

CRYPTO REPORT

MMA WEEKLY CRYPTO REPORT WEEK OF MARCH 28, 2022

Comments: Please take a moment to view my free weekly geocosmic column on financial markets. Alternatively, you can go to www.mmacycles.com and then choose Weekly Preview. We are pleased to announce that this free weekly column is also available in [German](#) – [Dutch](#). Several sites post the weekly column in English too, including <https://www.neptunecafe.com/merriman>

GEOCOSMIC CRITICAL REVERSAL DATES (CRDs)

These dates affect all markets. They are the midpoints of geocosmic clusters and have a normal orb of three days either side (82% rate of frequency). Sometimes they expand to as much as six days (90+% frequency with that orb). The idea is to see a new two-week or greater high or low, and then a reversal. It is especially effective when major, half-primary, or primary cycle troughs are due. These are more important than the solar-lunar reversal dates. The more stars, the greater the historical correlation with a cycle culmination. For more information, please read Volume 3 of the Stock Market Timing series. Below is the date of the midpoint and in parentheses the length of time containing the geocosmic signatures (known as a “cluster”). If the cluster is long (more than 15 days), there may be other possible reversals, based on tighter geocosmic clusters, within the greater cluster.

Mar 18-21* (We are here. Secondary low in stocks, low in Crude Oil, T-Notes, Euro, break down in Yen)**

April 1* (Venus and Mars conjunct Saturn)

April 12 (May stretch from April 4-15)**

May 6-9***

These periods are usually more important than the solar/lunar reversal zones, and usually more accurate because they have a wider orb of time (+/- 3 trading days vs +/- 1 trading day for solar/lunars). They will correspond more often with major, half-primary, or full primary cycles, whereas lunar reversals need only correspond to 2.5% reversals.

ABBREVIATIONS:

CRD = Geocosmic Critical Reversal Date

ATH = All-Time High

MA = Moving Average

PB = Primary cycle bottom

PT = Primary cycle top

MB = Major cycle bottom

MT = Major cycle top

TB = Trading cycle bottom

TT = Trading cycle top

BTC (Bitcoin/USD): We use the cash bitcoin market for our weekly analysis, based on prices as of *Friday evening 10:00 PM BST (London)*. We use the futures front month for daily analysis, based on its close around 5 PM EDT.

The weekly close was bullish. And the close was above the TIP for the 2nd week, which means it remains neutral.

This week's TIP is 40,238. It will be upgraded to a trend run up if it closes above there this week.

Weekly support is 41,673-42,260.

Weekly resistance is 46,293-46,879.

Bullish crossover zones remain in effect at 35,383-39,682, 32,317-33,295, 19,639-20,502, 16,776-17,143, 11,624-12,042, 10,850-10,885, 9932-10,770, 9304-9395 and 4280-4352. Bitcoin closed below another recently at 57,787-57,864, so that is a resistance zone.

Bearish crossover zones remain in effect at 42,755-45,315 (it closed there). Bitcoin closed above bearish crossover zones previously at 7710-8442 and 4819-4841, so these are support zones.

Preferred Primary Cycle Labeling: This starts the 9th week of a newer 33-week (range 26-40 weeks) primary cycle following the low of 32,950 on January 24.

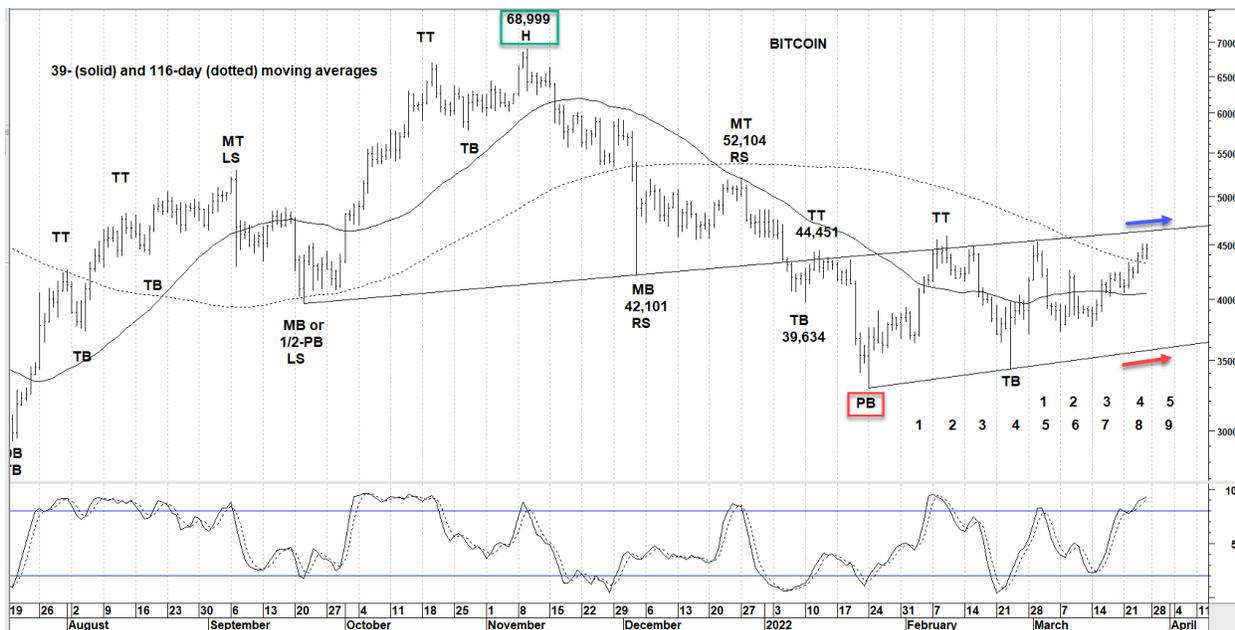

It also starts the 9th week of the first 9-14 week major cycle, so the crest is due at any time, to be followed by the major cycle trough which is also due at any time in the next 5 weeks. The crest will come first, and the decline to follow would likely be at least an 18% drop off the high.

The main question is whether the crest of this first 11-week major cycle will also be the crest of the primary cycle, since this is likely the last primary cycle before the decline to the 4-year cycle low occurs, which is due later this year, after July.

Alternate Primary Cycle Labeling: There is none. However, we should note that this also starts the 5th week of the second 4-7 week trading cycle within the major cycle. This suggests that the major cycle low is due in the next two weeks. Again, the crest will happen first.

Chart indicators and Technicals: Stochastics are now overbought and it is getting late in the 9-14 week major cycle as well as the 4-7 week trading cycle, so once we get a new high for the major cycle crest (above 45,850), a rather sharp 1-2 week decline is likely to begin soon after.

Bitcoin has now taken out the 116-day MA. As stated before, *"If this is a newer primary cycle, per our preferred labeling, then Bitcoin is likely to test or take out the 116-day MA now at 43,993. In fact, it would likely exceed the high of this new cycle, which so far has been 45,855."*

Our bias continues to be that this primary cycle will end up being bearish. However, I still think we have higher to go, maybe this week, before a decline of substance. As stated before, *“If this is the second half-cycle to the greater 15-month cycle, and the 4-year cycle has topped out, this rally could still be strong with an upside target of 49,172-63,592. Getting the upper end of that range would set up a nice head and shoulders pattern, with this rally being the right shoulder. In this possibility, the high would be completed around Jupiter conjunct Neptune, April 12 +/- 1 month. This is my favored outlook right now. If this occurs, we now have another upside target of 55,201 /- 2626.”* I am not sure this rally can last that long now. We could see a spike up above 46,000 early this week, and then a sharp decline of 18-20% or so, and then another big rally into April 10-15 or even April 25-30, the latter being a solar eclipse and Venus conjuncting Jupiter and Neptune.

Geocosmics and lunars:

Venus and Mars will conjunct Saturn, March 29-April 5. That is a good time for a major cycle low or high. I prefer low because of Saturn. We like to buy markets that decline into Saturn aspects like these. But historically, Venus and Mars aspects to Saturn have often coincided with a high too.

After that we have Jupiter conjunct Neptune April 12, followed by Venus conjuncting each April 27-30. Given that Jupiter and Neptune can indicate speculative frenzies, and Bitcoin is a good candidate to project a frenzy, I am inclined to think Bitcoin could top out by the end of April. As stated last week, *“I am not going to get aggressively bearish unless we get somewhere between 48,000 and 64,000 then.”*

The lunar sign points to a high March 25-26 +/- 1 day (now) and indeed Bitcoin has rallied into here. We could see a 10-12% pullback here, perhaps into Venus conjunct Saturn early this week.

LUNAR REVERSAL SIGNALS (FOR CASH): These values pertain to the Moon’s position at noon GMT instead of noon NYC, since GMT is the change of date associated with Bitcoin.

The following table shows two sets of the weighted values. The left-hand set is of 12% or greater reversals based lunar days from our studies, now going back to July 17, 2010. The right-hand set includes 10%, or greater reversals values of Moon signs only since Uranus has been in Taurus. These numbers represent potential for reversal, where anything above 120 has a high probability of an isolated top or bottom to trade opposite of, for a 12% reversal. We may have to adjust this first column down to 115 now that we have added another 4 years of data. * represents a strong reversal possibility. The more * the stronger it is (however, right hand column can only hold one * for now). # represents a low likelihood for a reversal. The more #, the less likely a reversal or big range day. The best set up is when both sets of numbers for each sign agree with a reversal, low, or high. Keep in mind that these are purely lunar days, not solar/lunar days, as with metals and stocks. Please note that our studies based on noon GMT, and not Eastern time, since Bitcoin's day is based in GMT, not Eastern Time, and noon is the middle of the trading day. But since the high or low of the day may happen before or after noon, and the Moon can move up to 7 degrees in half of a day, we have to allow a one-day orb for these dates to manifest a correct setup.

The lunar cycles for Bitcoin for the next few days are as follows:

	<u>Total cases since July 17, 2010</u>			<u>Total cases with Uranus in Taurus</u>		
	Reversal 12%	Lows	Highs	Reversals 10%	Lows	Highs
Mar 25-26	123.8*	112.5	135.0*	112.6	97.2	127.8*
Mar 27-28	71.2#	80.1#	62.2##	113.9	122.2*	105.5
Mar 29-30	79.9#	88.7	71.0#	91.0	61.2##	120.7*
Mar 31-Apr 2	97.1	97.0	97.1	87.0	73.0	100.9
Apr 3-4	89.5	62.6#	116.3*	79.1#	47.1###	108.6
Apr 5-7	71.4#	58.0##	84.7	101.5	78.6#	124.1*
Apr 8-9	109.9	143.6**	76.26#	93.7	172.8***	15.47###
Apr 10-12	120.0*	115.5*	124.7*	102.5	103.3	101.9
Apr 13-14	120.2*	140.6**	99.8	94.0	120.5*	67.9#
Apr 15-16	109.1	106.9	111.5	132.4*	106.7	157.8***

Strategy: Position traders are long with a stop-loss on a close below 28,800 after covering and buying back at lower prices several times. Cover 1/3 at 55,000 +/- 600 if offered.

Aggressive traders are fully long with a stop-loss on a close below 28,000 and would cover 1/3 at 49,500 +/- 600.

Very Aggressive Traders are flat and may buy at 37,500 +/- 600. with a stop-loss on a close below 33,000.

ETH (Ethereum vs U.S. Dollar): We use the spot Ethereum market for our weekly analysis, based on prices as of Friday evening 10:00 PM BST (London).

Last week's close was mostly bullish. And the close was above the TIP for the 2nd week, which means it remains neutral.

This week's TIP is 2878. It will be upgraded to a trend run up if it closes up this week.

Weekly support is 2897-2938. A weekly close below this range will be bearish. A trade below followed by a close back above is a bullish trigger.

Weekly resistance is 3275-3315. A weekly close above this range is bullish. A trade above followed by a close back below is a bearish trigger.

Bullish crossover zones remain in effect at 2225-2646, 1969-2076, and 787-902. These are support zones. It closed below another recently at 3162-3347, so that is resistance and held last week's rally.

A bearish crossover zone remains in effect at 3028-3090. It closed above bearish crossover zones recently at 2278-3086 (that held the low) and 2157-2387, so these are also support zones.

The preferred labeling: This now starts the 9th week of a newer 26-40 week primary cycle off the low of Jan 24, at 2157.

In this labeling, it also starts the 5th week of the second 4-7 week trading cycle, which will coincide with the 9-14 week major cycle trough coming due in the next 5 weeks and maybe next two weeks.

As stated last week, "I like the way the bullish crossover zones have held, and stochastics are pointing straight up, suggesting higher prices to a major cycle crest before a rather sharp 1-3 week decline to the major cycle low." But now stochastics are overbought, signaling a high is nearby.

The alternate primary cycle labeling: There is none. The main question is whether the high forming now will be the primary cycle crest as well, which would mean a 6-month decline would be readying.

Notes: Stochastics are now overbought and readying for a pullback in prices.

Ethereum closed above 3000. As stated before, *“The double bottom at 2157 and 2300 is still very important support. On the upside, it needs to close above 3000. I think it can do that and then test 3500 (or higher) by April 12, when Jupiter will conjoin Neptune.”* I can make the case for a pull back here, maybe 10-12%, maybe more like 18-20%, and then another rally into April 12 or April 25-30 when Venus conjoins Jupiter and Neptune under the solar eclipse.

Strategy: Position traders are long with a stop-loss on a close below 1700 or 2157, depending on your risk allowance after covering 1/3 so far and then buying back. Cover 1/3 at 3500 +/- 60 if offered.

Aggressive traders are long with a stop-loss on a close below 2157 after covering 1/3 so far. Cover 1/3 at 3300 +/- 60 and another 1/3 at 3500 +/- 60 if offered. If filled on any, you may buy back on a decline to 2650 +/- 60.

ANNOUNCEMENTS

NOTE 1: THE NEXT ISSUE OF THE [MMA Monthly Cycles Report Plus+](#) written by Pouyan Zolfagarnia will be released this week, March 28. The mid-month addendum to the MMA Cycles report is only available for subscription to those who also subscribe to the MMA Monthly Cycles Report. If you wish to try this month's addendum, along with the March issue of the MMA Monthly Cycles Report (which featured a special long-term update on Gold), sign up online and select the subscription option: [March Issue One Time Payment + Addendum](#) for only \$55. That will give you both the most recent copy of the MMA Cycles report, Special Long-Term Gold Update, and the MMA Cycles Report addendum coming out this week.

NOTE 2: Antonia Langsdorf (my wife and well-known German Astrologer) just wrote an excellent article on **The Astrology of the Ukraine Conflict** with analysis of the charts of Vladimir Putin, Volodymyr Zelensky, Ukraine, and the relationship of each to the “Great Mutation” (Jupiter/Saturn conjunction in 0 Aquarius) of December 21, 2020. This article available is now on our website. To read it, [click here](#).

NOTE 3: TUNE INTO MMA'S NEW WEEKLY [YouTube Channel](#) on the geocosmic climate related to financial markets hosted by MMTA Educational Director Gianni di Poce. The video is recorded late Friday night and posted then or early Saturday, depending on the editing process. These 5-10 minute video presentations review the market activity of the past week and offer a preview of the geocosmic signatures in effect for the next week and beyond. You may subscribe to MMA's [YouTube Channel](#) today at no cost and get announcements when each geocosmic market review is ready for viewing!

“Just a quick word to say your (Gianni's) weekly video on YouTube is really a great complementary format to Ray's letter. I find it interesting and masterfully delivered. Thanks to both of you for this!” M.K., Paris, France, Portfolio Manager.

NOTE 4: I will be interviewed by Antonia Langsdorf live, on Wednesday, March 29, on her “Cosmic Vibe” program. **The subject will be on the “Russian-Ukraine War: Now and In the Future.”** We will discuss the charts of Vladimir Putin, Volodymyr Zelensky, and Ukraine. The interview will be in English, and later she will post the interview with German translation for both hers and our German-speaking audience. To view this live interview, click <https://youtu.be/5Z-litVt0w8> at 4 PM EST, Wednesday, March 29. Looking forward to seeing many of you there! It is free. No cost.

NOTE 5: THE ANNUAL WORLDWIDE WEBINAR and Address on Forecast 2022 with Raymond Merriman took place on FEBRUARY 20, 2022. The recording is now available, still relevant, and highly recommended to view if you were not present. This broadcast updated financial markets since the Forecast book was written in November 2021, including the U.S. stock market, Gold, Silver, Crude Oil, Euro, Corn, Soybeans and Bitcoin. The cost for the recording is \$55.00 and includes the slides of the presentation. For more information or to order, go to [Forecast 2022 Webinar](#).

EVENTS

April 1: Ray Merriman will join Gianni di Poce on MMA's weekly [YouTube Channel](#) discussing the geocosmic climate related to financial markets. The video will be posted by Saturday morning. We will review the market activity of the past week and offer a preview of the geocosmic signatures in effect for the next week and beyond. *Like this free weekly column, this video is intended to be educational and there will be no cost.* You may subscribe to our [YouTube Channel](#) today and get announcements when each geocosmic market review is ready for viewing!

May 8, 2022: MMA'S ANNUAL FINANCIAL MARKETS UPDATE WILL TAKE PLACE MAY 8, 2022, 1:30 PM EDT: This broadcast will take place on Sunday, May 8, 2022 at 1:30 PM EDT (that's 10:30 AM PDT, 6:30 PM UK, 7:30 PM CDT. 2:30 AM Tokyo, 3:30 AM Sydney). In the comfort of your own home or office, you can tune into MMA's Annual Spring [Webinar](#) on Financial Markets. This 3-hour webinar (with two 5-minutes breaks) will give an intermediate-term update on several financial markets, including the U.S. stock market, Gold, Silver, Crude Oil, the Euro currency, Bitcoin and Soybeans. This will be an especially timely presentation because 1) the 12-year Jupiter orbital cycle will be making its first entrance into Aries on May 10, and 2) May 27-June 22 has been highlighted as one of the more probable times in 2022 for major moves in Bitcoin as well as several other financial markets. Joining Ray to share their outlook will be Ulric Aspegren (Euro, U.S. Dollar) and Gianni Di Poce (U.S. Treasuries, Crude Oil and Soybeans). Ray will be covering equities, metals, and Bitcoin. There will be a Q&A with attendees during this webinar. The cost to attend is \$55.00 and includes the slides of the presentation, plus access to the video recording of the event. If unable to attend live, you can still sign up, as everyone who orders the Webinar will receive the video recording following the live event. For more information, [click here](#) and SIGN UP NOW TO LOCK IN YOUR PLACE for this event!

August 25, 2022: 1:00 PM, Denver, CO, ISAR Conference, 4-Hour Pre-Conference Workshop by Raymond Merriman on "ASTROLOGY AND THE ART OF FINANCIAL MARKET TIMING: HOW TO FORECAST TRENDS AND MARKET REVERSALS." Financial markets offer objective means to test astrological validity. The Moon changes signs every 2-3 days and is valuable for short-term trading. Planetary stations and aspects identify longer-term market reversals. Approximately 4-5 times/year, markets will form important highs or lows, which are the most favorable times to buy and sell for position traders. This course provides research studies showing the correlation of astrological factors to short-term and longer-term financial markets. The focus will be upon stock markets, precious metals (Gold and Silver), and Bitcoin, and how to integrate astrology with cycle studies to attain optimal market timing skills. Visit <https://isar2022.org/schedule/> for further information and register for a great event!

Disclaimer and using this information properly: These comments are given to serve as a guideline for traders for each day and/or week. Comments and/or recommendations are based upon prices at end of the day or week. Traders are advised to use these only as guidelines - and use intraday analysis to establish positions in directions of comments given, so long as those support/resistance (entrance) areas look favorable according to intraday analysis as well. Support and resistance are areas for day traders to look to buy and sell intraday. No guarantees are made for accuracy. Futures trading involves risk of large loss as well as large gains, and

reader is solely responsible for any actions taken in markets, and neither the author nor publisher assume any responsibility whatsoever for reader's decisions. Futures or options trading are considered high risk.

Information is provided herein with sincere intent, and according to our own studies and methodologies. These reports are provided mainly for "speculators." By its very nature, "speculation" means "willing to take risk of loss." Speculators must be willing to accept the fact that they are going to have losing trades, many more than say "investors." That is why they are "speculators." The way "speculators" become profitable is not so much by high percentage of winning trades, but by controlling amount of loss on any given trade, so the average trade on winners is considerably more than the average trade on losing trades. MMA's comments can be of value to both speculators and investors. MMA's trade recommendations will be of potential value only to speculators.

Support may represent favorable risk/reward places to buy if the trend is up. If prices trade below support, then have a close back above, it is considered a bullish "trigger," and oftentimes represents a good buy signal. Resistance may represent favorable risk/reward places to go short if the trend is down. If prices trade above it, then have a weekly close back below, it is considered a bearish "trigger," and oftentimes is a good sell signal.
