

00:17:37 Matthieu Kaiser: hello :-)

00:18:00 Merriman Market Analyst: Hi Mattieu and everyone

00:19:49 Eleonore Charrez: Would you still accept the IBEX, even though there are only 25 years ??

00:28:21 Eleonore Charrez: yep... it started late 90s

00:28:53 Eleonore Charrez: then we could do f.ex. Dow or S&P and add the IBEX ?

00:29:21 Eleonore Charrez: good idea :) thks

00:58:56 Wyatt Fellows: are you classifying the covid crash low as a contracted 6 year cycle low??

01:00:52 Lian Handaja: The MA is a lag indicator. How long do you usually wait to change the strategy for LT investment?

01:02:15 Daniel Ineichen:Quick question: you are taking the simple moving average, aren't you?

01:03:42 Matthieu Kaiser: Do you use other indicators to call tops and bottoms earlier?

01:04:28 Merriman Market Analyst: Yes Dan simple moving average

01:07:02 Renato Ricks: It would be interesting to see historical price extremes from the ma before it reverts to the mean

01:07:54 Wyatt Fellows: like standard deviations above and below?

01:07:58 Ali Alvarado Atias: Bollinger bands

01:07:58 Renato Ricks: yep

01:08:15 Renato Ricks: based on standard dev

01:08:17 Renato Ricks: yep

01:08:31 Ali Alvarado Atias: You can also adjust the SD in most Platforms

01:10:53 Danica Cordell-Reeh: Would not a long term hold could trigger a massive tax liability and also how does it look if factor in the decline in the purchasing power of the dollar.

01:14:22 Martha Geiger: I understand that the inflation rate is actually much higher if you use the same basket that was used in years past. They have diluted the basket.

01:14:25 jeff hanus: I thought stocks had to be held 18 months to be long term? please tell me I am wrong

01:15:19 Lian Handaja: it is 12 months or more for LT

01:15:44 jeff hanus: thank you!!!!

01:17:26 Wyatt Fellows: no

01:21:23 Lian Handaja: yes

01:21:43 Eleonore Charrez: but then, since Greenspan, there are the FED puts in place...
son downmoves are basically limited in time and downmoves.

01:21:52 Din Uppal: We cannot see your screen

01:21:55 Martha Geiger: I still can't see your screen

01:22:01 Wyatt Fellows: nope

01:22:10 Lian Handaja: yes

01:24:25 Rita Perea: Will we learn about the Exponential Moving Average when we get to
Trading plans?

01:42:06 Martha Geiger: When was that demo? I would like to go to that recording and see it-
missed it.

01:42:32 Merriman Market Analyst: It was in Couse 1

01:43:03 Martha Geiger: thanks.

01:44:27 Matthieu Kaiser: is there a hierarchy among signs of a reversal (time band of
crests/troughs, CRD, price overlaps)?

01:45:03 Wyatt Fellows: more the merrier

01:46:12 Matthieu Kaiser: ok - so you don't favour any one of them in your practice?

01:46:17 Matthieu Kaiser: no

01:46:22 Matthieu Kaiser: Gianni got it

01:47:51 Matthieu Kaiser: oh ok - so there is an order - thanks !

02:00:15 Pouyan Zolfagharnia: and a double top too!

02:00:27 Merriman Market Analyst: Yes!

02:01:44 Martha Geiger: Could we look at the NASDAQ at some point with this?

02:01:54 Merriman Market Analyst: Yes!

02:08:48 Matthieu Kaiser: a wedge

02:09:52 Eleonore Charrez: 12-14 feb is a CRD

02:10:12 Lian Handaja: looks like a head and shoulder in daily and monthly.

02:10:46 Eleonore Charrez: and moon moved to cancer, which is , given your charts of lunar
ccycles, bearish

02:12:06 Eleonore Charrez: How would you interpret the fact that mercury, venus, mars
and pluto are in capriccorn ?

02:19:19 Wyatt Fellows: any weight given to the fact that you had divergence between dow and snp last week?

02:19:51 Pouyan Zolfagharnia: Helio centric Venus studies support that too. Significant cycles lows form with Helio Venus is Leo.

02:22:50 Matthieu Kaiser: so you weigh the bullish scenario more than the bearish one?

02:23:32 Pouyan Zolfagharnia: I do

02:24:07 Pouyan Zolfagharnia: I put the prior observations on FB

02:24:07 Rita Perea: Ray, where is your stop?

02:24:08 Matthieu Kaiser: thanks Pouyan - I'd be glad to have Ray's view

02:31:37 Danica Cordell-Reeh: What about the week of March 14th given the aspects

02:32:26 Wyatt Fellows: with so many possibilities with respect to the cycle count I think if your gonna be long futures then owning puts underneath wouldn't be a bad play until the picture becomes more clear

02:35:37 Danica Cordell-Reeh: Like mid march to buy or sell?

02:36:11 Wyatt Fellows: pouyan...is your email pouyan.z@gmail.com?

02:37:12 Pouyan Zolfagharnia: It is Wyatt

02:37:46 Martha Geiger: silver the same pattern?

02:37:56 Wyatt Fellows: tks

02:39:19 Abhishek Singh: Thanks

02:39:19 Rita Perea: Thank you!

02:39:20 Matthieu Kaiser: thank you

02:39:21 Lian Handaja: Thank you

02:39:23 Martha Geiger: Thanks fellas!

02:39:23 Ali Alvarado Atias: TY!

02:39:26 Yating Hu: Thank you!

02:39:27 adam child: thank you
