

00:21:28 vincent wang: I can see it on the net, very nice

00:30:30 adam childs: That is interesting Bitcoins 15 month cycle works well and I have a 34 week Primary cycle

00:30:42 adam childs: or 15 1/2 moths

00:50:24 vincent wang: since treasury cracks below 2018, so equity maybe longer than 1-2 years ?

00:50:38 adam childs: If we get higher oil prices again would that be bad for the economy and stock prices

00:50:52 Eleonore Charrez: interesting that the low was at the start of WWI, not at the middle or end

00:55:06 vincent wang: Ray, in your weekly report to all people this week, you mentioned Russia will likely lose. It would mean Nato will join the war, as putin will shut down northstream in mid july.

00:58:29 vincent wang: thank you

00:59:30 Eleonore Charrez: Ukraine will not settle neither surrender. however, without help they have a tough time, and all promises of weapons are not really kept... Ukraine could win , if Europe delivers weapons... but Europe is , I think , not delivering what they should...

01:00:02 adam childs: Maybe wait until PC low is due in Oil

01:00:08 Eleonore Charrez: US does, but Europe does not

01:04:37 Matthieu Kaiser: a few changes in planetary directions in October - that should be a volatile month

01:35:03 Wyatt Fellows: it was a contracted PC too wasn't it Gianni?

01:35:35 Wyatt Fellows: yes

01:35:37 Wyatt Fellows: dec

01:36:58 adam childs: 1/2 PT was Neptune retrograde

01:40:16 Ibrahim Koné: What would make you change the current label of MB and HPB? price going above 115 ?

01:41:32 Merriman Market Analyst: yes Ibrahim

01:42:57 adam childs: could we look at dollar/Euro

01:43:29 Ibrahim Koné: could you take a look at Silver?

01:44:18 Rita Perea: July 28th Jupiter Rx, also July 27th Feds announce GDP and if we are "officially" in a recession (defined by two consecutive qtrs of low GDP). Makes sense with the Jupiter Rx. Your thoughts?

01:47:30 Matthieu Kaiser: by the way, could you repeat what to do in such cases of very long clusters?

01:49:02 Wyatt Fellows: break them apart

01:52:21 Matthieu Kaiser: are we beyond the 24-month low for you?

01:52:35 Wyatt Fellows: would that mars/Uranus/Node conjunction in Taurus be tied to currencies

01:53:21 Matthieu Kaiser: March 2020

01:55:14 Matthieu Kaiser: it seems we are closing in to the end of the 23 or 24-month cycle

01:56:03 Matthieu Kaiser: from March 2020: [Nov 2021 - Jul 2022]

01:57:25 Ibrahim Koné: the 15m cycle is shared in bother cycle based on Ulric study

01:58:47 Danica Cordell-Reeh: is the same happening with the British pound where it could test the 1985 low of \$1.03 to the Gbp-dollar

01:59:18 Renato Ricks: that's what ive got

01:59:39 Matthieu Kaiser: definitely, March looks good for a PC

02:00:19 Renato Ricks: April 2021 16m cycle

02:02:32 adam childs: I have heard some people talk about a Euro around 0.86

02:03:09 Matthieu Kaiser: we can talk of the death of the euro...

02:03:31 Matthieu Kaiser: i think this is an option

02:04:15 adam childs: Wyatt

02:04:29 Ibrahim Koné: This is what Ulric was saying in the mid-year webinar expected 15 month low 24 Sep - 11 Jan period

02:04:49 Danica Cordell-Reeh: what would replace the euro or becomes individual or ?

02:05:07 Matthieu Kaiser: ?

02:05:16 Matthieu Kaiser: what was before the euro?

02:05:30 Danica Cordell-Reeh: indiviual currencies

02:05:54 Matthieu Kaiser: so that's the slope of least resistance

02:06:10 adam childs: The trouble with the Euri is it does not suit all of the different economies with the Euro

02:06:19 Matthieu Kaiser: another option would be "regional currencies", possibly

02:06:44 Matthieu Kaiser: some kind of "northern vs. southern euro"

02:06:45 Wyatt Fellows: would it be better to use the dollar for a cycles count?

02:06:58 adam childs: it can be too strong for the southern countries and Germany benefits

02:10:36 Matthieu Kaiser: it makes imports far more expensive

02:10:39 Renato Ricks: sekusd has a better correlation to euro, which I have done the study

02:11:24 Matthieu Kaiser: the German trade balance has turned negative

02:11:29 Matthieu Kaiser: due to energy

02:11:48 Wyatt Fellows: is there a real possibility the erozone falls apart in the near future?...what are the odds of that transpiring?

02:12:01 Matthieu Kaiser: Europe is losing much from this war

02:13:28 Danica Cordell-Reeh: is the same happening with the British pound where it could test the 1985 low of \$1.03 to the Gbpdollar

02:13:44 Ibrahim Koné: I don't think this will happen - people always forget that the Europe is about avoiding war and compete globally

02:14:00 Matthieu Kaiser: Johnson's leaving is very bullish for the pound

02:17:53 Ibrahim Koné: I meant a about Europe implosion euro as an remain a big problem due to the deference between Northern and southern countries (types of economies and cost of living)

02:18:23 Daniel Ineichen:The UK on its own has it much easier to navigate through inflation / recession and will have more flexibilty with monetary politics than the EUR.

02:18:37 Daniel Ineichen:There is a lot of good news priced into the USD already

02:18:51 Ibrahim Koné: could we take a look a Silver?

02:24:32 Matthieu Kaiser: thank you

02:24:32 adam childs: thank you :-)

02:24:39 Abhishek Singh: Thank you

02:24:44 Rita Perea: "Thanks Gianni!
