

MMTA Course Five – Review of Geocosmics and Cycles Plus Price Objective Calculations

**IMPORTANCE OF LEVEL 1
SIGNATURES IN IDENTIFYING
POTENTIAL GEOCOSMIC CRITICAL
REVERSAL DATES (QUANTITATIVE)**

Module Lesson Three

Disclaimer and Appropriate Use of Course Information: The content and instruction made throughout this course are provided solely for reference and educational purposes to students, traders, and analysts (Participants).

By participating in this course, you agree that all trading or investment decisions made by Participant are at the sole risk to the Participant and Participant assumes all responsibility for any and all decisions made in financial markets.

By taking this course, you also acknowledge that trading in financial markets involves risk of loss as well as the potential for gains. As a student, trader, or investor, you agree to assume all responsibility for any and all actions you initiate in financial markets, and neither the authors, instructors, or publishers affiliated with this course, or anyone whose work is cited or referenced in the course, assumes any liability whatsoever for your decisions.

Futures or options trading are considered high risk. Information provided in the MMTA course or MMA publications is provided with sincere intent, and according to MMA's own proprietary and copyrighted processes and methodologies. All content and information provided is the intellectual property of MMA and MMTA developed by Raymond Merriman and his 40+ years of experience, observation, and research. Students may use this material responsibly and solely for their own trading and investment planning. They may cite brief sections of these studies with proper credit to MMA or MMTA. However, any other reproduction or use of this copyrighted material must be with the written consent of MMA.

IDENTIFYING POTENTIAL GEOCOSMIC CRITICAL REVERSAL DATES (QUANTITATIVE)

- Reviewed initial steps to develop trading plan:
- The first step is to identify the occurrence of the last primary cycle bottom (trough).
- Count forward and identify the current week number.
- Next, identify which phase of the primary cycle the market is in.

Which phase?

Bullish or bearish phase?

- Determine what type of the three basic patterns is forming for this primary cycle.

IDENTIFYING POTENTIAL GEOCOSMIC CRITICAL REVERSAL DATES (QUANTITATIVE)

- Next step (5) is to determine whether CRD in effect
- Any market can reversal from 2-week or greater high or low
 - Supersedes solar-lunar periods
- Orb +/- 3 days
- Determine if CRD is in effect in the following practicum

IDENTIFYING THE STRONGEST UPCOMING LEVEL 1 SIGNATURES, AND WHETHER THEY ARE IN AN APPLYING OR SEPARATING PHASE

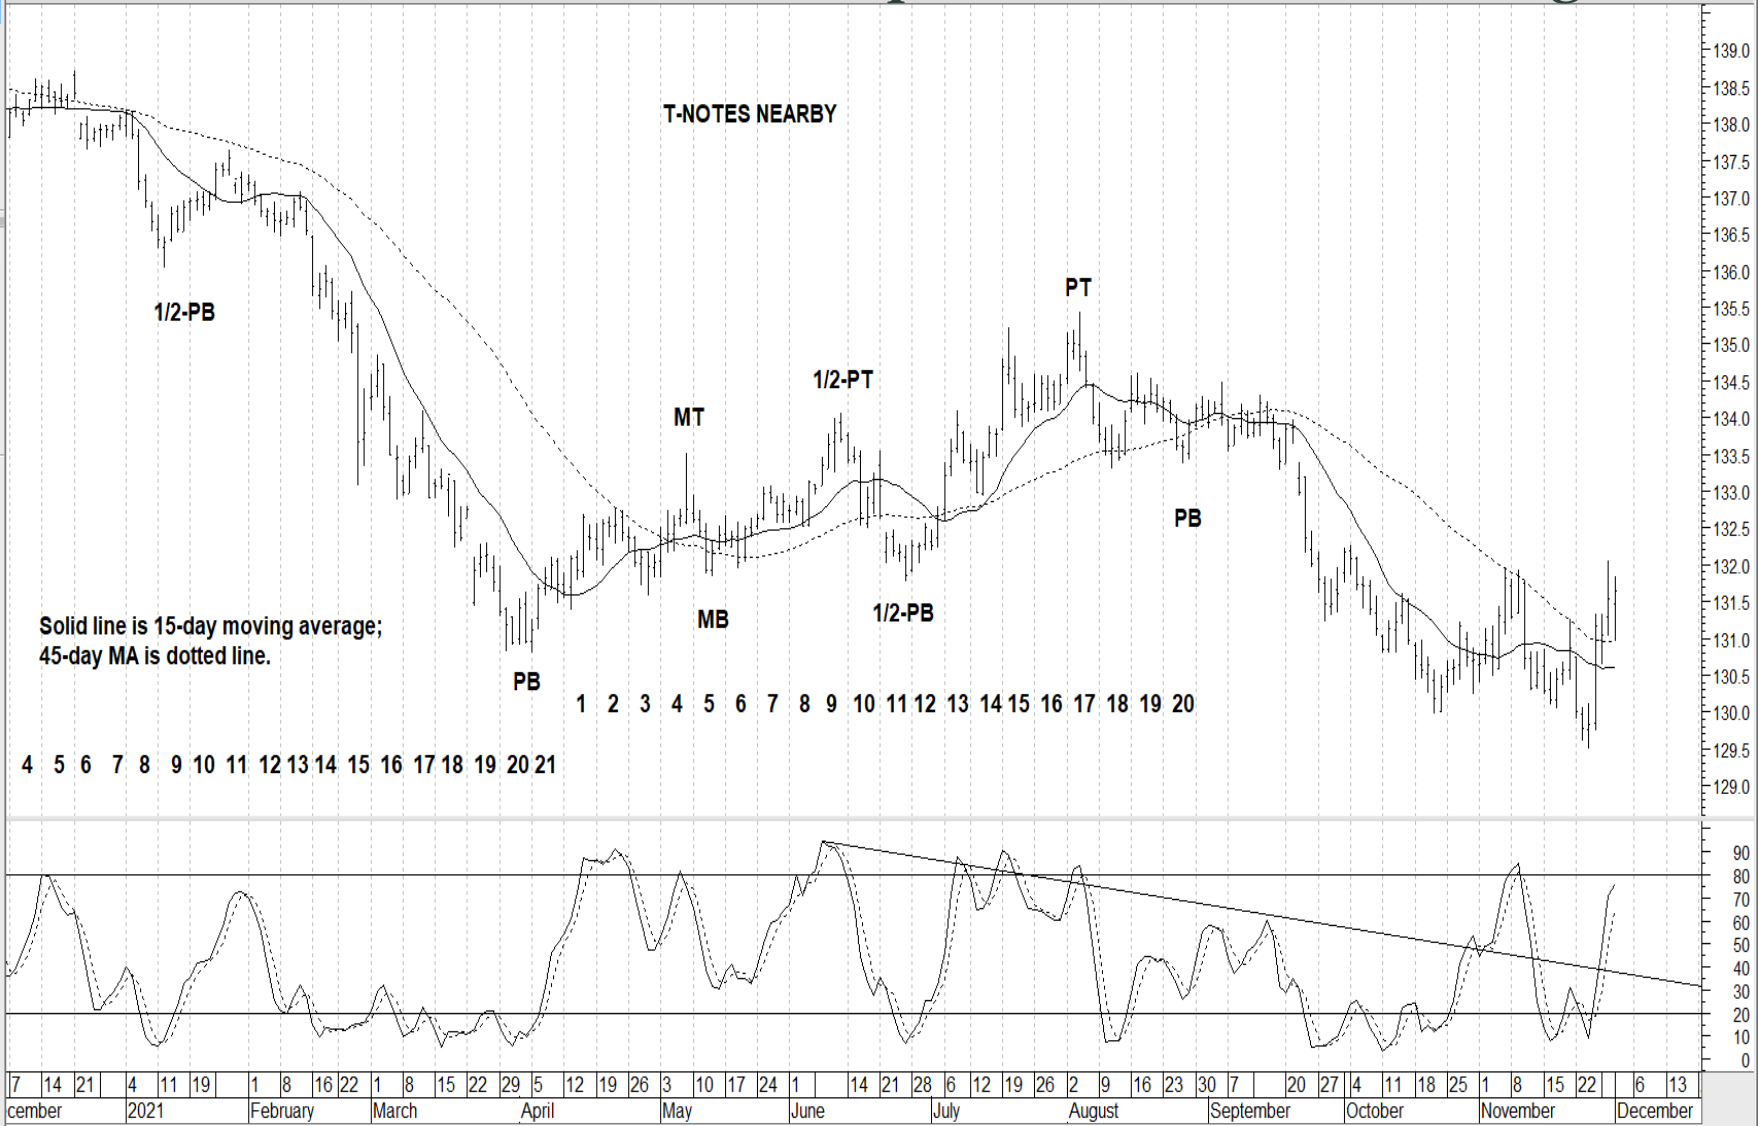

- Identify midpoint of cluster
- Equally important to note individual aspects
 - Level 1 signatures especially
- Different planets apply to different markets
- If we assume, for example, that Jupiter/Neptune rule Crude Oil, we might consider Rx and Direct motions as Level 1 for Oil, but another level for a different market

IDENTIFYING THE STRONGEST UPCOMING LEVEL 1 SIGNATURES, AND WHETHER THEY ARE IN AN APPLYING OR SEPARATING PHASE

- The following again represents the list of geocosmic signatures in effect in August 2021

02 Level 1 Stocks, SU/SA:180
03 Level 1W Stocks, VE/UR:120
07 Level 1 Stocks, SU/UR:90
10 Level 3 Stocks, VE/NE:180
11 Level 2 Stocks, VE/PI:240
19 Level 1 Stocks, UR Retrograde
20 Level 1 Stocks, SU/JU:180
22 Level 1W Stocks, MA/UR:120
23 Level 1W Stocks, VE/SA:240

How would you expect these signatures to generally affect markets based on a qualitative understanding?

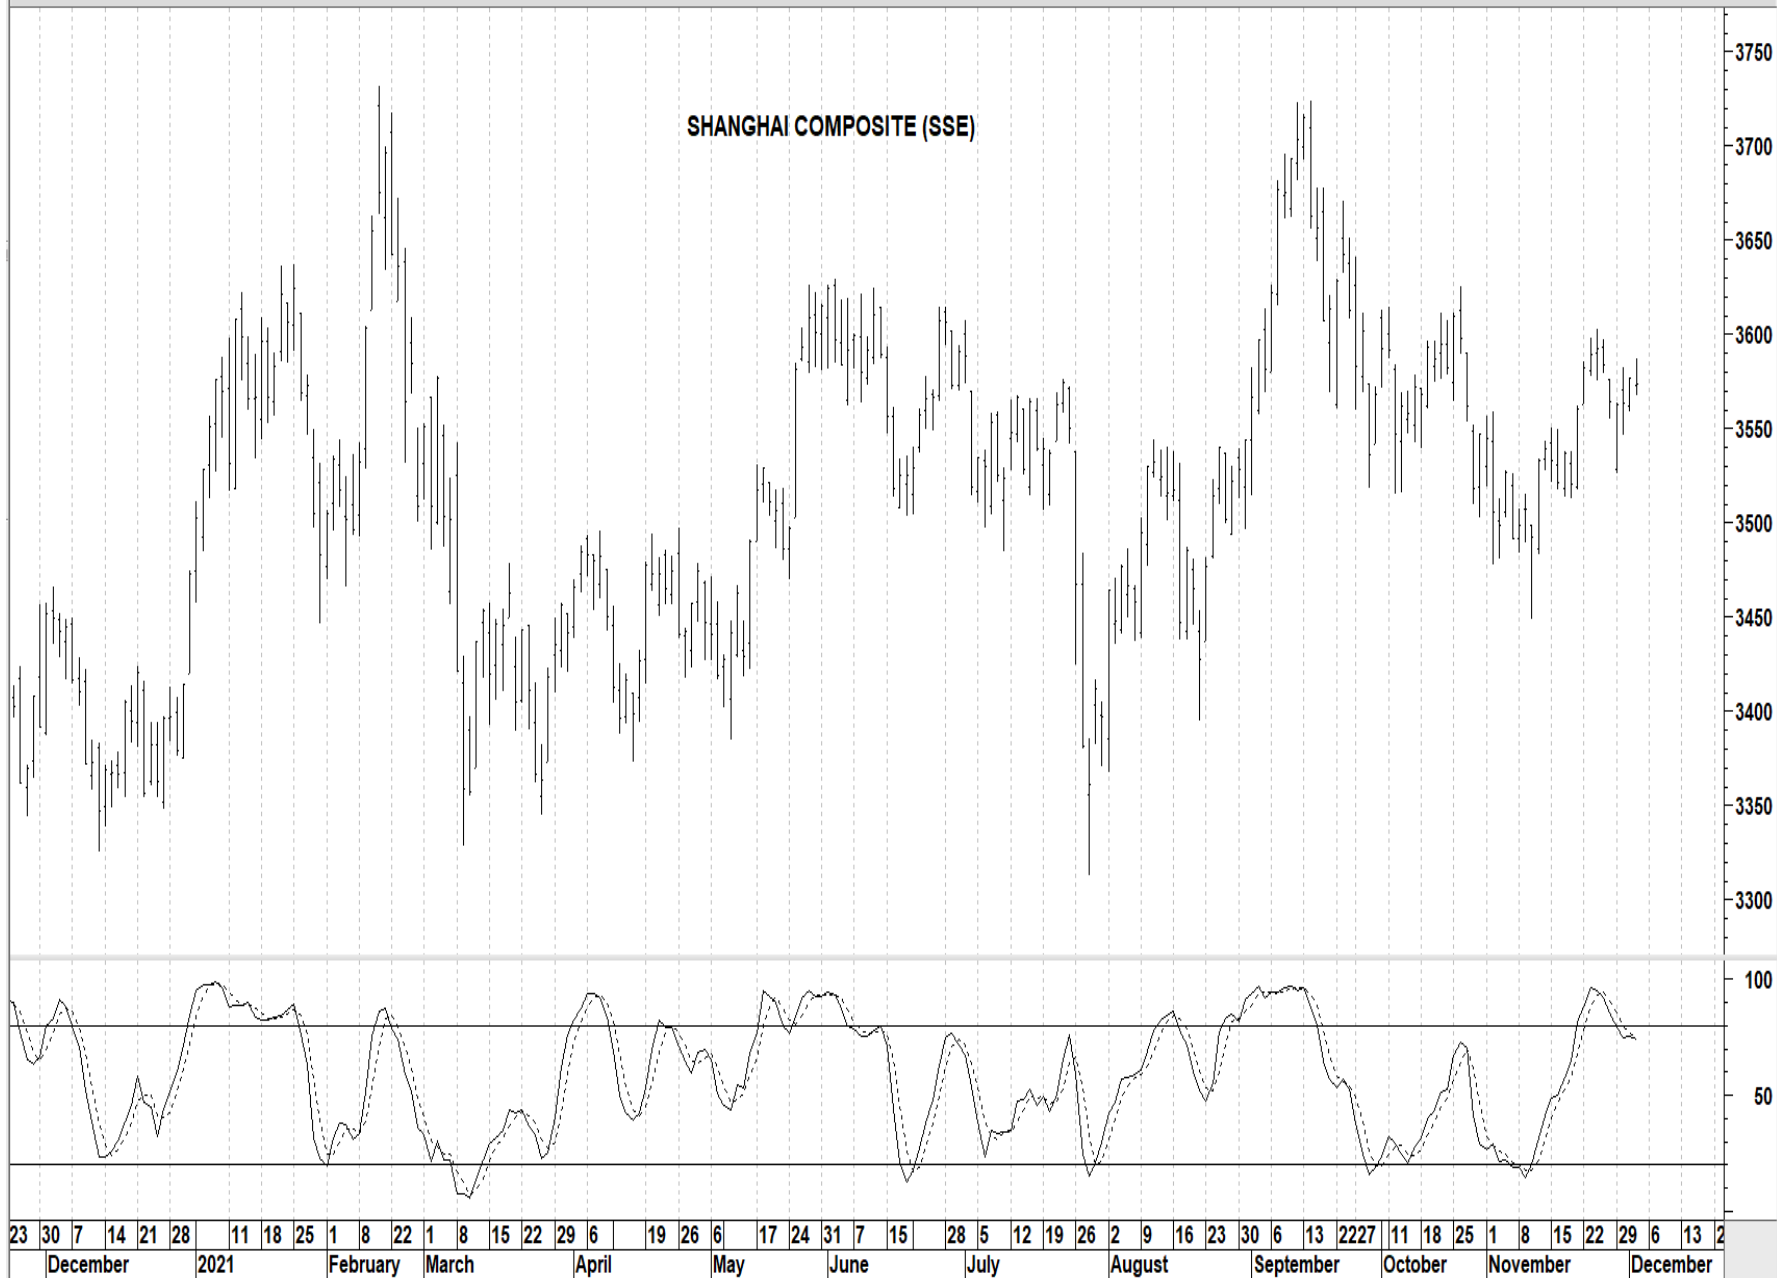

Second set applies to Crude Oil, August 20-23 CRD (Sun/Jupiter opposition) but also stocks like Nikkei and Shanghai Composite.

QUIZ #3

- 1. Starting January 1, 2021, identify the primary cycle troughs and crests in the SSE and list any Level 1 signatures within 8 trading days of each shown in this chart.
- 2. In the Japanese Nikkei, starting January 1, 2021, identify primary, half-primary, and major cycle crests shown in this chart.
 - A: List any Level 1 signatures within 8 trading days of the primary cycle lows and highs and at least one half-primary cycle trough and crest.
 - B: If you have access to FAR or ephemeris, try to identify any CRDs nearby

SHANGHAI COMPOSITE (SSE)

End of Lesson 3
