

00:39:17 Matthieu Kaiser: what about higher highs and lower lows?

00:39:37 Matthieu Kaiser: thank you

00:39:44 Matthieu Kaiser: indeed ;-)

00:42:50 Gianni Di Poce: lower lows is more important because cycles are measured from low to lows. Once you take out the low that started the cycle, that cycle is bearish until it ends

01:08:10 Wyatt Fellows: both 25wma and 34wma are below the 50 wma as well

01:10:22 Gianni Di Poce: Correct Wyatt

01:20:14 Vito Mijal-PAsa: How would you count the Elliot on that chart then Kat ? :)

01:22:44 Matthieu Kaiser: doesn't the 45d-MA currently correspond to a bearish crossover zone? we had a gap down on June 9

01:33:23 Matthieu Kaiser: that would confirm the rally may well be rejected by this MA

01:39:22 Gianni Di Poce: Yes that's right

01:41:18 Martha Geiger: Gianni- do you think any of that money will go into metals or crypto

02:05:43 jeff hanus: bitcoin

02:07:09 Daniel Ineichen: Gianni, what is your YouTube channel?

02:07:20 Martha Geiger: Thank you. I'll check You Tube

02:07:44 Matthieu Kaiser: <https://www.youtube.com/c/MerrimanMarketAnalyst>

02:08:24 Daniel Ineichen: thank you, Matthieu!

02:11:02 Matthieu Kaiser: the main problem for stock indices will likely be the crunch in earnings in the coming months

02:11:59 Matthieu Kaiser: multiples have lowered, not so much earning expectations... there's room for downgrade here IMHO

02:12:00 Wyatt Fellows: my follow up to that question ray is you often like to see divergence of indices at bottoms so what if you had a pullback here where the dow holds its low and the snp or nas make a new low to finish out their PC's for divergence...just something im gonna watch for if we do pull back

02:13:37 Wyatt Fellows: thanks

02:14:08 Wyatt Fellows: yes

02:19:15 Martha Geiger: Would you know of any solar stocks that would be good long term investments?

02:19:41 Pouyan Zolfagharnia: Tesla?

02:21:40 Vito Mijal-PAsa: yes MR G I like TAN to test or past the HIGH

02:22:05 Martha Geiger: THank you!!!

02:23:44 Pouyan Zolfagharnia: What about NEO?

02:25:19 Pouyan Zolfagharnia: Thanks Gianni, that was fantastic!

02:25:26 Pouyan Zolfagharnia: Indian

02:25:34 Maya Bothe: I have lower targets for Tesla

02:25:40 Eleonore Charrez: Blackrock is short all german stocks, except the german car stocks, apparantly

02:26:06 Martha Geiger: Maya- how much lower?

02:26:08 Eleonore Charrez: and all germans are very much into electric cars

02:26:30 Eleonore Charrez: no more petrol cars as of 2035

02:26:35 Pouyan Zolfagharnia: yes Maya - what are your targets?

02:26:53 Maya Bothe: Martha, I don`t want to shock you.. it could be a longer way down. But of course with sharp rallies inbetween 😊

02:27:30 Vito Mijal-PAsa: Problem is with the Battery system in EC apparently cost a small fortune to change

02:27:41 Eleonore Charrez: well, I hopre for hydrogen cars...

02:28:30 Martha Geiger: was given a suggestion to look into lithium mines in Venezuela-they hold the largest deposiet

02:28:30 Eleonore Charrez: but it's the most CO2 friendly :)

02:28:31 Vito Mijal-PAsa: very messy with EC accidents too

02:28:42 Vito Mijal-PAsa: How are the prices of the Grocery in local Markets over in USA , still in Bullish Trend ? :)

02:28:48 Pouyan Zolfagharnia: Thank you everyone!! Thanks Kat

02:28:48 Martha Geiger: Thaks everyone

02:28:58 Matthieu Kaiser: thank you

02:28:59 adam child: Maybe we should do a cucle's research on tan etf

02:29:00 Rita Perea: Thanks everyone!!

02:29:02 Pouyan Zolfagharnia: Woohoo

02:29:06 adam child: cycles

02:29:09 Eleonore Charrez: thanks !!! have a great Week ! good luck trading !

02:29:09 Maya Bothe: Eleonore, regarding Germany.. we are really having an energy problem due to the war

02:29:10 Abhishek Singh: Thanks

02:29:12 Daniel Ineichen:thank you everyone! very cool

02:29:15 adam childs: thank you
