline?

01:43:22   Danica Cordell-Reeh: Does it pull the information for example BTC and other coins?

01:45:04   MJ W: can I input the start date?

01:45:48   Ibrahim Koné: The data pulled from the internet is coming from what source is that yahoo finance?

01:46:19   Danica Cordell-Reeh: Can you look for days where it increased x% and also decreased x% on the same day

01:46:46   Abhishek Singh: How do you search or get the Ticker / Symbol not known

01:46:57   lian handaja: how do you minimize the chart? and change the chart to weekly or monthly?

01:50:45   Rita Perea: ETHUSD

01:52:12   Danica Cordell-Reeh: Cardamom is on Coinbase

01:52:21   Hui Fang Boo: I usually go to yahoo finance and use the same symbol used in yahoo finance

01:52:39   Rita Perea: 2010 for BTC

01:53:27   Hui Fang Boo: I managed to download data back to 2010 from tradingview

01:54:05   Joseph H: data is available on blockchain.com as csv file

01:54:35   Rita Perea: And on CoinCodex as a csv file

01:54:51   Ali Alvarado Atias: Will Far work from 3rd party Data vendors (IQ Feed)? TY

01:55:45   Hui Fang Boo: It's blx

01:55:58   Hui Fang Boo: BLX for the old btc data

01:56:03   Hui Fang Boo: In trading view

02:01:00   Danica Cordell-Reeh: Can you do both   Went down 12% and also went up 12% on same day. And export the dates

02:02:38   Abhishek Singh:Symbol is BraveNew Coin Liquid Index on TradingView (BLX) has data from July 2010

02:03:17   Joseph H: https://www.statista.com/statistics/647523/worldwide-bitcoin-blockchain-size/   (data from 2009-2021)

02:06:13   Vincent Wang: Say platinum

02:11:18   Joseph H: is there is any way to upload data manually?

02:16:26   Ali Alvarado Atias: If one is interested only in the Stats to perform the Quantitative Studies, is there a version of FAR available just for this? (Since most have already another software with charting and most TA indicators)

02:18:00   Ibrahim Koné: Does the program can be installed on any windows version 7, 10, 11?

02:18:35   Danica Cordell-Reeh: Do you have to have volume to import?

02:19:33   Vincent Wang: Thank you Gianni

02:19:46   Matthieu Kaiser: +1 on Ali's question

02:20:58   MJ W: how do you get the data into the metastock folder? mine was empty when I tried to pull it through?

02:22:37   MJ W: follow up--do I create Local File or use Legacy? (Thank you Fang for this idea)

02:23:15   Danica Cordell-Reeh: What is Legacy?

02:23:48   Rita Perea: Carlos, what is the Real Time symbol we would use for an Ethereum chart, please?

02:24:57   Daniel Ineichen:could we get a standardized Price feet for using FAR instead? I think the Price source would be critical

02:25:15   Daniel Ineichen:*feed

02:26:01   MJ W: that folder was empty Ray

02:27:22   Hui Fang Boo: MJ, we can do a fb zoom screen share and I can try walk you through

02:27:23   MJ W: I'll try it again

02:28:25   Ibrahim Koné: Does the data from interactive broker is being directly downloaded from IB or it is the same process that with metastock?

02:28:44   lian handaja: Can you repeat the steps to bring up MMA Studies?

02:28:55   MJ W: @Huifang thank you

02:29:55   Rita Perea: Thank you Carlos!

02:31:22   Merriman Market Analyst: Lian, go to the tab that says "planets" at the top, click on MMA studies

02:31:49   Hui Fang Boo: Most welcome, MJ. Drop me a msg and we'll organise a time

02:33:19   Matthieu Kaiser: so it means that filtered waves are computed based on end-of-day prices?

02:33:20   Rita Perea: I subscribe to Carlos' real time data. It works very well.

02:34:43   Daniel Ineichen:thank you Rita. me too (upon your comment in the chat here a few weeks ago). appreciated! just wondered because sometimes the data history isn't the longest.

02:35:20   Ali Alvarado Atias: Ray, can you please go over all the MMA Studies that are/will be available in FAR? TY

02:38:39   Rita Perea: @Daniel, can we connect via email? Rita@RitaPerea.com I was able to convert and import longer data history from another source.

02:39:11   Daniel Ineichen:yes, I will contact you! Many thanks!

02:40:21   Hui Fang Boo: For those of you who are on the fb gap, I have uploaded tutorials on how to import data from metasotck and others

02:40:36   Ali Alvarado Atias: Will it display the next CRD date in Stocks for example? or do we need to find this out manually?

02:40:39   Ali Alvarado Atias: TY

02:40:58   Hui Fang Boo: *FB group

02:43:51   Ibrahim Koné: It there any trials period to test FAR ?

02:47:24   Ali Alvarado Atias: TY!

02:47:28   MJ W: Thank you Carlos---very helpful!

02:47:39   Hui Fang Boo: Thank you

02:47:41   Daniel Ineichen:Thank you!

02:47:44   Dian Brown: Thank you Carlos.

02:47:45   Rita Perea: Excellent! Thank you Carlos, Ray and Gianni!

02:47:48   Pouyan Zolfagharnia: Thank you Carlos

02:48:11   Ali Alvarado Atias: TY Ray, Gianni, Carlos, excellent!

02:48:35   Ibrahim Koné: Thank you everyone

02:53:50   Dian Brown: Thank you all!!

02:53:51   Pouyan Zolfagharnia: Thank you

02:53:53   Daniel Ineichen:thank you!

02:53:57   maya bothe: Thx, bye

02:54:01   Abhishek Singh:Thanks
